TOWN OF BRISTOL

UNIFIED DEVELOPMENT REGULATIONS (Includes Zoning, Subdivision Floodplain and Downtown Design Review Regulations)

INTRODUCTION TO THESE REGULATIONS

The Bristol Town Plan provides the vision for how Bristol should grow and develop. All Regulations governing land use in the Town of Bristol stem from the Bristol Town Plan and should serve to implement the visions contained in it. The Regulations should work in concert to provide a clear, fair and efficient administrative process to guide and control development.

These Unified Regulations (these “Regulations”) constitute the primary regulatory tool by which the Town of Bristol implements the vision in its Town Plan. They include Bristol’s Zoning Regulations, Subdivision Regulations, the Flood Hazard Area Regulations and the Downtown Design Review criteria for the area encompassing Bristol’s Downtown Designation. For any given application, only a portion of these Regulations will apply. These Regulations are intended to be comprehensive and are organized to clarify the review process before the Zoning Administrator, Development Review Board or Downtown Design Review Committee.

HOW TO USE THESE REGULATIONS

This introduction is intended to help the applicant and the public understand how these Regulations function and to help an applicant and other parties interested in the application understand the development permit process in Bristol.

Article I of this document contains the general administrative framework for the Regulations. It is designed to provide general information regarding the purpose of the Regulations and how the Regulations function. It provides overall context but is less important to individual applications than other Sections.

Article II, which establishes the zoning districts, constitutes the functional heart of the document. It is generally the best place for anyone considering an application to start reviewing the Regulations. Article II and the zoning map establish a zoning district for each portion of town, the uses that will be allowed in each district and specific setback and other Regulations governing where uses may take place on a specific parcel. Applicants should use the zoning map and text in Article II to determine in which zoning district their parcel lies. Once they have identified the district, they should review the Regulations to identify the types of uses or development allowed in the district, to determine whether their desired use or development is allowed in the district, and if so, what procedure they will need to follow to apply. Next, they should determine the specific dimensional setbacks that govern where the use or development sits on the property. Lastly, they should look for references to other portions of these Regulations that apply to their proposed use.

Article III governs the permitting process an applicant will need to go through to develop or use their property in the manner proposed in their application. Article III starts by listing exempt uses or development not subject to these Regulations and therefore not requiring a permit. If the use or development an applicant plans is not exempt, it will require a permit. The applicant will need

to read Article III or speak with the Zoning Administrator to determine the process they need to follow to apply for a permit. These Regulations have two general review processes:

- An administrative review process for uses listed as “Permitted Uses” within the district are specifically given to the Zoning Administrator to review; or
- A more complicated review process for commercial uses or larger development proposals conducted by the Development Review Board, where it decides whether a permit application satisfies these Regulations.

In all cases, once an applicant has developed an idea of what they would like to do, where in Bristol they desire to do it and whether or not it is exempt from zoning, the best place for an applicant to start is with the Zoning Administrator. The Zoning Administrator serves as the front door for all zoning, subdivision or flood hazard area development or uses in the Town of Bristol. In addition to reviewing specific applications, the Zoning Administrator must also help applicants to understand and develop a proper application to request the type of use or development they are proposing and direct the applicant to the proper review process. Lastly, Article III also establishes the hearing requirements for all applications going before the Development Review Board. Although applicants may apply for different development or uses, these Regulations are intended to ensure that each applicant, and all people interested in the application, receive consistent and fair treatment.

Article IV, Article V, Article VI and Article VII constitute required, general, specific and performance related zoning Regulations that govern types of uses and development or specified uses. Each may or may not apply to any given application. Applicants are encouraged to review them thoroughly or speak about them specifically with the Zoning Administrator.

Article VIII governs the application and review criteria for building within the Flood Hazard Zone within Bristol. Article IX provides governs Subdivision review and Article X includes the definitions contained within these Regulations.

In drafting these Regulations, the Planning Commission sought to provide a consistent, fair and unified process to regulate land development. Over previous rounds of zoning Bristol has changed standards causing a small number of properties to have their historical uses classified as “pre-existing” and “non-conforming” in the zones in which they are located. If owners of such “grandfathered” properties should subsequently request changes or expansions compatible with their original uses and scale, these Regulations encourage the Development Review Board to work with the landowner to reach flexible solutions that meet the needs of the owners and protect the overall character of the zone. The Planning Commission sought to balance its respect for an individual’s property rights with Regulations intended to implement the community’s desire for proper growth and development as envisioned in the Town Plan.

Thank you.
The Bristol Planning Commission

ARTICLE I: ENACTMENT, INTENT AND ORGANIZATION

SECTION 100: ENACTMENT

In accordance with the Vermont Municipal and Regional Planning and Development Act, 24 V.S.A., Chapter 117, hereinafter referred to as the “Act”, there are hereby established Zoning Regulations for the Town of Bristol (the “Town”) which are set forth in the text and map that constitute these Regulations. These Regulations shall be known and cited as the “Town of Bristol Zoning Regulations” and referred to herein as “these Regulations”.

SECTION 110: INTENT

It is the intent of these Regulations to provide for orderly community growth and to further the purposes established in SECTION 4302 of The Act, and to implement the vision and objectives of the Bristol Town Plan.

SECTION 120: APPLICABILITY

All land development or development in the Town of Bristol must comply with these Regulations. As used herein, the term "land development" or “development” includes: the division of a parcel into two or more parcels or the use of existing parcels in a way which increases the number of housing units on such parcels; the construction, reconstruction, conversion, exterior structural alteration that does increase the footprint, relocation, or enlargement of any building or other structure; any mining, excavation or landfill; any change in the use of any building or other structure, or land or extension of use of land; any increase in the number of driveway intersection, either in number or in units served, when said intersection adjoins or enters into a town or state highway.

Any land development or development not in accordance with these Regulations shall be deemed prohibited.

SECTION 130: EFFECTIVE DATE

These Regulations or amendments thereto shall take effect when adopted by the Town of Bristol in accordance with the voting and other procedures contained in SECTION 4442 of the Act.

SECTION 140: REPEAL OF FORMER ZONING BYLAWS AND REGULATIONS

The Zoning Bylaws and Regulations, including the Zoning Map for the Town of Bristol in effect prior to the adoption of these Regulations, including the Map are hereby repealed as of the effective date of these Regulations and are replaced by these Regulations.

SECTION 150: INTERPRETATION

In their interpretation and application, the provisions of these Regulations shall be held to be reasonable requirements adopted for the promotion of the public health, safety, comfort, convenience, and general welfare. Except where these Regulations specifically provided to the contrary, these Regulations are not intended to repeal, annul or in any way to impair any Regulations or permits previously adopted or issued. However, where these Regulations impose a greater restriction upon the use of a structure or land than are required by any other statutes, ordinances, rule, regulation, permit, easement, or agreement, the provisions of these Regulations shall control.

SECTION 160: SEVERABILITY

If any provision of these Regulations or the application thereof to any person or circumstances is held invalid, the invalidity does not affect other provisions or applications of these Regulations which can be given effect without the invalid provision or application, and for this purpose the provisions of these Regulations are severable.

SECTION 170: AMENDMENTS

These Regulations may be amended according to the requirements and procedures established in 24 V.S.A. §§ 4441 and 4442.

ARTICLE II: ESTABLISHMENT OF ZONING DISTRICTS AND ZONING MAP

SECTION 200: ESTABLISHMENT OF ZONING DISTRICTS

Bristol is divided into zoning districts as shown on the official Zoning Map drafted by the Addison County Regional Planning Commission dated December 6, 2016 (The “Zoning Map”).

District Name	District Abbreviation	District Name	District Abbreviation
Village Business	(VB) District	Rural Agricultural 2	(RA-2) District
Residential/Office-Commercial	(ROC) District	Rural Agricultural 5	(RA-5) District
Village Mixed	(VM) District	Conservation	(CON-25) District
Recreational	(REC) District	Bristol Pond Camp	(BPC) District
Commercial	(C-1) District		
High Density Residential	(HDR) District	Downtown Design Review	(DDR) Overlay District
Village Residential	(VR) District	Flood Hazard Area	(FHA) Overlay District
Rural Agricultural 1	(RA-1) District		

SECTION 210: ZONING MAP

The location and boundaries of zoning districts are established as shown on the Zoning Map recorded in the Bristol Town Clerk’s office. A non-official reproduction, including a second map enlarging the area in and around the village is included herein for convenience only. The Zoning Map constitutes a part of these Regulations and of all future amendments to these Regulations.

SECTION 220: INTERPRETATION OF ZONING DISTRICT BOUNDARIES

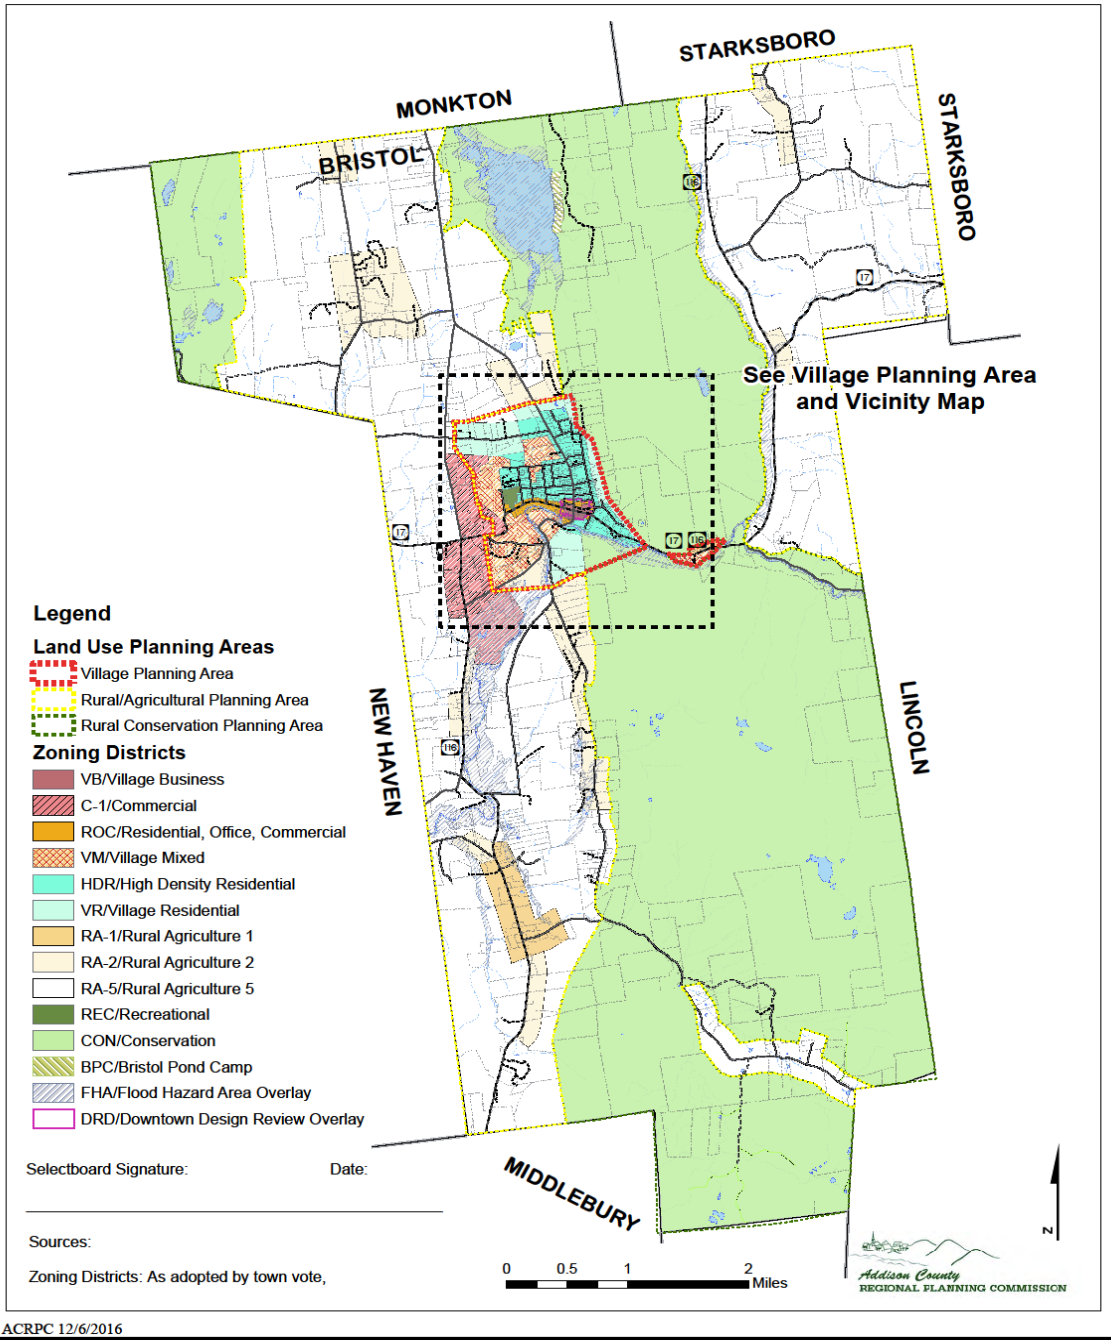

If uncertainty exists with respect to the boundary of any zoning district on the Zoning Map, the Planning Commission shall determine the location of such boundary.

SECTION 230: ZONING DISTRICTS - GENERAL STANDARDS

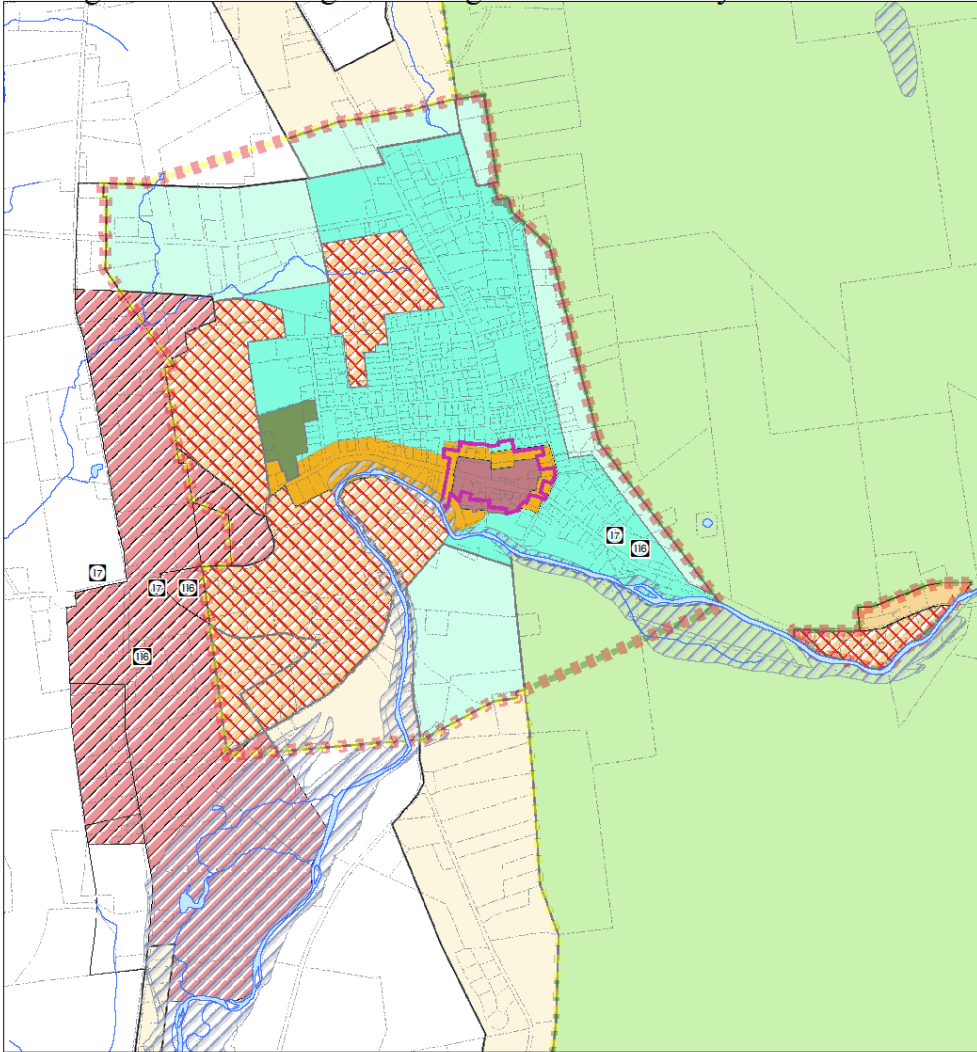

This article describes the zoning districts within the Town of Bristol. Each district description contains three sub-sections. Sub-section A discusses objectives and guidelines intended for each district, specifically how each district relates back to the Bristol Town Plan (“the Plan”). Sub-section B describes the uses permitted in each district. Uses include “by right uses”, secured through a permit issued by the Town of Bristol Zoning Administrator, “by right uses” marked with an asterisk (*), which require Site Plan review by the Development Review Board, or “conditional uses,” which are subject to more intensive review by the Development Review Board. Sub-section C includes the regulations for acreage, setbacks and other physical design elements each district requires. The Zoning Map delineates boundaries for each zoning district.

