**Subject:** Re: Bartlett Falls Study

Hi Val and Michelle,

Given the immediacy of this TAC Grant application, I'd like to suggest adding this to Monday's meeting.

Will, can you send along your draft application ASAP?

Greetings from Lincoln,

I am writing to you, Valarie and Michelle, about an idea we had at our Lincoln Select-board Meeting. I am writing to you, both a Select Board Member and the County Transportation Advisory Committee Chair. The TAC has 40k in planning grant money. Our thought in Lincoln was that we should study something in Bristol: 116 intersection with Lincoln Rd and the Bartlett Falls parking issue. IT turns out that even though both of these areas of potential improvement are in Bristol, the safety hazards presented by both situations really effects pretty near every resident of Lincoln, because we all go down to Bristol 'cause we like it so much.

My request is for your review and possible approval for a TAC grant for a Study of the Bartlett Falls Area Traffic Challenges. WE will need the Bristol Boards blessing to proceed with the TAC Grant. The Grant application must be received by 09/11/2020. I will have a draft which I can email to you Monday morning. There is no financial commitment required. The only requirement is the Board consider the possible remediations contained in the report. I would like 10 or 15 minutes this Monday to discuss this with the board.

Thanks, and best regards
