RE: Green Mountain Power Utility Project, Bristol, VT

Dear Town of Bristol:

This letter will serve to provide notice that Green Mountain Power Corporation will be commencing construction this week on the pole line located along East Street and Rockydale Road in Bristol, Vermont. The newly constructed line will consist of newly built distribution line and will generally follow the municipal right-of-way.

Construction will occur in phases and will generally be as follows: line workers will come in to set the new poles and anchors. The line crew can typically set several poles per day. Vegetation clearing and construction of the facilities will take place along the existing road corridor. Once the poles are set and tree trimming is complete, the wires are pulled into place and secured to the poles. Once all of the new lines, including electric, telephone, and cable are erected and fully operational, the old facilities will be removed.

Please be assured that great care will be exercised while working on or near your property. Any disturbed earth will be restored and reseeded.

We are very appreciative of your cooperation and thank you for working with us throughout this process. If you have any questions or concerns, now or during construction, please feel free to contact: Mike Christian at 802-349-6795 or at email: Mike.Christian@Greenmountainpower.com

Sincerely,

Brenda M. Green