In addition to the uses permitted in each district, certain uses are exempt from these Regulations, either by design of the Town of Bristol Planning Commission (the “Planning Commission”) or by state statute. Exempt uses are covered in SECTION 301 of these Regulations. For convenience, exempt uses are listed as a type of permitted use under subsection B describing uses in each zoning district.

Village Business (VB)

A. Objectives and Guidelines

The purpose of this district is to promote the economic vitality of Bristol’s downtown business district, while maintaining its historic character, pedestrian scale and orientation, and small-town atmosphere. This district is densely developed, largely with block commercial buildings, and is and planned to be Bristol’s primary retail center. Use of existing storefronts on Main Street for non-retail purposes shall be strongly discouraged. Full utilization of existing buildings is encouraged in a manner that preserves their architectural integrity, and demolition of structurally sound historic structures shall be strongly discouraged.

B. Allowed Uses¹

Permitted (*Site Plan Review)

Footprint/structure	n/a	30,000 sf principal / 10,000 sf accessory

¹ Within the Downtown Design Review Overlay District all development involving exterior modifications shall go to the Design Review Committee for review. The Committee shall pass their recommendations on to the Development Review Board or Z.A.

² In all districts, commercial lot sizes, but not commercial density, may be reduced to the minimum residential lot size but only as part of a planned unit development approved by the Development Review Board.

³ The Z.A. shall measure front-yard setback in this district from the road ROW to allow structures to abut the road. The Z.A. shall measure front-yard setbacks in all other districts from the road centerline for ease of administration. The Z.A. shall measure front-yard setbacks for accessory structures from the principal building frontline.

Residential Office Commercial (ROC)

A. Objectives and Guidelines

The purpose of this district is to maintain and enhance the historic look and character, quality of life and mixed-use environment extending outward from Bristol’s Village Business District. This area already contains a mixture of historic homes, but also remains suitable for office and commercial development because of its proximity to the existing commercial core of Bristol. Commercial development in this area should complement and reinforce Bristol’s village. It should retain the larger historic homes within the district. Accordingly, adaptive re-use of existing buildings is encouraged in a manner that preserves their architectural integrity, and demolition of structurally sound historic structures shall be strongly discouraged. The uses allowed should not greatly impact upon the area residences and therefore should have limited impacts stemming from traffic, noise, odor or safety hazards.

B. Allowed Uses⁴

Permitted (*Site Plan Review)

⁵ See footnote 2.

Village Mixed (VM)

A. Objectives and Guidelines

This district shall promote opportunities for employment and housing within easy reach of the walkable core of the village. It promotes mixed use development intended to extend Bristol’s village to the west and south and to offer a mix of residential, commercial and light manufacturing opportunities within the Village Planning Area. Its vision incorporates and expands the recent development opportunities created in the Pine Street area and seeks to encourage similar development in other areas within the district, including the Town owned property at Stoney Hill. Mixed use residential or commercial/office parks developed as Planned Unit Developments (PUDs) are encouraged. The district also incorporates several municipal uses, which it envisions expanding and/or otherwise changing to meet the needs of the community.

⁶ In all districts, commercial lot sizes, but not commercial density, may be reduced to the minimum residential lot size but only as part of a planned unit development approved by the Development Review Board.

Recreational (REC)

A. Objectives and Guidelines

This district has been maintained and developed for public recreational uses and should continue to serve municipal and community needs for recreation. The district is comprised of property currently owned in part by the Town of Bristol and in part by the Bristol Recreation Club, Inc. The parcels should be treated as one cohesive unit if the ownership remains unchanged. The area is sometimes known as the Bristol Recreation Park and includes the Town's land at the so-called "riding ring" on Liberty Street.

B. Allowed Uses

Permitted (*Site Plan Review)

Exempt Uses (See SECTION 301)

Commercial (C-1)

A. Objectives and Guidelines

This district is located close to or within the Village Planning Area. The purpose of this district is to provide opportunities for both individual small-scale commercial and light industrial development and larger scale planned commercial and light industrial development. Existing residential uses will be allowed to continue. Retail Store, Class 3 development that competes with the downtown business district shall not be permitted.

B. Allowed Uses

⁷ New Extraction is not allowed within the Village Planning area, even if located within the C-1 district.

⁸ Portions of commercial structures not intended for human occupation, like silos or towers, in this district may reach up to 60 feet if necessary, for the operation of the proposed facility.

High Density Residential (HDR)

A. Objectives and Guidelines

It is the purpose of this district to allow for continued, high-density residential and compatible small business uses within the neighborhoods extending north and east from downtown Bristol. This district is largely developed with single-family homes and it is the intent of these Regulations to protect the existing character and maintain the district’s traditional settlement patterns and residents’ quality of life.

⁹ In all districts, commercial lot sizes, but not commercial density, may be reduced to the minimum residential lot size but only as part of a planned unit development approved by the Development Review Board.

Village Residential (VR)

A. Objectives and Guidelines

It is the purpose of this district to create a transitional zone between the village core and the surrounding rural agricultural area. The district shall allow for increased residential density and compatible small business and civic uses in areas extending outward from Bristol village. The intent of this district is to extend the character of the village into adjoining areas that are currently less densely developed to provide opportunities for residential growth in proximity to downtown Bristol.

Rural Agricultural 1 (RA1)

A. Objectives and Guidelines

This district consists of areas in which the soils have good capability for handling on-site sewage disposal and where roads provide adequate access without requiring major improvements. The district is intended to provide opportunities for housing at a medium density outside the Village Planning Area at reasonable cost, while permitting and encouraging continued agricultural use. Planned Unit Development is permitted and encouraged in this district.

Rural Agricultural 2 (RA2)

A. Objectives and Guidelines

This district includes lands generally well-suited for moderate-density residential development. It is the purpose of this district to allow for moderate-density, rural residential development and includes areas with historical residential development patterns while protecting the small-town atmosphere and quality of life enjoyed by district residents. Consideration should be given to maintaining open space and providing opportunities for outdoor recreation in order to preserve the rural character that makes this district an attractive and pleasant place to live. Planned Unit Development is permitted and encouraged in this district.

Rural Agricultural 5 (RA5)

A. Objectives and Guidelines

This district includes most of Bristol’s productive agricultural lands, in addition to woodlands. The purpose of this district is to allow for the maintenance of the town’s working farmland, forestland and open spaces, while providing opportunities for low-density rural living and resource-based small businesses. The desired character of this district is that of rural countryside, where residential development is compatible with and surrounded by agricultural uses, forest uses and open space. Planned Unit Developments and density-based zoning are permitted and encouraged in this district.

Conservation (CON)

A. Objectives and Guidelines

This district is primarily composed of large blocks of contiguous forest, a large portion of which is managed for timber production. These Regulations recognize the important ecological and economic functions of Bristol’s forestlands. This district includes lands poorly suited for development due to shallow soils, steep slopes, fragile or limited vegetation, inaccessibility and lack of infrastructure. The purpose of this district is to promote conservation and responsible management of the town’s natural resources, while providing opportunities for low-density rural living, resource-based businesses and enjoyment of nature. Development and land use within this district should be planned to limit disturbance to the natural environment and to promote sustainable uses.

Bristol Pond Camp (BPC)

A. Objectives and Guidelines

Bristol Pond constitutes a unique physical feature within the Town of Bristol. It supports low density outdoor recreational uses including fishing, hunting, birding and canoeing or kayaking. It hosts several species of rare and endangered plants and some of the oldest known archeological sites in the State of Vermont. Most of the pond is surrounded by open, undeveloped land that largely constitutes floodplain and marsh on which development is prohibited. The only portion of land adjacent to the pond that has any development currently consists of the 15 pre-existing, non-conforming small camp lots commonly known as the "Lake Winona Landowners Association". The primitive or seasonal camps or vacant lots that currently compose the district are small and many lack basic services like running water or functioning wastewater systems beyond an outhouse. The Bristol Pond Camp District constitutes a new district encompassing the 15 small lots that compose the Lake Winona Landowners Association and is surrounded by the Conservation District which encompasses the remainder of Bristol Pond. The Bristol Pond Camp District has two primary objectives. First, like the neighboring Conservation District, it is intended to protect the scenic, natural and historic qualities that make Bristol Pond unique. Second, it seeks to acknowledge the pre-existing primitive or seasonal camps and lots that exist on the Pond and to allow for limited and appropriate improvements to those camps or lots. In order to accomplish each of the objectives noted immediately above, the district offers the following guidelines controlling any new development in the district:

1. No further subdivision of any lot will be allowed within the district.
2. Only one single family dwelling unit will be allowed on each lot.
3. Year-round homes are prohibited in the district.
4. Primitive camps, with no interior plumbing consisting of more than a sink with water, will be allowed provided they are used for no more than 3 consecutive weeks per year, and no more than a total of 60 days per year. However, owners that can demonstrate that they use the camp more than the timeframe above and that the current level of use existed before January 1, 2007, will be allowed to continue using the camp at the level of use established prior to January 1, 2007. This date is significant as that use means that the camp is exempt from the permit requirements of the State Wastewater System and Potable Water Supply Rules under the "Clean State" exemption. The purpose of this guideline is to create a local permitting regime consistent with the state wastewater and potable water supply requirements and exemptions.
5. Seasonal camps, whether or not they have internal plumbing, that are used for 180 days per year or less will be allowed. Existing seasonal camps will be allowed to continue at the current level of use if the owner can demonstrate that the current level of use existed before January 1, 2007. This date is significant as that use means that the camp is exempt from the permit requirements of the State Wastewater System and Potable Water Supply Rules under the "Clean State" exemption. The purpose of this guideline is to create a local permitting regime consistent with the state wastewater and potable water supply requirements and exemptions.
6. Applicants applying for a zoning permit for any improvements or additions, like adding bedrooms, or making any other changes that would require a State Wastewater System and Potable Water Supply Permit, understand that that the Town of Bristol will condition the issuance of a final zoning permit upon the applicants' securing a State permit.
7. No new structures may be erected within 100 feet of the shoreline of Bristol Pond as measured from the mean high-water mark. However, pre-existing camps closer to the pond than 100 feet may add rooms or other improvements to the camp, but only if the proposed addition is no closer to the pond and can meet the dimensional setback requirements for locating the addition on the

- side of the structure or on the portion of the structure furthest away from the pond.
8. Each lot shall maintain a native vegetative buffer of at least 100 feet from the mean high-water mark along most of the shoreline of the pond that the lot encompasses. Native vegetative buffers, including trees, shrubs or other understory plants and a “duff” layer of leaf litter and woody debris, provide a number of environmental functions that benefit the pond and the wildlife that use the pond for drinking water and habitat. Trees and shrubs can help screen properties from the other users of the pond, preserving a pristine experience. They also provide cover for terrestrial species that use the pond for drinking water. Their root systems help bind the soil, slowing and filtering runoff, preventing erosion and maintaining water quality. The “duff” layer also serves too slow and filter runoff, improving water quality. Lastly, trees, shrubs and duff contribute woody debris, and associated insects and plants necessary to maintain the health of the near shore aquatic habitat, which supports the reproduction of many aquatic species. Accordingly, Bristol requires that each property owner along the pond serve as a steward of the pond’s resources, both for themselves and for the general public. Maintaining a natural vegetative buffer within 100’ feet of the pond for most of the lot frontage on the pond can look a number of different ways. Guidelines for implementing the buffer follow:
 - a. The duff layer is most important and should be maintained in nearly all areas within 25 feet of the pond.
 - b. Areas of trees and shrubs should be preserved but may be thinned or limbed to provide viewsheds from the property to the pond, leaving the trees’ upper stories intact to provide shade and screening.
 - c. Grass or lawn areas should comprise a minority of the area of the shoreline, decreasing in size closer to the waterline.
 9. Accessory uses/buildings will be permitted provided they meet all the dimensional standards noted below.

Downtown Design Review Overlay (DDR)

A. Objectives and Guidelines

The purpose of the Downtown Design Review Overlay District is to protect the historic mixed commercial/residential character and resources within the defined area of downtown, and to encourage new construction which will reinforce the best qualities of the existing character while allowing freedom of expression compatible with the flavor and spirit of the community. The dimensions of the district are depicted as the overlay area on the Zoning Map. The overlay district contains special Regulations to be added to those of the underlying district and does not affect the zoning Regulations governing the use of the properties within such district.

B. Allowed Uses

All Allowed Uses included in the underlying district shall be allowed in the overlay district.

C. Dimensional Standards

Dimensional Standards shall remain the same as in the underlying district.

D. Design Standards

All development in the Downtown Design Review Overlay District shall be designed to attract people to Bristol's village and, as such, shall meet the following design standards. These design standards shall be administered by the Design Review Committee ("DDRC") See Section 333 describing the DDRC. The DDRC shall review a project to determine if the proposed development substantially conforms to the following standards and then make recommendations to the Zoning Administrator for projects involving permitted uses or to the Development Review Board for approval as part of a project requiring Site Plan, Conditional Use Review or other reviews. See Section 395 governing the process by which the DDRC performs its reviews.

Building Design

1. **Scale:** The scale and massing of new buildings should be compatible and harmonious with surrounding structures
2. **Height:** The height of a building or alterations shall be considered in relation to the height of existing adjacent buildings and the building being constructed or altered.
3. **Setback:** The front, side and rear setbacks shall be considered in relation to the prevailing setback existing in the immediate area.
4. **Proportion:** The relationship between the width and height of the windows, doors and facades of adjacent buildings shall be considered in the construction or alterations of a building.
5. **Materials:** Materials should be selected to enhance streetscape and pedestrian view. Materials that are durable and attractive over time should be encouraged.
6. **Architectural Features:** Architectural features including but not limited to cornices, railings, windows, shutters, fanlights, and entablature prevailing in the immediate area should be considered- in the construction or alteration of a building. It is not intended that the details of old buildings be duplicated precisely, but they should be regarded as suggestive of the extent, nature and scale of details that would be appropriate on new buildings or alterations. The preservation of distinctive materials, features, and construction techniques or examples of craftsmanship that characterize a property is encouraged.
7. **Building façade:** Structural shape, placement of openings and architectural features give a predominantly vertical, horizontal or angular character to the building's front facade and should be considered in the construction or alteration of a building. Windows and doors should fit same opening or original size, be consistent with other openings in the building, and be of similar style to the rest of the building and surrounding structures.
8. **Roof shape:** The similarity or compatibility of roof shapes in the immediate area should be considered in the construction or alteration of a building.

9. **Orientation:** New buildings should be oriented toward, and related both functionally and visually to, public streets and/or common greens, parks or plazas. Consideration shall be given to buildings serving special civic, social or cultural functions, including places of worship that may be designed to serve as prominent focal points within the district.
10. **Historic structures:** When a proposed project is to be located next to a recognized historic structure, the historic and architectural value of that structure should not be diminished. Specifically, no building adjacent to Holley Hall should obscure or detract from the structure's prominence.

Lighting, Signage, Utilities and Maintenance

1. **Lighting:** In addition to conforming with zoning (SECTION 752), lighting fixture design, when possible, should be compatible with and sensitive to the architectural style and period of the related buildings.
2. **Signage:** All signs should conform to existing zoning Regulations. In addition, while creative, vibrant and artistic signs are encouraged; the size, location, design, color, texture, lighting, and material of all exterior signs should be complimentary to buildings and structures on the site and surrounding properties. Proposed signs should not block existing signs when viewed down the sidewalk or from the street.
3. **Utilities:** Refuse containers and utilities (including satellite dishes) should be attractively screened or buried to block them from public view. Screening material should consist of plantings that will provide screening during all seasons; structures made of wood, brick or granite in keeping with the general design of the structure. Whenever possible, utility components (Central HVAC units) should be housed within or on the top of the proposed building. When not possible, the applicant should provide evidence as to why, and offer proper screening. Any application which proposes new structures, additional lot coverage, or installation of machinery or equipment which emits heat, vapor, fumes, or noise shall include in the application descriptions of efforts to minimize, insofar as practical, any adverse impact on light, air, and water or on noise levels of the immediate surroundings.
4. **Rain, Snow, Ice:** Applicants should be required to develop within their proposal how they will deal with rain, snow, and ice that may affect neighboring properties or public improvements.

