**Subject :** NOTICE of trail closure for tree work at Mt Abe  
**To :** knight@gmavt.net

From the High School Athletic Director:

The High School trail will be closed at the southern end (near Stony Hill) starting August 29 until further notice.

Please avoid that section so that tree work can be safely completed.

Spread the word.

Subject: Tree Clearing on Southern End of Mt. Abraham Campus

Good Afternoon,

Due to excessive tree interference with our power lines/electrical coming up from Stony Hill and onto our campus we will be undergoing some significant tree clearing work to ensure the lines are kept safe. These power lines intersect our cross country trail network in a couple of spots along the southern part of the campus so we wanted to get the word out that starting August 29 that section of the trail will be shut down until the project is complete.

Mike and I walked the trails with the tree service company today and they plan to put a hold on the project between September 6th and September 10th in order for us to setup and mark out our cross country course for our home meet on the 10th. The project (if not finished already) will then resume the day after the meet and last until completion. We do not have an exact ETA on how long this project will take at this time.
