Lucy and Team,

We at VTUMS and the Town of Bristol look forward to hosting your senior capstone project. We have time to meet next Friday morning. Let's aim to meet at 8:30 am at the Bristol Town Hall located at 1 South South Street in Bristol, downstairs in Holley Hall. We will start there and then tour the system.

Dear Ms. Marsano,

We are writing to you from the University of Vermont's Senior Capstone Design program. We are excited to be working on the PFAS removal treatment system in Bristol, VT. Our team consists of four students: Julia Szymanski, Zhiyi Wan, Daniel Cliche and Lucy Murphy. We are all studying environmental engineering with a focus on water quality. Additionally, we have established that Lucy Murphy will be the point of contact between the town of Bristol and the senior design project.

We would love to visit the site to view the New Haven Springs and to fully understand the project scope. We are looking to visit the potential sites where we may sample the water, as well as at the Bristol public water system, if possible. Our group is available for meetings on Friday mornings, as well as next Friday anytime until 1:30 pm. If this time period does not work with you, we could try to schedule another time.

We are looking forward to working with the town of Bristol on this project!

Sincerely,
Lucy Murphy