Landscaping

1. **Landscaping:** If natural features and existing landscaping are to be removed, there should be plans to replace and maintain such features and landscaping. The restoration or reestablishment of landscaping should consider such features from the surrounding properties (e.g., plant types). Open spaces should add to the visual amenities of the vicinity and surrounding properties. If open space is intended for active use, it should be so designed as to maximize its accessibility for all, encouraging social interaction.
2. **Continuity:** Physical elements such as yards, fences, evergreen masses, or building facades may combine to form lines of continuity along a street. These elements shall be considered in the construction or alteration of a building.
3. **Fences:** Fences in the Design Review District should be a maximum height of four (4) feet, except when required for vehicular screening, when the maximum height can be five (5) feet. Fences should be compatible with the architectural style/period of building. The structural supports of the fence should face the interior of the lot and no chain link fences should be allowed, unless other state guidelines supersede.
4. **Hardscaping:** Materials should be chosen for their longevity and for their compatibility with the existing structure and adjacent properties. An appropriate mix of materials is encouraged. Large areas of poured concrete or cement should be discouraged.
5. **Less Visible Areas:** The design standards contained herein shall be reasonably applied to have a limited or no effect on rear yards and side yards that are not generally visible by the public.

Parking and Pedestrian Circulation

1. **Parking/Vehicle and Pedestrian Circulation:** New construction or renovations should not take up existing parking spaces. Applications should address pedestrian and vehicular circulation. Special attention should be given to the safe separation of vehicles and pedestrians, to the arrangement of parking areas, and to service and loading areas. Applications shall incorporate accessible routes and ramps for individuals with a disability.

ARTICLE III: ADMINISTRATION AND ENFORCEMENT

SECTION 300: APPLICATION OF REGULATIONS

The application of these Regulations is subject to 24 V.S.A. §§ 4411, 4412 and 4413 of the Act. Except as hereinafter provided, no land development shall occur unless it is in conformity with the Regulations herein specified for the district in which it is located or it is exempt per the Act or SECTION 301 of these Regulations.

Any use not permitted by these Regulations shall be deemed prohibited.

SECTION 301: EXEMPTIONS

In addition to the uses permitted in each district, certain uses are exempt from these Regulations, either by design of the Town of Bristol Planning Commission (the “Planning Commission”) or by state statute. No zoning permit is required for the following:

1. Pursuant to 24 V.S.A. § 4413(b), public utility power generating plants or transmission facilities regulated under 30 V.S.A. §248.
2. All fixed solar panels on roofs adding less than 10 feet in height to the structure are exempt from these Regulations. (See SECTION 607 for Regulations governing ground mounted solar facilities not exempt pursuant to sub-SECTION 1 above.)
3. Telecommunications facilities regulated by the State of Vermont Public Service Board under 30 V.S.A. §248a, are exempt from local Regulations (See SECTION 608 of these Regulations for restrictions governing telecommunications facilities not exempt under 30 V.S.A. §248a).
4. Pursuant to 24 V.S.A. § 4413(d) farm structures, excluding dwellings, accepted agricultural practices and accepted silvicultural practices are exempt from local permitting requirements. However, farmers intending to erect a farm structure must complete a zoning application notifying the municipality of their intent to build a farm structure, and abide by setbacks contained within these Regulations, unless the farmer provides a letter approving lesser setbacks by the Secretary of the Agency of Agriculture, Food and Markets. The application/notification to the municipality must contain a letter from the Secretary of Agriculture explaining the exemption or a sketch of the proposed structure including the setback distances from adjoining property owners and the street right-of-way and other information sufficient to allow the Zoning Administrator to determine whether the activity or structure constitutes an exempt activity or structure. If the activity or structure is exempt, no fee shall be due. Additionally, all farm structures within the Flood Hazard Area regulated by Article VIII of these Regulations must comply with the National Flood Insurance Program. Lastly, the municipality may report violations of Accepted Agricultural Practices or accepted silvicultural practices to the appropriate state authorities for enforcement.
5. Pursuant to 24 V.S.A. § 4413(e), but subject to 24 V.S.A. § 2295, these Regulations shall not restrict hunting, fishing, trapping and other activities under SECTION 2295.
6. Fences, hedges, or walls, outside of the Downtown Design Review Overlay District, which do not interfere with corner visibility.
7. Except within the Downtown Design Review Overlay District and the Flood Hazard Overlay District, doghouses, sheds, tree houses, or similar structures having less than 64

square feet in floor area and less than 8 feet in height, and which are at least 5 feet from all property lines.

8. Except as specified within the Downtown Design Review Overlay District, placement of an antennae or dish used to transmit and/or receive communication signals on that property owner's premises if the area of the largest face of the antenna is no more than 15 square feet and if the antennae or any mast support do not extend more than 12 feet above the roof of that portion of the building to which the mast is attached.
9. Telecommunication dishes or antennae attached to an existing structure for personal, non-commercial use by a single individual or family.
10. Any sign erected by the Town or State for directional information or traffic control purposes or exempt per SECTION 748 of these Regulations.
11. Garage sales, yard sales, auctions or similar events provided that they extend for a period of less than four consecutive days, or less than ten days in a calendar year, and are managed in a way not to cause traffic or parking problems or create other nuisances for neighbors.
12. Temporary roadside stands for the sale of agricultural products provided that, after application and review as contemplated in SECTION 301(4) above, the Zoning Administrator finds that:
 - a. The proposed stand shall not be closer to any lot line than twenty feet.
 - b. Off-street parking spaces shall be provided for at least two motor vehicles.
 - c. Access to or egress from any stand shall not create a traffic hazard.
 - d. The stand otherwise meets the definition of an agricultural structure noted above in SECTION 301(4).
13. Renovations to the interior of a building that do not alter or change its use.
14. Infrastructure integral to a permitted building or structure and located primarily underground, such as drainage, wells and water systems.
15. Certain government and community facilities, as described in SECTION 412 of these Regulations are exempt from the district Regulations prescribing where they may be located, but shall be regulated by Site Plan Review with respect to all aspects of the property within the parcel chosen to the maximum extent allowable under these Regulations.

SECTION 310: ZONING ADMINISTRATOR

The Zoning Administrator, hereinafter referred to as Z.A., shall be nominated by the Planning Commission and approved by the Bristol Selectboard (the "Selectboard") for a term of three years or when a vacancy exists to administer the Zoning Regulations, as provided for in 24 V.S.A. § 4448. The Z.A. may hold any other office in the Town of Bristol, except membership on the Development Review Board. Compensation of the Z.A., administration of the Zoning Bylaws and Regulations by the Z.A., appointments of acting Officers and of Assistant Zoning Administrators, authority between the Z.A. and the Assistant, and removal of same, shall all be carried out in accordance with par. (a), (b), (c) and (d) of said SECTION 4448.

The Z.A. shall administer these Regulations literally and shall not have the power to permit any land development that is not in conformance with these Regulations. The Z.A. shall inspect land developments, maintain records, and perform all other necessary tasks to carry out the provisions

of these Regulations, including providing interested persons with forms and information necessary to obtain municipal permits and coordinating a unified effort on behalf of the municipality in administering its development review programs. A Z.A. may be removed for cause at any time by the Selectboard after consultation with the Planning Commission.

SECTION 320: ZONING PERMIT (SECTIONS 320-329)

Except as noted in SECTION 301 of these Regulations or as specifically exempted in the Act, no land development, building development (See definition of development) or change of uses may commence without a zoning permit issued by the Z.A., as provided for in 24 V.S.A. § 4449.

SECTION 321: FEES

The Selectboard shall establish all fees to be charged with respect to the administration of these Regulations, including those portions of these Regulations addressing the flood hazard area, with the intention of covering the costs of administering the same.

The Development Review Board of the Town may require an applicant for approval of any proposed development to bear the costs incurred by the Town for any professional reviews and inspections which are reasonably required by the Town in connection with such application, or in connection with the ongoing development, including, but not limited to, fees and disbursements charged to the Town for engineering, legal or hydrological services rendered on behalf of the Town in connection with the development.

This regulation stems from the authority granted under 24 V.S.A. § 4440(d).

SECTION 322: APPLICATION FOR A ZONING PERMIT

Any person desiring to undertake any activity requiring a Zoning Permit, not exempt pursuant to SECTION 301 of these Regulations, shall complete an application for a Zoning Permit and submit it with all required information to the Z.A. The Z.A. shall not issue a Zoning Permit unless a complete application is filed with the Z.A. The application shall include the following information:

1. Permit fees.
2. A completed zoning application identifying the applicant, the owner(s), the location of the parcel to be improved, the parcel identification number, the book and page number of the deed and a description of the improvements and uses proposed. The application shall also include a drawing identifying the location of the parcel and accurately depicting the improvement proposed in relationship to the lot lines and other structures on the parcel. Any sheet of the drawing shall be not more than 24” wide x 36” long drawn to scale, with the scale clearly identified and large enough to depict the details clearly. An arrow should depict north. The drawing shall depict the shape, design, size and height of the proposed structure, plus the location of all infrastructure proposed to serve the structure, including driveways, parking areas, utilities, drainage and other proposed improvements.
3. Written approval by the Selectboard or their designated agent, regarding access plans to any Town road including the location of driveways, culverts, and, if required, drainage along Town roads.

4. Other Town or State permits necessary prior to construction of any proposed structure, including but not limited to State of Vermont Water Supply and Wastewater Permits or Stormwater Permits.

SECTION 323: ACTION BY THE Z.A. ON AN APPLICATION

Within 30 days after submission of a complete application, the Z.A. shall act with regard to the application for a permit presented and either pass it to the Development Review Board for its review, or, if authorized, conduct a review of the project. If the Zoning Permit is approved, the Z.A. shall issue a permit with appropriate conditions, if any. If the application is denied, the Z.A. shall state such denial and the reasons therefore in writing and shall immediately mail notice of such denial to the applicant at the address indicated on the application. Failure to act on a complete permit application, which the Z.A. has the authority to review, for a period of greater than 30 days shall result in a permit's deemed approval.

SECTION 324: POSTING OF A ZONING PERMIT

Each permit issued under this SECTION shall contain a statement of the period within which an appeal may be taken. The applicant shall post a Notice of Permit on a form prescribed by the municipality within view from the public right-of-way most nearly adjacent to the subject property until the time for appeal (15 days) has passed.

SECTION 325: EFFECT OF ISSUANCE OF A PERMIT

No Permit issued pursuant to this SECTION shall take effect until the 15-day time for appeal authorized in 24 V.S.A. § 4465 has passed, or in the event that a notice of appeal is properly filed, no such Permit shall take effect until adjudication of that appeal by the Development Review Board is complete and the time for taking an appeal to the Environmental Court has passed without an appeal being taken. If an appeal is taken to the Environmental Court, the permit shall not take effect until the Environmental Court rules in accordance with 10 V.S.A. § 8504 on whether to issue a stay, or until the expiration of 15 days, whichever comes first.

Once a zoning permit has taken effect, applicants shall have two years from the date it becomes effective to substantially complete the activities subject to the permit and to secure a certificate of compliance documenting the projects substantial completion. If the applicant fails to substantially complete the activity authorized within the two-year period, the Zoning Permit shall become null and void. The applicant will need to reapply to complete any activities.

SECTION 326: CERTIFICATE OF COMPLIANCE

Upon completion of any work or change in use requiring a permit under these Regulations and prior to its occupancy, the permittee shall request a Certificate of Compliance from the Z.A. Within seven days after notification that a building, structure, premises or part thereof is staked and about to have its footings poured and again when the building or structure is completed or ready for occupancy or use, the Z.A. shall make inspection of it. Upon determining that the structure conforms to the provisions of these Regulations the Z.A. shall issue a Certificate of Compliance. It shall be unlawful to use or occupy, or permit the occupancy of any land or structure or part thereof until the Z.A. issues a Certificate of Compliance stating that the proposed use of the structure or land complies with the requirements of these Regulations.

SECTION 327: ABANDONMENT OF PERMIT

Permits for structures granted a certificate of compliance shall continue indefinitely unless the structure becomes non-conforming with these Regulations and is abandoned for a period of two years.

Permits for uses shall continue for the term specified within the permit conditions. Use permits will automatically expire within two years after the cessation of use by any property owner subject to the permit.

Permits authorizing the subdivision of land or the creation of a planned unit development shall become effective upon the applicants recording a plat depicting the subdivision or Planned Unit Development with the Town Clerk pursuant to the requirements of 27 V.S.A. §1403 and shall not expire after they have been recorded, unless specifically requested by the landowner.

SECTION 328: PENALTIES

Violations of these Regulations shall be regulated as prescribed in 24 V.S.A. § 4451 and § 4452 of the Act, as they may be amended from time to time. Penalties may include fines up to the amount listed in the statute at the time of the offense (Currently up to \$100 per day, per offense, doubled in the event of default), injunctive action or any other remedy the town may lawfully seek under the statute.

SECTION 329: ADMINISTRATIVE REVIEW BY Z.A. OF SPECIFIED STRUCTURES

In addition to granting “by right” permits pursuant to SECTION 323 above, these Regulations also grant the Z.A. the ability to conduct an administrative review, as authorized pursuant to 24 V.S.A. § 4464 (c), and grant permits which include new development or non-substantive changes to previously approved development that would otherwise require approval by the Development Review Board. Applicants for these administrative changes shall be responsible for providing the Z.A. with a complete zoning application and a supplemental letter or plan containing information necessary for the Z.A. to make a decision. The Z.A. may require an accurate drawing of the property showing existing features, including structure locations, driveways, easements, traffic circulation, parking and loading spaces and pedestrian walks, and landscaping plans and other information pertinent to the issue and depicting proposed non-substantial change for which the permit is being sought.

The Z.A. may grant a permit including an administrative change for non-substantial changes to previously approved development or new development, which constitutes a by right use without requiring Site Plan approval, if the applicant can satisfy the following standards:

1. The permit requested is for a temporary structure or a use permitted within the district in question as by right use (as opposed to a conditional use).
2. The permit requested is in conformance with the Town Plan and the goals set forth in SECTION 4302 of the Act.
3. The permit requested is designed to conform to the character of the land use area in which it lies as defined in the Town Plan and further designed to reasonably limit impact or the potential for impact upon ones’ neighbors.

4. The permit proposed incorporates design techniques (restricted height, lack of windows) screening (fencing or plantings) or other remedies to reasonably limit impact or the potential for impact upon ones' neighbors.
5. The permit proposed does not result in any substantial impacts under any portion of these Regulations.
6. The permit will not substantively alter any of the findings of fact or conditions imposed upon the applicant by the most recent permit approval.
7. The permit requested accommodates structures providing for disability accessibility, fire safety and other requirements of land or energy conservation or renewable energy structures.

The Z.A. shall decide on the request for a permit or permit amendment by applying the facts presented in the application to the criteria, listed above, and incorporating all into a decision. In approving a project, the Z.A. shall act to ensure, and may impose conditions requiring that the permit, if authorized, will represent the minimum amendment that will afford relief and will represent a non-substantive deviation possible from the previous approval and conforms to these Regulations and the Plan. The nature of any permit amendment and any conditions attached to it shall be entered on the face of the Zoning Permit, incorporated therein and shall be enforceable in the same manner as all other applicable requirements of these Regulations. The decision of the Z.A. regarding the permit, or the permit amendment, is appealable to the Development Review Board pursuant to criteria and procedure outlined in SECTIONs 360-365.

SECTION 330: PLANNING COMMISSION DEVELOPMENT REVIEW BOARD AND ADVISORY COMMITTEES (SECTIONs 330-333)

The Bristol Planning Commission is responsible for drafting the Town Plan, all regulations and for conducting other planning studies and interpreting the regulations it has created.

Bristol has created a Development Review Board to conduct all quasi-judicial reviews of specific types of applications as listed below. Rules of procedures, rules of ethics, public notice requirements, requirements regarding decisions, appeals and all other matters before the Development Review Board shall be established as provided by the Act and as set forth in these Regulations.

Additionally, Bristol has also established a Design Review Committee to address development proposals solely within the Downtown Design Review Overlay District, associated with Bristol's Designated Downtown. The Downtown Design Review Committee serves as an advisory committee to the Zoning Administrator and the Development Review Board.

SECTION 331: PLANNING COMMISSION

The Town of Bristol Planning Commission consists of nine members appointed by the Selectboard. The Planning Commission has the following functions:

1. Prepare and update the Bristol Town Plan every eight years and amend it, as necessary.
2. As needed, prepare amendments to these Regulations and other Regulations as permitted by 24 V.S.A. § 4442.
3. Resolve any uncertainties regarding zoning district boundaries on the Zoning Map.

4. Nominate the Z.A. with approval of the Selectboard to administer these Regulations, as provided for in 24 V.S.A. § 4448(a).

SECTION 332: DEVELOPMENT REVIEW BOARD

The Town of Bristol Development Review Board will consist of seven members and two alternates appointed by the Selectboard, a majority of which shall be legal residents of the Town of Bristol. Members of the Development Review Board shall be appointed by the Selectboard for 3-year terms, in a manner so that not more than 1/3 of the total 3-year terms run out in any one year. Any member of the Development Review Board may be removed for just cause by the Selectboard upon written charges and after a public hearing.

The Development Review Board has the following functions:

1. Hear and grant or deny appeals of actions of the Z.A.
2. Hear and grant or deny requests for Variances.
3. Hear and grant or deny requests for conditional use approval (The Development Review Board shall also conduct a Site Plan approval as part of this review.) A portion of this review may also include review and action on the recommendations of the Downtown Design Review Commission, for proposals needing Conditional Use approval within the Design Review Overlay District.
4. Hear and grant or deny approval for expansions of non-conforming uses and non-complying structures pursuant to the criteria for conditional use approval (The Development Review Board shall also conduct a Site Plan approval as part of this review.) A portion of this review may also include review and action on the recommendations of the Design Review Commission, for proposals needing conditional Use approval within the Downtown Design Review Overlay District.
5. Hear and grant or deny approval for activities in the Flood Hazard Area.
6. Hear and grant or deny requests for Waivers.
7. Hear and grant or deny approval to modify district requirements under the Planned Unit Development provisions of these Regulations.
8. Hear and grant or condition approval of Site Plan applications Development Review Board A portion of this review may also include review and action on the recommendations of the Design Review Commission, for proposals needing Site Plan approval within the Downtown Design Review Overlay District.
9. Review requests for rights of way, or other changes requested to plats of record.
10. Hear and approve or deny applications for subdivision
11. Hear any other form of land use request as authorized by these Regulations and 24 V.S.A. § 4460.

If more than one review is required for a project, the reviews, to the extent feasible, shall be conducted concurrently.

SECTION 333: DOWNTOWN DESIGN REVIEW COMMISSION (DDRC):

The DDRC shall consist of not less than five (5) nor more than seven (7) members appointed by the Selectboard for renewable 3-year staggered terms. A quorum will be required to conduct business. All members of the DDRC shall be residents of Bristol or business or property owners within the Design Review District. The DDRC's sole responsibility is to review projects within the Downtown Design Review Overlay District. See Article II, Downtown Design Review District for criteria for review and Section 395 dictating the process of how the DDRC reviews those criteria. The DDRC meets when an applicant proposes a project that includes:

1. Construction of a building, outbuildings, fences or retaining walls.
2. Addition to or alteration of the exterior of a building which increases or decreases the square footage of the building whether enclosed or not
3. Any change to:
 - a. The exterior wall of a building by creating openings (new windows or doors) or filling them in (removing window or doors or changing their size in any way).
 - b. The roofline or chimney; or
 - c. Materials used on exterior walls, windows, railings, balusters or roof.
4. Demolition of a structure.

Projects proposing the following shall not require design review by the DDRC:

1. any interior alterations or changes that do not affect, change, or add to the exterior of the structure.
2. a change in use or type of occupancy.
3. routine maintenance or repair of any structure, if the maintenance or repair does not result in any change of design, type of material, or appearance of the structure.

SECTION 340: PUBLIC NOTICE AND REVIEW PROCEDURE

The applicant shall submit its application for review by delivering one (1) copy of those materials required by the appropriate section of these Regulations governing the type of action requested: to the Town Clerk's office at least 25 days prior to the regular meeting of the Development Review Board,

Conditional Use: See SECTION 350

Appeal: See SECTION 360

Variance: See SECTION 370

Waivers: See SECTION 380

Site Plan, Downtown Design Review and Other: See SECTION 390

Floodplain: See ARTICLE VIII

Subdivision: See ARTICLE IX

1. **Notice procedures:** All development review applications or appeals before the Development Review Board shall require notice for a warned public hearing as follows:
 - a. Public Notice of hearings for conditional use review, variances, appeals of decisions of the Z.A., preliminary plat review for major subdivisions and final plat review for minor subdivision applications shall be given not less than 15 days prior to the date of the public hearing by all the following:
 - i. Publication of the date, place, and purpose of the hearing in a newspaper of general circulation in the municipality affected. The Z.A. shall place the notice in the paper.
 - ii. Posting of the same information in three or more public places within the municipality in conformance with location requirements of 1 V.S.A. § 312(c)(2), including posting within view from the public right-of-way most nearly adjacent to the property for which an application is made. The Z.A. shall post notices two places within town. The applicant shall be responsible for posting the property.
 - iii. Written notification to the applicant or appellant and to owners of all properties adjoining the property subject to development, without regard to any public right-of-way. The notification shall include a description of the proposed project and shall be accompanied by information that clearly informs the recipient where additional information may be obtained, and that participation in the local

proceeding is a prerequisite to the right to take any subsequent appeal. The Applicant shall be responsible for notifying all adjoining landowners and shall do so by a certificate of mailing or hand delivery. Prior to the first hearing, the Applicant shall demonstrate compliance with this provision by producing a copy of the letter sent, a list of those it was sent to and the certificate of mailing demonstrating that the letters were sent (The Applicant need only demonstrate that the letter was sent, not that it was received) or signed receipts if the letter was hand-delivered. If the Applicant fails to reasonably demonstrate that they sent notice to the adjoiners and any other interested party, the Development Review Board may postpone the hearing.

b. Public Notice of Hearings on **all other types of development review**, including site plan review and review of a request for waiver shall be given not less than **7 days** prior to the date of the public hearing and shall include, at a minimum, all the following:

c.

- i. Posting of the date, place, and purpose of the hearing in three or more public places within the municipality in compliance with the notice requirements for special meetings contained in 1 V.S.A. § 312(c)(2); The Z.A shall post notices two places within Town. The applicant shall be responsible for posting the property.
- ii. Written notification to the applicant and to owners of all properties adjoining the property subject to development, without regard to any public right-of-way. The notification shall include a description of the proposed project and shall be accompanied by information that clearly informs the recipient where additional information may be obtained and that participation in the local proceeding is a prerequisite to the right to take any subsequent appeal. The Applicant shall be responsible for notifying all adjoining landowners and shall do so by a certificate of mailing or hand delivery. Prior to the first hearing, the Applicant shall demonstrate compliance with this provision by producing a copy of the letter sent, a list of those it was sent to and the certificate of mailing demonstrating that the letters were sent (The Applicant. need only demonstrate that the letter was sent, not that it was received) or signed receipts if the letter was hand-delivered.

2. **Review Procedures.** Pursuant to the requirements of 24 V.S.A. § 4461 the Development Review Board shall set a date and place for a public hearing of an application or an appeal within 60 days of the filing of a complete application or notice of appeal. The Hearing shall be conducted as follows:

- a. The Development Review Board shall give public notice of the hearing pursuant to the procedure described in Subsection 1 of this section and shall mail to the applicant, or in the case of appeals, the appellant, a copy of that notice at least 15 days prior to the hearing date.
- b. The applicant or its agent shall attend the hearings.
- c. Any person or body empowered by Section 24 V.S.A. § 4465 to participate as an interested party or to take an appeal with respect to that property at issue may appear and be heard in person or be represented by an agent or attorney at the hearing. The Chair of the DRB shall account for interested parties at the beginning of the hearing.
- d. The Development Review Board may adjourn the hearing from time to time; provided, however, that the date and place of the adjourned hearing shall be announced at the hearing.
- e. All hearings shall be open to the public and the rules of evidence applicable at these hearings shall be the same as the rules of evidence applicable in contested cases in hearings

before administrative agencies as set forth in 3 V.S.A. §810.

- f. The Development Review Board shall review the information submitted for conformity to these Regulations.
- g. The Development Review Board may conduct a site visit as provided by these regulations.
- h. The Development Review Board may continue the hearings to a date certain if it deems it necessary to gather further information provided, however, that the date and place of the adjourned hearing shall be announced at the hearing.
- i. Where an applicant proposes to construct improvements that the town will acquire ownership over, or where the applicant proposes to connect to town owned infrastructure, the DRB may require that the Applicant submit its plans to an engineer representing the town for an independent review of the improvement to be acquired or the impact of the connection on town infrastructure. The cost of the review shall be in addition to the application fee and shall be borne by the Applicant. Before the Town engages the services of a person or firm to conduct a specific independent technical review, the Zoning Administrator shall provide an applicant with notice of the same and an opportunity to be heard on any proposed review.
- j. After submittal of all evidence and testimony, the Development Review Board shall close the hearing.

- 3. **Decisions.** The Development Review Board shall issue a written decision, which shall include findings of fact, any conditions, and provisions for appeal within 45 days after completing the hearing and shall within that period send the applicant or appellant, by certified mail, a copy of the decision. Copies of the decision shall also be mailed to every interested person who appeared and was heard at the hearing. A copy of the decision shall be filed with the Z.A. and the Town Clerk who shall record the decision as a public record. If the Development Review Board fails to decide within 45 days, on the 46th day the Development Review Board shall be deemed to have rendered a decision in favor of the applicant or permittee in the case of an appeal.

SECTION 350: CONDITIONAL USES (SECTIONS 350-358)

SECTION 351: GENERAL DESCRIPTION

The Z.A. shall not issue a Zoning Permit for any use or structure that requires conditional use approval or for the expansion or enlargement or a significant change in use of an existing conditional use until the Development Review Board grants such approval. Uses requiring conditional use approval are listed Article II in the sub-sections governing each zoning district. The Development Review Board shall make findings on general and specific standards, hold hearings and attach conditions, if any, as provided for in 24 V.S.A. § 4414(3) and all applicable sections of these Regulations. Per Section 4413 of the Act, in any district certain uses may be permitted only by approval of the Development Review Board, if the Development Review Board, after public notice and public hearing, determines that the proposed use will conform to general and specific standards contained in these Regulations.

SECTION 352: EXISTING CONDITIONAL USES

If a use which existed prior to the effective date of these regulations and which is listed as a conditional use in the district in which that use is located: (1) is proposed to be changed to a different conditional use; (2) the area of the parcel that use occupies is proposed to be increased or decreased; or (3) the footprint or volume of a structure within which that use is located is proposed to be altered, the proposal will be subject to conditional use review and will be required to comply with all applicable conditional use criteria.

SECTION 353: APPLICATION FOR CONDITIONAL USE APPROVAL

The applicant shall submit to the Z.A., by filing an application in the Town Clerk's office, at least 25 days prior to the regular meeting of the Development Review Board, one electronic (PDF) version of the application and supporting documents and one (1) paper copy of an application or letter summarizing the proposed conditional use, which addresses all elements of this article, and all other information necessary to illustrate compliance with these Regulations and for the Development Review Board to make its decision including:

1. Property identification numbers of the property taken from the latest tax records; name and address of the owner of record and the owners of adjoining lands; name and address of person or firm preparing the map; scale of map of at least 1" = 200', north point, and date.
2. An accurate map of the property showing existing features, including contours, structures, large trees, streets, utility easements, rights-of-way, land use and deed restrictions.
3. Map, showing proposed structure locations and land use areas, streets, driveways, traffic circulation, parking and loading spaces and pedestrian walks, landscaping plans, including site grading, landscape design, and screening, including depicting distances from structures to property lines.
4. a narrative description of the project
5. Construction sequence and time schedule for completion of each phase for buildings, parking spaces, and landscaped areas of the entire development.
6. A description of energy utilization and conservation measures for each heated structure.
7. A description of the hours of operation.
8. A description of signs, lighting and steps taken to mitigate against noise created by the proposed use.
9. Other information necessary as evidence to satisfy either the general or specific review criteria contained in Section 355 below as requested by the Development Review Board.

Applications within the Downtown Review District shall also contain the following information:

1. photos and elevations of the existing building.
2. architectural elevations (all sides of the building), drawn to scale, of existing and proposed structures, including door and window types and other exterior details; and
3. description of exterior materials and finishes photographs and drawings of existing buildings on adjacent or nearby properties to illustrate the existing streetscape.

SECTION 354: PUBLIC NOTICE AND REVIEW PROCEDURE

The Development Review Board shall give public notice of hearing as specified in SECTION 340(1)(a) of these Regulations. The Development Review Board shall review this application pursuant to the review procedure established in SECTION 340(2) of these Regulations and pursuant to any rules of procedure it adopts.

SECTION 355: GENERAL CRITERIA FOR REVIEW

When determining the appropriateness of a proposed conditional use, the Development Review Board shall determine that the development or use will not result in an undue adverse impact on any of the following:

1. Capacity of Community Facilities. A conditional use shall not overburden or exhaust existing or planned municipal facilities or services.

2. Character of the Area. A conditional use may not, by its nature, scale, or conduct, cause an undue adverse change to the character of the area, as the area would exist if fully developed in accordance with the Town Plan. To that end, the conditional use shall meet the dimensional setback requirements for the district, the sign standards indicated in Article VII, and any other performance standards specified in these Regulations.
3. Traffic Impacts The estimated traffic generated by a conditional use shall not exhaust or exceed the capacity of the road to accept increased traffic unless the applicant agrees to a condition requiring the applicant to upgrade the road.
4. Compliance with Regulations. A conditional use must comply with Regulations in effect at the time of submission of the application.
5. Renewable Energy Resources. A conditional use shall not excessively inhibit or restrict access to or the use of renewable natural resources (including, but not necessarily limited to, water and sunlight) for energy generation.

SECTION 356: SITE SPECIFIC CRITERIA FOR REVIEW

In addition to any conditions stemming from its review of the general criteria listed in SECTION 355, the Development Review Board may make such additional requirements as it deems necessary with respect to the specific standards regarding site plan review and Articles IV-VIII of these Regulations or as it deems reasonable and necessary to implement the purpose of the Act and these Regulations.

1. Applicant shall demonstrate that the circulation between the site and the street network is adequate to accommodate the traffic proposed. Parking and loading facilities should conform to the standards contained in Article VII, SECTIONs 710-720 of these Regulations. parking shall be located to the rear or interior side (side not fronting on a public road) of buildings, unless otherwise permitted by the Development Review Board due to site conditions which would prevent the reasonable use of the property if this standard were strictly enforced. Large, uninterrupted expanses of parking shall be avoided.
2. Safe pedestrian connections to on-site parking areas, and to existing or planned pedestrian facilities located on adjacent properties and/or along public roads, shall be provided. Access points at property edges shall be coordinated with existing and planned development to provide pedestrian connections between uses.
3. Applicant shall demonstrate that they have incorporated landscaping features (trees, shrubs, fences, walls, gardens, open space or other features) into a design to reduce any impacts their use of the property might have on neighboring properties and that will enhance the appeal of the use proposed. Parcels shall incorporate street trees along the highway frontage to establish a canopy and provide traffic calming.
4. The outdoor storage of trash shall be screened or hidden from public view.
5. Building design. The applicant should demonstrate how the structure they are proposing fits within and adds to the character of the area in which it is proposed. New construction should be compatible in design, scale, mass and height with the significant buildings within the immediate area.
6. For lots located within the Village Planning Area, buildings and associated site design, shall reinforce, rather than destabilize, a defined streetscape. Buildings should be oriented to front upon the road. However, where the placement of a building along the front setback is not practical due to preexisting site conditions, the site plan should incorporate landscaping features, such as low walls and planting materials, along the setback line to create a transition between the public right-of-way and the site. Applicants should demonstrate that they incorporated reasonable energy conservation measures for commercial structures into the structures proposed.
7. Applicant shall demonstrate that they comply with all stormwater requirements of the State of Vermont and have adequately addressed drainage on the site so as not to create ponding on or off

the site and that they have not rerouted the flow of storm or surface water so as to cause ponding or flooding problems for neighboring properties.

8. Exterior lighting should conform to the standards contained in SECTION 752 of these Regulations.
9. Noise should be regulated in accordance with SECTION 751 of these Regulations.
10. Signs should conform to the standards contained in SECTIONS 740-748 of these Regulations.
11. Hours of operation should conform to the standards contain in SECTION 754 of these Regulations.
12. Within Bristol's overlay districts, the Development Review Board may also require the applicant to demonstrate compliance with additional criteria applied within that overlay district as described in SECTION 395.

SECTION 357: DECISION

Upon the close of the hearing, the Development Review Board shall issue its decision, and any conditions included therein, pursuant to the procedure outlined in SECTION 340(3) of these Regulations.

SECTION 358: PERFORMANCE BONDS

The Development Review Board may require the applicant to furnish the Town with a performance bond worth up to the value of the cost of the work/improvement to benefit the municipality. The bond shall assure the proper development of the improvements benefiting the municipality according to the conditions specified by the Development Review Board and restrictions set forth in these Regulations. The Development Review Board may determine the amount of the bond or certified check based upon the recommendations of a professional architect/engineer hired by the Town at the expense of the applicant pursuant to 24 V.S.A. § 4440(d).

SECTION 360: APPEALS TO THE DEVELOPMENT REVIEW BOARD (SECTIONS 360 – 365)

Appeals of any decision of the Z.A. shall be made to the Development Review Board. The Development Review Board shall conduct hearings on appeals pursuant to the authority derived from and the procedures contained in 24 V.S.A. §§ 4465, 4466, 4468, 4469 and 4470.

SECTION 361: DEADLINE FOR APPEAL

An appeal taken with respect to an act or decision of the Z.A. must be filed within 15 days of such act or decision.

SECTION 362: INTERESTED PERSONS

Only an "interested person" as defined in SECTION 1000 of these Regulations and by 24 V.S.A. §4465(b) may appeal the decision or action of the Z.A. under these Regulations.

SECTION 363: NOTICE OF APPEAL

The appellant shall file one signed electronic version (PDF) and one written notice of appeal in the Town Clerk's office with the Secretary or Chair of the Development Review Board or with the Town Clerk if no such Secretary or Chair has been elected. The following information shall be included as part of the submittal:

1. Name and address of the appellant.

2. Names and addresses of the applicant, co-applicant or any person party to the original application.
3. A brief description of the property from which the appeal is taken.
4. A reference to the regulatory provisions applicable to that appeal.
5. The relief requested.
6. The grounds as to why the relief requested is proper under the circumstances.

SECTION 364: PUBLIC NOTICE AND REVIEW PROCEDURE

Public notice of hearing shall be given as required by SECTION 340(1)(a) of these Regulations. The Development Review Board shall review all appeals pursuant to the procedure established in SECTION 340(2) of these Regulations.

SECTION 365: DECISIONS

Upon the close of the hearing, the Development Review Board shall issue its decision pursuant to the procedure outlined in SECTION 340(3) of these Regulations.

SECTION 370: VARIANCES (SECTIONS 370-375)

Requests for variances shall be made to the Development Review Board pursuant to the procedure outlined below.

SECTION 371: APPLICATION

The applicant shall submit to the Z.A., by filing an application in the Town Clerk's office at least 25 days prior to the meeting of the Development Review Board, one (1) electronic (PDF) and one (1) paper copy of an application or letter summarizing the proposed variance which addresses all elements of this article, and all other information necessary to illustrate compliance with these Regulations and for the Development Review Board to make its decision, including property identification numbers of the property taken from the latest tax records; Name and address of the owner of record and those of adjoining lands; Name and address of person or firm preparing the map; Scale of Map, north point and date.

In addition to the information noted above, the Development Review Board may require the following:

1. An accurate map of the property showing existing features, including contours, structures, large trees, streets, utility easements, rights of way, land use and deed restrictions.
2. A scaled map, showing proposed structure locations and land use areas; streets, driveways, traffic circulation, parking and loading spaces and pedestrian walks; landscaping plans, including site grading, landscape design and screening.
3. Construction sequence and time schedule for completion of each phase for buildings, parking spaces and landscaped areas of the entire development.
4. A description of energy utilization and conservation measures for each heated structure.
5. Other information pertinent to the issue before the Development Review Board.

SECTION 372: PUBLIC NOTICE AND REVIEW PROCEDURE

Public notice of hearing shall be given as required by SECTION 340(1)(a) of these Regulations. The Development Review Board shall review this application pursuant to the review procedure established in SECTION 340(2) of these Regulations and pursuant to any rules of procedure it adopts.

SECTION 373: REVIEW CRITERIA

The Development Review Board shall review all variance requests to determine if they meet all the following standards:

1. There are unique physical circumstances or conditions, including irregularity, narrowness, or shallowness of the lot or topography or other physical conditions on the property and that the hardship is due to these conditions and not the circumstances or provisions of the bylaw in the district in which the property is located;
2. Because of these conditions or circumstances, there is no possibility that the property can be developed in strict conformity with the bylaws and that therefore a variance is necessary to enable the reasonable use of the property.
3. Unnecessary hardship has not been created by the applicant.
4. The variance, if authorized, will not alter the essential character of the neighborhood or district in which the property is located; substantially or permanently impair the appropriate use or development of adjacent property; reduce access to renewable resources or be detrimental to the public welfare;
5. The variance will represent the minimum variance that will afford relief and will represent the least deviation possible from the Town Plan and these Regulations.

Please see 24 V.S.A. § 4469 for more information or for matters dealing with variances relating to renewable energy resource structures.

SECTION 374: DECISION

The Development Review Board shall make its decision on the request for variance by applying the facts presented in the application and at the hearing to the criteria, listed above, and incorporating all into its decision. Upon the close of the hearing, the Development Review Board shall issue its decision pursuant to the procedure outlined in SECTION 340(3) of these Regulations.

SECTION 375: CONDITIONS

In approving a project, the Development Review Board shall act to ensure, and may impose conditions requiring, that the variance, if authorized, will represent the minimum variance that will afford relief and will represent the least deviation possible from these Regulations and from the Town Plan. The nature of any variance and any conditions attached to it shall be entered on the face of the Zoning Permit, incorporated therein and shall be enforceable in the same manner as all other applicable requirements of these Regulations.

SECTION 380: WAIVERS (SECTIONS 380-385)

As an alternative to the variance procedures noted above, applicants may apply for site waivers of dimensional requirements pursuant to the criteria below.

SECTION 381: APPLICATION

The applicant shall submit the information required to the Z.A. by filing one (1) electronic (PDF) and one (1) paper copy of a letter summarizing the proposed waiver which addresses all elements of this article, and all other information necessary to illustrate compliance with these Regulations, at the Town Clerk's office, at least 25 days prior to the meeting of the Development Review Board. Information will include that which is necessary for the Development Review Board to make its decision, including property identification numbers of the property taken from

the latest tax records; name and address of the owner of record and those of adjoining lands; name and address of person or firm preparing the map; scale of map, north point and date. In addition to the information noted above, the Development Review Board may require the following:

1. An accurate map of the property showing existing features, including contours, structures, large trees, streets, utility easements, rights of way, land use and deed restrictions.
2. A scaled plan, showing proposed structure locations and land use areas; streets, driveways, traffic circulation, parking and loading spaces and pedestrian walks; landscaping plans, including site grading, landscape design and screening.
3. Construction sequence and time schedule for completion of each phase for buildings, parking spaces and landscaped areas of the entire development.
4. A description of energy utilization and conservation measures for each heated structure.
5. Other information pertinent to the issue before the Development Review Board.

SECTION 382: PUBLIC NOTICE AND REVIEW PROCEDURE

Public notice of hearing shall be given as required by SECTION 340(1)(b) of these Regulations. The Development Review Board shall review this application pursuant to the review procedure established in SECTION 340(2) of these Regulations and pursuant to any rules of procedure it adopts.

SECTION 383: REVIEW CRITERIA

The Development Review Board may grant waivers to reduce dimensional requirements, if the applicant can satisfy the following standards:

1. The waiver requested is for a use permitted within the district in question as by right use (as opposed to a conditional use).
2. The waiver requested is in conformance with the Town Plan and the goals set forth in SECTION 4302 of the Act.
3. The waiver requested is designed to conform to the character of the land use area in which it lies as defined in the Plan and further designed to reasonably limit impact or the potential for impact upon one's neighbors.
4. The design used incorporates design techniques (restricted height, lack of windows) screening (fencing or plantings) or other remedies to reasonably limit impact or the potential for impact upon one's neighbors.
5. The waiver requested accommodates structures providing for disability accessibility, fire safety and other requirements of land or energy conservation or renewable energy structures.

SECTION 384: DECISION

The Development Review Board shall make its decision on the request for waiver by applying the facts presented in the application and at the hearing to the criteria, listed above, and incorporating all into its decision. Upon the close of the hearing, the Development Review Board shall issue its decision pursuant to the procedure outlined in SECTION 340(3) of these Regulations.

SECTION 385: CONDITIONS

In approving a project seeking a waiver the Development Review Board shall act to ensure, and may impose conditions requiring, that the waiver, if authorized, will represent a minimum waiver that will afford relief and will represent a minimum deviation from these Regulations and from

the Town Plan. The nature of any waiver and any conditions attached to it shall be entered on the face of the Zoning Permit, incorporated therein and shall be enforceable in the same manner as all other applicable requirements of these Regulations.

SECTION 390: SITE PLAN REVIEW, DOWNTOWN DESIGN REVIEW AND OTHER APPLICATIONS (SECTIONS 390 – 396)

SECTION 391: GENERAL DESCRIPTION

Any Site Plan review, or other applications or uses that require approval of the Development Review Board but are not specifically listed in SECTIONS 332 or 333 of these Regulations shall be reviewed under the procedure immediately below.

Site Plan approval by the Development Review Board shall be required for proposed uses allowed “by right” within any given zoning district, that are identified by an asterisk within the District Use standards in Article II, SECTION 230 of these Regulations. Unlike Conditional Use approval, Site Plan approval assumes that the use proposed is appropriate for the district in which it is located. As such, Site Plan review focuses solely on proper development within the site, not its compatibility or lack thereof with the surrounding area. Site Plan review cannot be used to deny a project in the same way that conditional use criteria would. However, the Development Review Board may place conditions on any approval it gives to implement the objectives of the Town Plan as contemplated in the criteria below.

The Development Review Board shall apply the site-specific criteria in Section 356 as its Site Plan review criteria and may impose appropriate conditions within any permit it chooses to grant under those reviews.

Other reviews shall be conducted by the Development Review Board pursuant to the criteria below.

SECTION 392: APPLICATIONS

The owner shall submit one (1) set of plan maps and supporting data to the Development Review Board, by delivering the application to the Z.A. or filing the application at the Town Clerk’s office. The application shall include the application requirements from SECTION 353 of these Regulations that specifically relate to the Site Plan Review criteria.

SECTION 393: PUBLIC NOTICE AND REVIEW

Public notice of hearing shall be given as specified in SECTION 340(1)(b) of these Regulations if conducted independently or under SECTION 340(1)(a) if conducted as a portion of a Conditional Use Review. The Development Review Board shall review this application pursuant to the review procedure established in SECTION 340(2) of these Regulations and pursuant to any rules of procedure it adopts.

SECTION 394: SITE PLAN REVIEW CRITERIA

The Development Review Board may impose appropriate conditions and safeguards only with respect to the adequacy of traffic access, circulation and parking for vehicles and pedestrians, landscaping and screening, exterior lighting, signs, hours of operation, design criteria for the

exterior of the building proposed and protecting the utilization of renewable energy resources as specified in the criteria contained in SECTION 356 of these regulations.

For other types of review, the Development Review Board may include other criteria specifically enabled within these Regulations.

SECTION 395: ADDITIONAL SITE APPROVAL CRITERIA IN OVERLAY DISTRICTS

Bristol has created two overlay districts: The Downtown Design Review Overlay District and the Flood Hazard Overlay Area. The overlay districts impose additional site design standards on applicable projects within those districts. The Development Review Board shall add the design review criteria from the Flood Hazard Overlay District contained in Article VIII of these Regulations as additional criteria for review and conditions of its decisions for projects within that overlay area.

Within the Downtown Design Review Overlay District also described in Article II, Section 230, the DDRC shall review all applicable projects pursuant to the design review criteria from the Downtown Design Review Overlay district. The DDRC shall make recommendations to the Z.A. or Development Review Board, responsible for permitting the applicant. The Z.A. shall incorporate the recommendations of the DDRC into any permit they issue. The Development Review Board shall review the recommendations of the DDRC and may incorporate those recommendations it deem appropriate into its decision.

SECTION 396: DECISIONS

Upon the close of the hearing, the Development Review Board shall issue its decision or pursuant to the procedure outlined in SECTION 340(3) of these Regulations. In approving a project with conditions, the Development Review Board may require specific modifications to the design, scale, layout and/or design or configuration of the project.

SECTION 399: APPEALS TO THE ENVIRONMENTAL COURT

An “interested person” who has participated in a proceeding before the Development Review Board may appeal a decision rendered in that proceeding to the Environmental Court. Participation in a local regulatory proceeding shall consist of offering, through oral or written testimony, evidence or a statement of concern related to the subject of the proceeding. An appeal from a decision of the Development Review Board shall be taken in such a manner as the Supreme Court may by rule provide for appeals from State agencies governed by 3 V.S.A. §§ 801 - 816. Notice of the appeal shall be filed by certified mailing, with fees, to the Environmental Court and by mailing a copy to the municipal clerk or the administrative officer, if so designated, who shall supply a list of interested persons to the appellant within five working days. Upon receipt of the list of interested persons, the appellant shall, by certified mail, provide a copy of the notice of appeal to every interested person, and, if any one or more of those persons are not then parties to the appeal, upon motion they shall be granted leave by the court to intervene.

ARTICLE IV: REQUIRED REGULATIONS

SECTION 400: REQUIRED REGULATIONS

The uses permitted within each district as noted in Article II shall also be subject to such additions, modifications, or exceptions as provided by the following Regulations.

SECTION 401: PROMOTE AND PROTECT AFFORDABLE HOUSING

Except as provided in 24 V.S.A. § 4414(1)(E) and (F), nothing in these Regulations will treat mobile homes, modular housing or other forms of prefabricated housing differently from any other single-family dwelling type. Nothing in these Regulations will be construed to prevent the establishment of mobile home parks pursuant to 10 V.S.A. Chapter 153. Nothing in these Regulations will have the effect of excluding affordable housing to meet the needs of the low- and moderate-income citizens as determined by studies described in 24 V.S.A. § 4382(c).

SECTION 402: MOBILE, MANUFACTURED OR PREFABRICATED HOMES

Mobile, manufactured or prefabricated homes shall be considered the same as conventional homes except in a mobile home park.

SECTION 403: MOBILE HOME PARKS

Mobile homes are permitted in approved mobile home parks subject to the requirements of this section and State law. Existing Mobile Home Parks shall be considered pre-existing non-conforming uses unless they specifically comply with all provisions of these Regulations. Nothing in these Regulations shall prohibit the replacement or improvement of homes on lots in existing parks. New Mobile Home Parks shall be allowed under the PUD provisions of these Regulations on the same terms and conditions as Bristol may allow any other type of housing in a specific area as governed by these Regulations.

SECTION 404: ACCESSORY DWELLING UNIT

An accessory dwelling unit that is located within or appurtenant to an owner-occupied one-family dwelling shall be a permitted use. An accessory dwelling unit shall be defined as an efficiency or one-bedroom apartment, located within or appurtenant to an owner-occupied single-family dwelling, that is clearly subordinate to a one-family dwelling, and has facilities and provisions for independent living, including sleeping, food preparation, and sanitation, provided there is compliance with all the following:

1. The owner occupies either the primary dwelling or accessory dwelling.
2. The property has sufficient wastewater capacity.
3. The accessory unit does not exceed the greater of 30 percent of the total habitable floor area of the single-family dwelling or 1,000 sq. ft.
4. Applicable setback, coverage, and parking requirements specified in these Regulations are met.

Any accessory dwelling unit, new or existing, that meets the above conditions is a permitted use in all districts.

SECTION 405: EXISTING SMALL LOTS

Any lot in individual and separate and non-affiliated ownership from surrounding properties in existence on November 30, 1983 may be developed for the purposes permitted in the district in which it is located, even though not conforming to minimum lot size requirements, if such lot is not less than one-eighth acre in area with a minimum width or depth dimension of forty feet.

Any pre-existing small lots that were or came into contiguous ownership as of May 27, 1998 or thereafter and were deemed automatically merged, may be re-subdivided along the pre-existing lines. Applicants shall demonstrate that they possessed legally created, separate lots prior to the automatic merger. The Development Review Board shall evaluate the material presented by the applicant applying the procedures and criteria contained in SECTIONS 390-396 of these Regulations applicable to "Other Permits".

SECTION 406: RESIDENTIAL CARE HOME OR GROUP HOME

A residential care home or group home to be operated under state licensing or registration, serving not more than 8 persons who have a disability as defined in 9 V.S.A. 4501 shall be considered by right to constitute a permitted single family residential use of property, except that no such home shall be so considered if it is located within a thousand feet of another existing or permitted such home.

SECTION 407: REQUIRED FRONTAGE OR RIGHT OF WAY

No land development may be permitted on lots which do not have either frontage on a public road or, access to such a road by a permanent easement or right-of-way at least 35 feet in width for permitted uses and 50 feet in width for conditional uses. Any proposed right of way must be approved by the Development Review Board. See SECTION 720 of these Regulations governing access for additional access requirements.

SECTION 408: PROTECTION OF HOME OCCUPATIONS (See also SECTION 606 Regarding Home Business).

Home occupations are permitted, by right, in all districts in which single-family residences are allowed. No regulation herein is intended to infringe upon the right of any resident to use a minor portion of a dwelling for an occupation which is customary in residential or rural areas and which does not have an undue adverse impact on the character of the residential area. A Zoning Permit application shall be submitted to the Z.A. so that the ZA can determine whether the proposed use is, in fact, a home occupation as defined by these Regulations.

The Z.A. shall use the following criteria to determine whether a proposed use is a home occupation:

1. The business shall be operated by a resident in the principal building.
2. The business shall be operated wholly within the principal building and no goods, materials, or products shall be publicly displayed on the premises.
3. Not more than two persons other than the residents shall be employed or conduct business from the premises.
4. There shall be no exterior storage of materials, and no other exterior indication of the home occupation, except signs are permitted as specified in ARTICLE VII.
5. The use shall satisfy the parking and access requirements contained in SECTIONS 710-

720 of these Regulations.

6. The use shall not violate the Performance Standards contained in SECTION 750 and 751 of these Regulations governing odors, fumes, or noises; and
7. Retail operations are allowed as a portion of the Home Occupation but should be secondary to the Home Occupation's primary function.

SECTION 409: CHILDCARE HOME

Various types of "family childcare homes or facilities" are defined in SECTION 1000 of these Regulations. As per the definition, family childcare homes serving 6 or fewer children shall be considered to constitute a permitted single-family residential use and shall be allowed in all districts on the same basis as a single-family residential use. A family childcare home serving no more than six full-time children and four part-time children, as defined in 33 V.S.A. § 4902(3)(A), shall be considered to constitute a permitted use of property but will require site plan approval. A family childcare facility serving more than six full-time and four part-time children shall be reviewed pursuant to the uses allowed in the district in which it is located.

SECTION 410: HEIGHT OF CERTAIN STRUCTURES

No structure shall exceed the maximum district height requirements except for specified exempt structures listed below or those as allowed hereunder:

1. Farm structures, including silos and barns, in accordance with SECTION 301, Exemptions.
2. Spires, bell towers, belfries and church steeples.
3. Water towers and other industrial uses in the Commercial zone as specified in SECTION of these Regulations.
4. Utility structures regulated by the Vermont Public Service Board pursuant to Title 30 V.S.A. §248.
5. Utilities not regulated by the Vermont Public Service Board, including wind generation towers and equipment reviewed under SECTION 607.
6. Telecommunication Facilities reviewed under SECTION 608
7. The following accessory uses provided they do not exceed the district maximum height by more than 10 feet:
 - a. HAMM radio antennas.
 - b. Flag poles; and
 - c. Chimneys and weathervanes.

SECTION 411: NON-CONFORMITIES

A non-conformity includes non-conforming uses, structures, lots or parcels. Definitions of each of these types of "non-conformities" are contained within the "Definitions" in Article X, SECTION 1000 of these Regulations. The following provisions shall apply to all buildings and uses existing on the effective date of these Regulations which do not conform to the requirements set forth in these Regulations and to all buildings and uses that in the future do not conform by reason of any subsequent amendment to these Regulations. The intent of this section is not to discontinue all non-conformities. Accordingly, it grants the Development Review Board authority to continue non-conforming uses where it deems that continuation appropriate and meeting these Regulations after a public hearing.

Any non-conforming use of structures or land except those specified below, may be continued indefinitely, but:

1. Shall not be moved, enlarged, altered, extended, reconstructed or restored (except as provided below), nor shall any external evidence of such use be increased by any means whatsoever, without approval by the Development Review Board, and then only after a public hearing carried out pursuant to the provisions governing a conditional use review in SECTIONS 350-358 in a manner, which, in the opinion of the Development Review Board does not enlarge the nature of the non-conformance.
2. Shall not be changed to another non-conforming use without approval by the Development Review Board, and then only after a public hearing carried out pursuant to the provisions governing a conditional use review in SECTIONS 350-358 and only to a use, which, in the opinion of the Development Review Board is of the same or of a more restricted nature.
3. Shall not be re-established if such use has discontinued for a period of two years or has been changed to, or replaced by, a conforming use without approval by the Development Review Board, unless after a public hearing carried out pursuant to the provisions governing a conditional use review in SECTIONS 350-358 it changes to a use, which, in the opinion of the Board, is of the same or of a more restricted nature. Intent to resume a non-conforming use shall not confer the right to do so.
4. Shall not be restored for other than a conforming use after damage from any cause unless the non-conforming use is reinstated by the completion of construction and restoration of such building within two years; otherwise, the non-conforming use of such building shall be deemed to have been discontinued, unless such non-conforming use is carried on uninterrupted in the damaged part of the building.
5. Nothing in this section shall be deemed to prevent normal maintenance and repair of a non-conforming building provided that such action does not increase the degree of non-conformance.

SECTION 412: SPECIAL PUBLIC USE EXCEPTIONS

Pursuant to 24 V.S.A. § 4413, Bristol shall regulate the following uses only with respect to location, size, height, building bulk, yards, courts, setbacks, density of buildings, off-street parking, loading facilities, traffic, noise, lighting, landscaping or screening requirements and only to the extent that these Regulations do not have the effect of interfering with the intended functional use:

1. State or community owned and operated institutions and facilities.
2. Public and private schools and other educational institutions certified by the Vermont Department of Education.
3. Churches, and other places of worship, convents and parish houses.
4. Public and private hospitals.
5. Regional Solid Waste Management Facilities certified under 10 V.S.A. Chapter 159.
6. Hazardous Waste Management Facilities for which a notice of intent to construct has been received under SECTION 6606(a) of Title 10.

Except for state owned and operated institutions and facilities, each of the structures and uses listed above shall comply with the National Flood Insurance Program and comply with the applicable provisions of Article VIII of these Regulations governing development in the Flood Hazard Area, which Regulations shall not have the effect of interfering with the intended

functional use. It is the intent of these Regulations to regulate these facilities to the maximum extent allowable under law. The uses noted above shall be subject to review by the Development Review Board pursuant to the applicable procedure and criteria governing Site Plan Review under Article III of these Regulations and any other portion of these Regulations that pertain to aspects of the project that may be regulated.

ARTICLE V: GENERAL REGULATIONS

SECTION 501: INTERIOR LOTS

Lots with no frontage on public roads or waters are allowed as interior lots in all districts provided that they are served by a right of way previously approved by the Development Review Board meeting the dimensions contained in SECTION 407 and other access requirements contained in SECTION 720 or any access permit required.

The Zoning Administrator will determine whether interior lots served by a private right-of-way (ROW) satisfies the frontage requirements contained within each Zoning District by measuring the lot line closest to and parallel to the closest public road, or by measuring the lot line parallel with and closest to the ROW as the “frontage” required by the district Regulations. For a lot at the end of the ROW, the ROW need not extend up the entire lot in order to satisfy the frontage requirement.

SECTION 502: LOTS IN TWO ZONING DISTRICTS

Where a district boundary line divides a lot of record at the time such line is adopted, the Regulations for the less restricted part of such lot shall extend not more than thirty feet into the more restricted part.

SECTION 503: BUILDING ON LOTS

There shall be no more than one residential principal building on a lot except for Planned Unit Developments, as authorized by SECTION 4417 of the Act and SECTION 609 of these Regulations. The minimum lot area requirements of a district shall respectively and separately apply to and be required for each principal building on a lot.

SECTION 504: CONSTRUCTION APPROVED PRIOR TO ADOPTION OF OR AMENDMENT TO REGULATIONS

No permit shall be required for any structure upon which construction had begun prior to the adoption of these Regulations, provided such construction is completed within one year from the date of such adoption. The Town shall not require any change in the plans for, or construction of, a structure or use for which a zoning permit has been issued and which has subsequently been made non-complying or non-conforming by an amendment to these Regulations if the activities authorized by the zoning permit are completed while the permit is valid.

SECTION 505: ABANDONMENT OF STRUCTURES

Within one year after work on an excavation for a structure has begun or within one year after a permanent or temporary structure has been destroyed, demolished or abandoned, all structural materials shall be removed from the site, and the excavation thus remaining shall be covered over or filled to the normal grade and, to prevent erosion and improve aesthetics, the owner shall establish permanent vegetative cover.

SECTION 506: TEMPORARY USES AND STRUCTURES

Temporary permits may be issued by the Zoning Administrator for the period not exceeding one year after approval by the Development Review Board for non-conforming uses incidental to construction projects, provided such permits are conditional upon agreement by the owner to

remove the structure or use upon expiration of the permit. Such permits may be renewed upon application for an additional period not exceeding one year.

SECTION 507: DWELLING UNITS BELOW GRADE

The finished floor level of all habitable rooms in every two-family and multiple-family dwelling unit shall be not more than four feet below finished grade level measured at a point ten feet outside and at right angles to each window lighting each habitable room.

SECTION 508: FILLING OF LAND

In any district a zoning permit is required for the depositing of rock, concrete, stone, gravel, sand, cinders, stumps, and soil used for the filling of land. The Zoning Administrator may issue a permit provided the applicant demonstrates the activity will not significantly alter existing drainage patterns, cause soil erosion, or result in any hazard or expense to the community. State laws governing the filling of land must be adhered to.

SECTION 509: REDUCTION OF LOT AREA

No lot shall be so reduced in area that the area, yards, frontage, coverage, or other requirements of these Regulations do not conform to the requirements herein prescribed for each district. The provisions of this section shall not apply when part of a lot is taken for a public purpose.

SECTION 510: REQUIRED AREA OR YARDS

Space required under these Regulations to satisfy area, yard or other open space requirements in relation to one building shall not be counted as part of a required open space for any other building.

SECTION 511: PROJECTION IN YARDS

Every part of a required yard shall be open from grade level to the sky unobstructed, except for vegetation and for the ordinary projections of sills, cornices, pilasters, chimneys and eaves, provided that no such projections may extend more than two feet into any required yard. Additionally, certain architectural features needed for the operation of active and passive solar energy systems, including but not limited to overhangs, detached solar collectors, reflectors, and piping may be permitted by the Development Review Board to project into the required yard if conformance with yard requirements will cause undue or unusual difficulties. Steps may be extended into a yard.

SECTION 512: CORNER LOT EXCEPTIONS

Any yard adjoining a road shall be considered a front yard. For the purposes of these Regulations, a corner lot shall be considered to have only front yards and side yards.

SECTION 513: WATERSIDE PROTECTION

Notwithstanding the provisions of Article VIII, Flood Hazard Area Regulations, or any other Regulations herein, any new structure, enlargement of an existing structure or extraction operations bordering on perennial streams shall be set back at least 50 feet from the top of bank of said stream. This requirement does not apply to a body of water that is surrounded by land belonging to a single owner. Nor does it apply to Bristol Pond, which is subject to the State of Vermont Shoreland Protection Regulations, the Bristol Pond Camp District, which has its own setbacks or to bridges, culverts, utilities, hydrogenation facilities or other structures that must

cross or operate in streams to function. All structures crossing or operating within streams are subject to State permits, including, but not limited to Stream Alteration Permits. Additionally, all owners should also be aware they may need to secure state permits before removing trees or other vegetation within a river or stream corridor.

SECTION 514: GRADING

No grading, cutting, or filling shall be carried out in any district which leaves the slope of the finished grade in excess of one to two.

ARTICLE VI: CONDITIONS ATTACHING TO SPECIFIC USES

Certain uses have the potential for greater impact on surrounding properties than others. These Regulations require that the specific uses listed within this section meet the following additional requirements governing their application procedure, operations, use or closure.

SECTION 601: FACILITIES REQUIRING THE STORAGE OF FLAMMABLE LIQUIDS

The storage of any highly flammable liquid in tanks above ground with unit capacity greater than five hundred and fifty gallons shall be prohibited, unless such tanks up to and including ten-thousand-gallon capacity are placed not less than eighty feet from all property lines, and unless all such tanks of more than ten-thousand-gallon capacity are placed not less than two hundred feet from all property lines.

All tanks having a capacity greater than five hundred and fifty gallons shall be properly retained with dikes having a capacity not less than one and one-half times the capacity of the tanks surrounded.

SECTION 602: VEHICLE SERVICE STATION AND SERVICE STATION CONVENIENCE STORES

In any district where Vehicle Service Stations or Service Station Convenience Stores are allowed as a conditional use, they must also comply with the following:

1. A motor vehicle service facility lot shall not be located within three hundred feet of the boundary of any lot occupied by a school, hospital, library, or religious institution.
2. Lot size shall be at least one acre.
3. Lot frontage shall be at least 200 feet.
4. Lot depth shall be at least 150 feet.
5. Pumps, lubricating and service devices shall be located at least 75 feet from the road centerline and 50 feet from the side and rear lot lines.
6. All fuel and oil shall be stored at least thirty-five feet from any property line.
7. All automobile parts and dismantled vehicles are to be stored within a building, unless the Development Review Board determines that they are adequately screened from public view.
8. No signs shall extend beyond the pumps, nor exceed fifteen feet in height.
9. There shall be no more than two access driveways from the road. The maximum width of each driveway shall be forty feet.
10. A suitably landscaped area shall be maintained at least five feet in depth along all road frontage not used as driveway.

SECTION 603: CAMPERS

It shall be unlawful for any person to park a camper except:

1. In an approved campground.
2. In an approved camper sales lot; or
3. The owner of a camper may park it on his own property meeting the front yard setbacks. A camper so parked shall not be used as living quarters and shall not be hooked up to any water or sewer utilities.

4. Invitees may also park campers in the same manner as required of any owner on his/her own property for a period not to exceed thirty days.

SECTION 604: CAMPGROUNDS

Campgrounds shall be considered conditional uses in all districts in which they are allowed. In addition to all other application criteria, applications for campgrounds shall be accompanied with a site plan and drawings showing the property lines and area of the campground, a contour map showing the proposed grading of the area, a layout of the roads, walkways, campsites, parking areas, garbage collection stations, electrical distribution, water lines, sanitary sewer facilities and storm sewer drainage facilities and landscaping plan.

1. A campground shall have not less than three acres.
2. A campground shall provide access driveways and parking for registered vehicles.
3. Each campsite shall have at least 2500 sq. ft. with each dimension at least 25 feet long.
4. All access driveways within a campground must include a right of way at least thirty-five (35) feet in width and have a compacted gravel surface (or other type of all-weather road) at least twenty (20) feet in width.
5. Each campsite shall have access to a water supply approved by the State Agency of Environmental Conservation.
6. Each campsite shall have provisions for public toilets and sewage disposal. The method of sewage disposal must follow State Agency of Environmental Conservation Regulations.
7. A strip of land at least twenty-five feet in width shall be maintained as a landscaped area abutting all public roads and property lines.
8. No vehicle or tent shall be located closer than twenty-five (25) feet to a property line.
9. The campground shall be closed to the public for a period of not less than thirty consecutive days each year, during which time no occupancy of campers shall be allowed.

SECTION 605: EXTRACTION OF SOIL, SAND, OR GRAVEL

The removal of sand or gravel for sale, except when incidental to construction of a structure on the same premises, is prohibited within any portion of any District lying within the Village Planning Area as specified within the Bristol Town Plan. The Village Planning Area is depicted for reference on the Town of Bristol Zoning Map by thick dashed lines. Otherwise, extraction of soil, sand or gravel is permitted as specified by Districts within Article II of these Regulations, but only after conditional use review and approval by the Development Review Board. The Zoning Administrator may issue a Zoning Permit only after having received written notification of the Development Review Board approval of the proposed project. In all districts, the following provisions shall apply:

1. Before approval of any new sand or gravel operation, or extension thereof, the Development Review Board may include a permit condition requiring a performance bond sufficient to ensure that upon completion of the extraction operations the abandoned site will be left in a safe, attractive and useful condition in the interest of public safety and general welfare. The owner shall submit a plan of proposed improvements to

accomplish this end. If the Development Review Board requires a bond, the bond shall be sufficient to cover the cost of the restoration plan.

2. The removal of material shall be conducted to result in the improvement of the land, having due regard to the contours in the vicinity such as leveling slopes and removing hills. The digging or creating of pits or steep slopes shall not be permitted unless provision is made to refill such pit.
3. The excavation sites shall be graded smooth and left in a neat condition. Cut slopes and spoil banks shall not be allowed to remain. The operation site shall be fertilized, mulched and reseeded to establish a firm cover of grass or other vegetation sufficient to prevent erosion under the supervision and to the satisfaction of the Zoning Administrator.
4. All surface drainage affected by excavation operations shall be controlled by the owner to prevent erosion debris and other loose materials from filling any drainage course, road, or private property. All provisions to control natural drainage water shall meet with the approval of the Zoning Administrator.
5. No excavation, blasting, or stockpiling of materials shall be located within two hundred feet of any road or other property line. However, the Development Review Board may reduce this setback by any amount, down to the minimum setback allowed within the zoning district in which the extraction is located, if the neighboring property owner benefited by this provision provides the applicant with a written agreement to waive all or a portion of the increased setback.
6. No power-activated sorting machinery or equipment shall be located within three hundred feet of any road or other property line, and all such machinery shall be equipped with satisfactory dust elimination devices. However, the Development Review Board may reduce this setback by any amount, down to the minimum setback allowed within the zoning district in which the extraction is located, if the neighboring property owner benefited by this provision provides the applicant with a written agreement to waive all or a portion of the increased setback.
7. All excavation slopes in excess of one to two shall be adequately fenced as determined by the Zoning Administrator.
8. Extension of an existing non-conforming operation shall not be permitted.
9. Stripping of topsoil for sale or for use on other premises, except as may be incidental to a construction project, shall be prohibited.
10. The Development Review Board may attach any additional conditions that it finds necessary to protect the safety and general welfare of the public.

SECTION 606: HOME BUSINESS (See also SECTION 408 concerning Home Occupations)

Bristol desires to provide residents with reasonable economic opportunity by encouraging local enterprises of suitable size and scale for their location. Home Businesses as a category are designed to allow Bristol residents' flexibility above the statutory floor set by home occupations, while protecting the rights of neighboring property owners from substantial undue impacts through the conditional use review process.

1. Home Businesses are subject to the following:
2. A member or members of the family residing in the principal building shall operate the business with no more than four additional, non-resident full time equivalent employees.

However, outside the Village Residential District the DRB may use its discretion to allow additional employees.

3. The business shall be operated within the principal building or an existing accessory building. The adaptive re-use of existing agricultural buildings is encouraged.
4. Any exterior storage of material shall be in keeping with the character of the residential neighborhood. The Development Review Board (DRB) may prohibit or require screening for the outdoor storage of materials.
5. A person using a dwelling for a Home Business shall meet the parking spaces required for the dwelling and meet the parking requirements in SECTIONS 710-714 of these Regulations for the type of business operated.
6. The above Regulations are intended to expand upon the minimum statutory requirements for home occupations and shall not be construed to infringe upon the right of any person to use "a minor portion of their dwelling for an occupation which is customary in residential areas and does not have an undue adverse impact on the character of the residential area" as provided in 24 V.S.A. § 4412(4).
7. Retail operations are allowed as a portion of the Home Business's but should be secondary to the Home Business's primary function.
8. Limited personal services are allowed as Home Businesses.
9. The following heavy industrial activities, and all others not meeting the conditions noted above, will not constitute Home Businesses:
 - a. Smelters or blast furnaces.
 - b. Slaughterhouses, rendering plants, hide tanning or curing plants.
 - c. Manufacture or processing of fertilizer, bone, rubber, asphalt, ammonia and/or chlorine.
 - d. Manufacture or refining of petroleum, gas, or explosives.
 - e. Bulk storage of wholesale fuel oil, butane, propane or gasoline.
 - f. Junkyards, machinery wrecking yards; and
 - g. Unenclosed manufacturing or processing of goods.

SECTION 607: SOLAR, WIND OR OTHER ENERGY SYSTEMS

1. Ground mounted solar energy systems, that are not otherwise exempt from these Regulations constitute a permitted accessory use within all districts, subject only to meeting the Dimensional Standards (Subsection C) within each zoning district. (See SECTION 301, Subsections (1) and (2) exempting certain solar projects from municipal review).
2. Wind energy conversion systems, not exempt pursuant to SECTION 301, sub-section 1 of these Regulations is Conditional Uses in all districts, with the Development Review Board considering the following criteria in addition to those specified in SECTIONS 355 and 356 of these Regulations:
 - a. Climbing access to the tower shall be restricted.
 - b. For rotors 20 feet in diameter or less, a setback from any lot line shall be 275 feet minus 11 feet for each foot of rotor diameter less than 20 feet; for rotors larger than 20 feet in diameter, a setback from any lot line shall be 275 feet plus 6 feet for each foot of rotor diameter greater than 20 feet; and
3. Other residential energy generation systems, not otherwise exempt pursuant to SECTION

301 of these Regulations constitute a permitted accessory use within all districts, subject to Site Plan Review and to meeting the Dimensional Standards (Subsection C) within each zoning district.

SECTION 608: TELECOMMUNICATION FACILITIES

SECTION 301, subsection (3) of these Regulations exempt certain telecommunications facilities subject to jurisdiction of the Public Utilities Commission from the jurisdiction of these Regulations. (See Title 30, SECTION 248a of the Vermont Statutes Annotated, 30 V.S.A. §248a). This sub-section governs all telecommunications facilities, including antennas and towers that are not exempt. Telecommunications facilities subject to these Regulations shall comply with the following conditions:

1. All telecommunications facilities in the Downtown Design Review District shall be subject to the review of the Design Review Committee administered through the Zoning Administrator as outlined in SECTION 395 of these Regulations.
2. Commercial telecommunication towers shall be allowed as conditional uses in the Commercial 1, Rural Agricultural 5 and Conservation District or restricted to the two existing sites in Bristol (i.e. the Coffin and Estey sites). Modifications to those towers shall be considered a conditional use and shall be subject to the standards of SECTIONS 350-359 of these Regulations, unless the Zoning Administrator determines that the modifications constitute “De minimis modifications” as defined in 30 V.S.A. §248a, in which case the Zoning Administrator shall review them as a permitted use.
3. A permit condition shall require that all telecommunications facilities shall be removed promptly upon abandonment in accordance with SECTION 505 herein.

SECTION 609: PLANNED UNIT DEVELOPMENTS

In accordance with the provisions set forth SECTION 4417 of the Act, the modification of the district Regulations by the Development Review Board is permitted in all districts simultaneously with approval of a Subdivision plan under the following procedures:

1. Purpose: The purpose of the planned unit development (PUD) provisions is to encourage flexibility of design and development of land in such a manner as to promote the most appropriate use of land, to facilitate the adequate and economic provision of streets and utilities, to preserve the natural and scenic qualities of open land, to provide for a mixture and variety of housing types at different densities, to promote cluster development and to provide for the development of existing lots which because of physical, topographic or geological conditions could not otherwise be developed.
2. Application Procedure: Applicants desiring to use the PUD provisions as part of their subdivision application shall submit additional evidence with its subdivision plan application stating their desire to use the PUD provisions, the specific waivers they are requesting under the PUD provision and demonstrating how they have designed the proposed subdivision to satisfy the purpose and standards of this PUD section. Please see Article IX, Subdivision, Section 932(A)(3) and (B)(3). A site plan shall be submitted to the Development Review Board showing the locations, height, and spacing of buildings, open spaces and their landscaping, roads, driveways, and off-road parking spaces, water systems and sewage disposal plans, unique natural or man-made features, and physical conditions of the site, accompanied by a statement setting forth the nature of all proposed

modifications to the dimensional standards of the Zoning District in which the PUD is located. Copies of any appropriate or restrictive covenants shall be included.

3. Public Hearing: The public hearing shall be implemented as part of the Subdivision application with the same requirements as those described in SECTION 340 of these Regulations.).
4. General Standards: The following general standards shall be met for the Development Review Board to approve the application:
 - a. The PUD is consistent with the Town Plan.
 - b. The overall density of the project does not exceed the number of dwelling and /or commercial units which could be permitted mathematically, if the land were subdivided into lots in accordance with the district Regulations governing density. If the parcel(s) proposed to be developed lie within more than one zoning district, the Development Review Board shall calculate the density allowed on the acreage within each zone, then add the zones together to calculate the total number of units allowed on the entire parcel.
 - c. The uses proposed for the project are permitted or conditional uses for the district in which the project is proposed.
 - d. The PUD is an effective and unified treatment of the development possibilities of the project site, and the development plan makes appropriate provisions to cluster development and to preserve open space, streams, stream banks, steep slopes, wet areas, and unique natural or man-made features.
 - e. The development is proposed at a reasonable scale and over a reasonable period in order that adequate town facilities and services may be provided.
 - f. Any modification of these Regulations approved under this section shall be specifically set forth in terms of standards and criteria for design, bulk, and spacing of buildings and the sizes of lots and open spaces which shall be noted or appended to the application.
 - g. The proposal must provide for economy, efficiency and safety of road and utility installation, construction, and maintenance.
5. Specific Standards for Review: the following specific standards shall be met for the Development Review Board to approve the PUD provisions requested within the Subdivision application:
 - a. District Regulations on height and spacing between main buildings shall be met unless waived by the Development Review Board.
 - b. To ensure adequate privacy for existing and proposed uses adjacent to the PUD, structures on the perimeter of the PUD shall be set back at least equal to the setback required within the District in which the PUD is proposed.
 - c. Specific requirements of these Regulations relating to parking, access, landscaping, signs shall be maintained within the PUD.
 - d. All buildings within the PUD must be constructed within the building envelopes depicted on the site plan. Conformance with the building envelope ensures that each building constructed will meet the internal setback requirements established

by the Development Review Board. Proposed building footprints depicted on the site plan within the building envelope are for representative purposes only and may be slightly altered within the envelope to accommodate actual site and sub-surface conditions.

Section 610: ACCESSORY ON FARM BUSINESSES

Farming and forestry activities are generally exempt from municipal zoning regulations as a matter of State law. See Title 24 of the Vermont Statutes Annotated, Section 4413(a), (24 V.S.A. 4413(a)). These regulations exempt farm and forestry activities from zoning in Section 301, Exemptions, Sub-section 4. Farm Structures may also be exempt from local zoning regulations, but the farmer has the burden of demonstrating that the structure they are proposing to build will be used for farm purposes. The process to claim exemption for a farm structure is also covered in Section 301(4) of these regulations.

Many farms are now expanding their operations into business activities that fail to meet the legal definition of “farming”, but are clearly related to the farm and farming. The legislature, recognizing the importance of these on-farm businesses to Vermont’s working landscape, created a compromise, requiring municipal bylaws to allow “accessory on-farm businesses”, but also allowing municipalities to regulate some activities of those businesses. See 24 V.S.A. 4412(11) for a full text of the statute.

These regulations hereby allow qualifying “Accessory on-farm businesses” as permitted uses in all districts. Qualifying “Accessory on-farm businesses” shall be subject to Site Plan Review pursuant to Sections 390-396 of these regulations (The review process for Site Plan Review contains some of the same criteria as Conditional Use Review. Therefore, Site Plan Review references specific application requirements contained in Section 353 and review criteria contained in Sections 356).

Applicants desiring to open an “Accessory on-farm business” shall file a zoning application with the Zoning Administrator. The application shall contain the following information:

1. All information required in Section 322 of these regulations governing permit applications;
2. Information demonstrating that the proposed use meets the eligibility requirements for Accessory on-farm businesses listed in section 2(a)-(c) below. (Applicants may file a letter from the Vermont Agency of Agriculture Food and Markets finding that the proposed business use and the farm on which the activity is proposed meets the eligibility criteria as one way to satisfy this requirement).
3. Information listed in the Site-Specific Criteria for Review contained in Section 356.

Upon acceptance of a complete application by the Zoning Administrator, the ZA shall pass the application to the DRB for its review.

First, the DRB shall determine whether a proposed activity qualifies as an “Accessory on Farm Business” by complying with the following definitions and eligibility requirements:

1. Definitions, contained in Article X of these regulations that apply to Accessory on-farm businesses include: “Accessory on-farm business”, “Farm”, “Farming”, “Qualifying Product” and “Required Agricultural Practices (RAP) Rules”.
2. Eligibility. Qualifying “Accessory on-farm businesses” shall comply with each of the following:

- a. The business is operated by the farm owner, one or more persons residing on the farm parcel, or the lessee of a portion of the farm.
- b. The “Farm” meets the threshold criteria for the applicability of the “RAP rules” as set forth in those rules.
- c. An accessory on-farm business sells “qualifying goods or services”, which occur on the farm, outside or within a new or existing structure.

Once the DRB finds that the activity qualifies as an “accessory on-farm business”
The DRB shall review the application subject to its Site Plan Review process as listed in Sections 394-396, referencing Section 356 of these regulations.

The DRB’s review of the application only relates to the permitting process in these regulations for the proposed accessory on farm business. Other permits, including a potable water and wastewater system permit under 10 V.S.A. chapter 64, may be necessary from the State of Vermont.

ARTICLE VII: DESIGN AND PERFORMANCE STANDARDS

SECTION 700: OVERVIEW

Article VII contains elements of Bristol’s zoning that relates to the design and performance of uses and structures proposed within the Town of Bristol.

SECTION 710: PARKING (SECTIONS 710- 715)

Purpose: This SECTION requires new development to provide adequate off-street parking and loading areas. It also recognizes that large expanses of excessive parking can create an unwelcoming pedestrian environment, additional unnecessary expenses and problems, like storm water runoff. Therefore, it gives developers and the Development Review Board a significant amount of flexibility to design parking and loading spaces in a manner that serves the needs of residences and businesses, tenants, employees or customers and the general Bristol community.

SECTION 711: PARKING SPACE REQUIREMENTS

Any applicant proposing new development or expanding or changing a use of an existing structure shall demonstrate that their proposed plans provide adequate parking to support the intended use. Assumptions regarding the parking requirements for each use category in Bristol are listed below (Please note the use categories correspond to the Schedule of Uses Table contained on pages 14 and 15 of these Regulations).

USE	PARKING SPACE REQUIREMENT
Household Uses	1 per dwelling unit. 1 per employee and .5 per client for care facilities; 1 per dwelling unit, plus 1 per employee for home occupations and businesses
Civic Uses	1 per employee; plus 1 per 4 seats in gathering places
Office and Service Uses	1 per 600 sq. ft. of gross floor area
Food, Lodging and Entertainment Uses	1 per 3 seats; 1 per room rented
Sales Uses	1 per employee, plus 1 for every 450 sq. ft. of gross floor area
Automotive Uses	See Sales Uses, plus spaces to accommodate sales or servicing of vehicles
Industrial Uses	1 per 1.25 employees based upon highest average employee occupancy
Agriculture, forestry and Resource- Based uses	1 per employee, plus one per facility vehicle

Applicants may request to increase or decrease the standards noted above based upon the criteria noted below:

1. Applicants with shifts of workers may request to modify parking requirements to reflect the number of workers on the premises during the largest shift.
2. Applicants may demonstrate that they will share parking with another facility located within 500 feet of the applicant’s main entrance. Demonstration of shared parking will require that the applicant provide the Development Review Board with a signed lease for at least 10 years in duration. Upon expiration of the lease, the applicant shall need to demonstrate other parking arrangements exist. The sharing of parking facilities is encouraged.
3. Applicants may request to lower the parking requirements by providing alternative transportation facilities at their property or by demonstrating that the facility’s main entrance lies within 1/4 mile of a public transit stop.

4. Applicants may request lower parking requirements by demonstrating that other public parking, whether on-street or off street is available consistently for the use of applicant's employees, customers or guests.

In all cases the decision whether to grant lesser or greater parking requirements shall rest with the Development Review Board overseeing the application. The Development Review Board shall manage its parking allocations fairly and consistently based on the usage patterns on evidence in Bristol at the time and in the vicinity of the proposed development. The Development Review Board may include permit conditions requiring the applicant to seek additional parking review based upon significant increases numbers of employees or square footage.

SECTION 712: PARKING SPACE DIMENSIONS

A parking space shall consist of a space adequate for parking an automobile with room for opening doors on both sides, together with access to a proper street or drive and room to maneuver. For Site plan purposes, a parking space is at least 9 feet wide and 18 feet long.

SECTION 713: PARKING LOTS

Permanent off-street parking areas for more than three vehicles shall have the individual spaces marked and shall be designed and maintained so that each space has access to a public street or drive without moving another car. Parking lots shall also demonstrate that they provide adequate aisles or turn around space to meet this requirement. Permanent parking lots accommodating more than 20 vehicles shall be broken into smaller units separated by buildings, landscaping, storm water improvements and/or walkways to provide safe access, diminish storm water impacts and provide a visual break to the open parking expanse. Temporary parking for events or parking for accessory on farm businesses may consist of well-drained fields, private farm roads or other appropriate surfaces within the farmyard.

SECTION 714: LOADING AREAS

An applicant for a use that will regularly receive deliveries or generate shipments of goods by truck shall provide adequate space for loading or unloading those trucks without interfering with traffic circulation, access or parking.

1. Loading areas for single unit trucks must have an overhead clearance of at least 10 feet be at least 10 feet wide and 20 feet long, with additional space as necessary for access and maneuvering.
2. Loading areas for trailer trucks must have an overhead clearance of at least 14 feet be at least 12 feet wide and 50 feet long, with additional space as necessary for access and maneuvering.

SECTION 715: DESIGN AND MAINTENANCE OF LOTS AND LOADING AREAS

Parking lots and loading areas must provide a firm level surface appropriate for the anticipated manner of use in all seasons. Each shall be designed, constructed and maintained to properly dispose of the storm water they create. Each shall be maintained to keep access and circulation moving freely and shall provide an onsite area for the clearing of snow.

SECTION 720: ACCESS APPROVAL

Driveway approval shall be carried out in accordance with 19 V.S.A. SECTION 1111. However, any activity for which a zoning permit is required and which involves the construction or modification of a driveway intersection with a public right of way shall require, as part of the zoning permit, approval of such construction or modification from the Selectboard. The Select Board has adopted the "Selectboard Policy Regarding Driveway Access to Public Roads" dated July 2, 2012, as it may be amended from time to time. Its terms and conditions are hereby incorporated into these regulations. Securing an access permit from the Selectboard shall constitute evidence that the applicants access conforms with the requirements for these regulations.

SECTION 730: STORAGE OF VEHICLES IN DISTRICTS WITHIN THE VILLAGE PLANNING AREA

In the primarily residential districts within the Village Planning Area (High Density Residential, Village Residential), unregistered motor vehicles and cars used for drag or stock car racing must be stored in an enclosed garage.

SECTION 740: SIGNS (SECTIONS 740 – 748)

Signs shall meet the following criteria:

1. Be in the public interest and not to the detriment of the public safety or welfare.
2. Be of a character, size, and location that will be in harmony with the orderly development of the district.
3. All signs shall be maintained in good and legible condition.
4. Signs on the valance of "roll-up" fabric awnings, sidewalk umbrellas, sandwich board signs not exceeding six square feet on each side and advertising signs in windows are exempt from these Regulations.
5. The Development Review Board may determine that a validly created pre-existing sign be designated as a "landmark sign" and waive any dimensional or other requirements set forth herein. However, in that case, a permit is required for any change in wording or appearance.

SECTION 741: OFF-PREMISES SIGNS

Any sign located elsewhere than upon the lot containing the subject of the sign shall conform to State statute and regulation. All signs located off-premise shall have approval of the property owner(s) and the Selectboard.

SECTION 742: SIGNS IN PRIMARILY RESIDENTIAL DISTRICTS (CON, HDR, VR, RA1, RA2, RA5, BPC)

The following signs are permitted when located on the immediate property:

1. One professional or home occupation sign, not exceeding 6 square feet.
2. One temporary real estate sign, not exceeding six square feet.
3. One sign not exceeding a total of twelve square feet at each entrance to and identifying a residential development.
4. Signs identifying or directing to (entrance, exit, shipping, office, rest rooms, etc.) and not relating to specific products or services shall be considered as directional or information signs. These signs shall be in letters no more than four inches in height and not greater than two square feet each and are not to be included when calculating the total sign area or number of signs.
5. Directional or information signs, not exceeding four square feet.

6. Signs necessary for public safety or welfare.

SECTION 743: SIGNS IN PRIMARILY COMMERCIAL, INDUSTRIAL AND MIXED DISTRICTS: (C-1, VM, REC, VB, ROC)

The following signs are permitted when located on the immediate property:

1. All signs permitted under SECTION 740.
2. Two business signs, not larger than one square foot for each lineal foot of frontage occupied by the establishment, but not to exceed forty square feet in total.
3. If more than one business is located within the principal building(s), one directory sign not exceeding ten square feet. A business that is identified on a directory sign can have one other business sign that shall be included in the size requirements in item 2.

SECTION 744: WALL, PROJECTING, GROUND, AND ROOF SIGNS

Every wall sign shall:

1. Not exceed the highest point of the building's roof.
2. Not exceed 40 square feet in C-1, REC, VB; Not exceed 20 square feet in VM and ROC.

Every projecting sign shall:

1. Not extend to within 10 feet of the traveled portion of the roadway.
2. Not extend more than four feet from the building wall.
3. Not be less than ten feet above the surface of a public walkway area.
4. Not exceed sixteen square feet.

Every ground sign shall:

1. Not exceed twenty feet in height above the finished grade in commercial districts, and not exceed ten feet in height above finished grade in residential districts.
2. Be set back at least 40 feet from the road centerline and at least ten feet from any other lot line.

Roof signs shall not be permitted in any zoning district.

SECTION 745: COMPUTATION OF PERMISSIBLE SIGN AREA

When computing the total permissible sign area for any use:

1. Existing signs shall be included.
2. The total area of all signs shall not exceed the requirements as set forth in these Regulations.
3. Signs consisting of freestanding letters, numerals, or other devices should include any intervening spaces between them.
4. Only the larger faced area of a double-faced sign shall be used.
5. Back-to-back signs may be counted as one sign.

SECTION 746: TRAFFIC, HAZARD, SAFETY, AND OBSTRUCTION

Every sign shall be designed and located in such as manner as to:

1. Not impair public safety.
2. Not restrict clear vision between a sidewalk and road.
3. Not be confused with any traffic sign or signal.
4. Not prevent free access to any door, window or fire escape.
5. Withstand a wind pressure load of at least thirty pounds per square foot.

SECTION 747: ILLUMINATED AND FLASHING SIGNS

1. Signs may be illuminated by a steady light provided that such lighting will not illuminate or reflect onto other properties.

2. Flashing, oscillating, or revolving signs shall not be permitted, unless necessary for public safety or welfare.
3. Signs of a commercial nature in any district shall not be illuminated past the close of normal business hours. Shall not be illuminated past 10 p.m. in the ROC, HDR, VR, and VM Districts.
4. Requires approval by the Development Review Board.

SECTION 748: TEMPORARY SIGNS

In addition to signs permitted in the SECTIONs above, the following signs are permitted:

1. Temporary signs. A person may display, without obtaining a Zoning Permit, one temporary sign linked to a specific topic, action or event that has a limited duration. Without regard to content, examples of temporary signs include signs for yard sales, auctions, special events, construction in progress, real estate sales and /or political elections.
 - a. signs will be no larger than eight square feet and shall be located on the premises.
 - b. Off premise directional signs shall be no larger than four square feet.
 - c. All temporary signs must be removed within 5 days of the close of the event, action or topic to which they pertain. Residents are encouraged to limit the duration of their signs to a reasonable period associated with the action, event or topic to which they correspond.
 - d. No temporary signs shall be on display for greater than 6 months in any given calendar year. Signs on display for greater than 6 months in any given calendar year shall constitute permanent signs requiring a permit and subject to these Regulations.
2. Street banners are also allowed in addition to the temporary signs advertising events sponsored by civic organizations. Such banners may be displayed without obtaining a zoning permit (They do require permission from the Bristol Town Administrator to string the banner across the street) for up to 30 days prior to the event and must be removed within five days after completion of the event.

SECTION 750: PERFORMANCE STANDARDS (SECTIONs 750- 754)

No land or building in any zoning district shall be used or occupied in any manner so as to create dangerous, injurious, noxious or otherwise objectionable conditions in such a manner or in such amount as to adversely affect the reasonable use of the surrounding area of adjoining properties. The following specific standards are set forth to implement this purpose. The burden of proof that the following standards are met shall be on the applicant.

SECTION 751: NOISE

No noise which is excessive at the property line, represents a significant increase in noise levels in the vicinity of the development and is incompatible with the reasonable use of the surrounding area shall be permitted.

Within primarily residential districts within the Town of Bristol (HDR, VR):

1. All equipment used within (manufacturing equipment) or associated with a structure (exhaust fans, transformers, other operating fixtures) shall not increase the average decibel level, when the equipment is operating, at the property line by greater than 5

decibels. Sustained nighttime noise should not increase above 50 decibels at the property line.

2. Facilities shall be designed to reduce the need for truck back-up signals.
3. Trucks shall not be allowed to idle after 7:00p.m. or before 7:00 a.m. for greater than 15 minutes.
4. Outdoor manufacturing equipment shall not be operated for extensive periods of time after 7:00p.m. or before 7:00 a.m.
5. These standards shall not apply to exempt uses, like agricultural or forestry uses.

SECTION 752: GLARE, LIGHTS, AND REFLECTION

Applicants shall protect dark skies at night and ridgelines by limiting the number and brightness of exterior lights and limiting obtrusive glare by implementing the following measures:

1. Installing, constructing and maintaining all outdoor lighting and illuminated signs to minimize the intrusion of light across property lines, eliminate upward illumination and reduce glare and to maximize the effectiveness of site lighting by limiting light to a target area.
2. Installing any pole lights to be lower than the building whose area they illuminate or not greater than 15 feet tall, whichever is less; Except where the applicant can demonstrate the need for taller lighting, like athletic facilities.
3. Requiring internal illuminated or externally lit commercial signs to be fully down shielded or lit from the top down.
4. Requiring all building lighting for security or aesthetics to be down shielded and targeted.
5. Prohibiting exterior unshielded wall pack lights.

Other optional measures applicants may consider include:

1. Using exterior motion detectors to limit the amount of time lighting is used.
2. Using non-reflective material for roofs or siding.
3. Limiting excessive windows to limit impacts from interior lighting.
4. Turning lighting off after the close of business, unless needed for safety or security, in which case the lighting shall be down shielded and minimized.

These Regulations shall not apply to solar or other energy generating structures.

SECTION 753: FIRE, EXPLOSIVE, AND SAFETY HAZARDS

No fire, explosive or safety hazard shall be permitted which significantly endangers other property owners or which results in a significantly increased burden on town properties. All storage for flammable liquids shall comply with applicable State and Federal Regulations.

SECTION 754: HOURS OF OPERATION

Hours of operation should be limited to standards for similar enterprises. Hours of operation are generally encouraged to not begin earlier than 6:00 a.m. and end by 9:00 p.m. The Development Review Board may expand these hours to accommodate specific types of businesses and to allow for additional shifts within the Village Mix or Commercial Districts.

SECTION 760: LANDSCAPING

Bristol shall require non-residential development to install landscaping to blend a project into its surroundings pursuant to the following standards:

1. Where any nonresidential uses in a district abuts any residential use in a district, a strip of land at least twenty-five feet in width shall be maintained as a landscaped area in the

- front, side, or rear yards which abut the residential district.
2. The outdoor storage of trash shall be screened or hidden from public view and the view of persons in rural agricultural districts. In industrial districts, such storage shall be screened and located to the rear of the buildings.
 3. Landscaping required by these regulations shall consist, at a minimum, of trees, shrubs, and protective ground cover. One tree at least ten feet in height shall be planted no nearer than five feet to any lot line for each three hundred square feet of required landscaped area, and shall be located to minimize potential shading of south facing surfaces of adjacent residences. One shrub shall be planted for each two hundred square feet of required landscaped area. Protective ground cover is required for the entire landscaped area.

ARTICLE VIII: FLOOD HAZARD AREA REGULATIONS

SECTION 801: STATUTORY AUTHORIZATION

To affect the purposes of 10 V.S.A. Chapter 32, and in accord with the Vermont Planning and Development Act, 24 V.S.A., Chapter 117, SECTIONs 4424, 4411, 4414, there are hereby established zoning regulations for areas of special flood hazard in the Town of Bristol.

SECTION 802: STATEMENT OF PURPOSE

It is the purpose of these regulations to promote the public health, safety, and general welfare, to prevent increases in flooding caused by the uncontrolled development of lands in areas of special flood hazard, and to minimize losses due to floods by:

1. restricting or prohibiting uses that are dangerous to health, safety, or property in times of flood or cause excessive increase in flood heights or velocities.
2. requiring that uses vulnerable to floods, including public facilities that serve such uses, shall be protected against flood damage at the time of initial construction.
3. protecting individuals from buying lands that are unsuited for their intended purposes because of flood hazard.

SECTION 803: LANDS TO WHICH THESE REGULATIONS APPLY

These regulations shall apply to all lands in the Town of Bristol identified as areas of special flood hazard on the Federal Emergency Management Agency (FEMA) Flood Insurance Rate Maps (FIRM), dated August 5, 1986, and any revisions thereto.

SECTION 804: OFFICIAL FLOOD HAZARD AREA MAP

The Official Flood Hazard Area Map shall consist of the FEMA Flood Insurance Study, including the Flood Insurance Rate Maps (FIRM), and Flood Boundary and Floodway Maps. The official Flood Hazard Area Map, together with all explanatory matter thereon and attached thereto, is hereby adopted by reference and declared to be part of these Regulations. The Official Flood Hazard Area Map may be altered with appropriate approval if adequate field data is developed which would show actual conditions in more detail.

SECTION 805: INTERPRETATION OF DISTRICT BOUNDARIES

The Zoning Administrator shall determine the boundaries of any designated area of special flood hazard by utilizing the base flood elevation data contained in the Flood Insurance Study, or in the absence of such data, by obtaining, reviewing, and reasonably utilizing any base flood elevation data available from a federal or state agency. Appeals with respect to a boundary interpretation shall be made by filing a notice with the Secretary of the Development Review Board within fifteen days of the decision or act.

SECTION 806: PERMITTED USES

Upon issuance of a permit by the Zoning Administrator, the following open space uses shall be permitted within the area of special flood hazard to the extent that they are not prohibited by any other ordinance and provided that they do not require the erection of structures or storage of materials and equipment, the borrowing of fill from outside the flood hazard area, or channel modification or relocation, and do not obstruct flood flows, affect the water-carrying capacity of the regulatory floodway or channel, or increase off site flood damage-potential:

1. Agricultural uses, such as general farming, pasture, orchard, grazing, outdoor plant nurseries, truck farming, and forestry.
2. Recreation uses, such as parks, picnic grounds, tennis courts, golf courses, golf driving ranges, archery and shooting ranges, hiking and riding trails, hunting and fishing areas, game farms, fish hatcheries, wildlife sanctuaries, nature preserves, swimming areas, and boat launching sites.
3. Accessory residential uses, such as lawns, gardens, parking areas, and play areas.

SECTION 807: CONDITIONAL USES

All new construction, substantial improvement, and development uses prescribed by the Town of Bristol zoning ordinance that do not meet the requirements of SECTION 806 and fall within the designated area of special flood hazard are permitted only upon the granting of a conditional use permit by the Development Review Board in accordance with the procedures and requirements of SECTIONs 810, 811, and 812 of these regulations.

SECTION 808: PERMIT REQUIREMENTS AND APPLICATION PROCEDURES

Permits are required for all proposed new construction, substantial improvements, and other development as defined by this Article, including the placement of mobile homes, within all lands to which these regulations apply.

All zoning permit applications shall be submitted to the Zoning Administrator, on forms furnished by him, who shall determine, on application, whether or not the proposed development is located within the area of special flood hazard by the procedures established in SECTION 805 of these regulations.

If the proposed use will be located in the areas of special flood hazard and meets the requirements of SECTION 806 of these regulations, the Zoning Administrator shall issue a permit. If the proposed use does not meet the requirements of SECTION 806, the Zoning Administrator shall refer all applicants to the Development Review Board.

SECTION 809: RECORDS

The Zoning Administrator shall maintain a record of:

1. the elevation, in relation to mean sea level, of the lowest habitable floor, including the basement, of all new construction or substantial improvement of structures and whether or not such structures contain a basement; and
2. the elevation, in relation to mean sea level, to which such structures have been flood proofed.
3. all permits issued under Article VIII of these regulations

SECTION 810: CONDITIONAL USE REVIEW PROCEDURES

Upon receiving an application for conditional use permit under these regulations, the Development Review Board shall, prior to holding a hearing and rendering a decision thereon, obtain from the applicant:

1. base flood elevation data for all portions of the property proposed to be subdivided or developed.
2. the elevation, in relation to mean sea level, of the lowest habitable floor, including basement, of all new construction or substantial improvement of structures:
3. where flood proofing is proposed in lieu of elevation, the elevation, in relation to mean

4. sea level, to which any structure or substantial improvement will be flood proofed.
4. certification from a registered professional engineer or architect that the designed and proposed method of construction of buildings to be flood proofed are in accordance with accepted standards of practice meeting the flood proofing criteria of SECTION 812 of these Regulations.
5. a description of the extent to which any watercourse will be altered or relocated as a result of the proposed development and that its capacity to carry floodwaters has not been compromised.

In addition, the Development Review Board shall require such of the following information as it deems necessary for determining the suitability of the site for the proposed use:

1. Plans drawn to scale, showing the location, dimensions, contours, and elevations of the lot; the size and location on the site of existing or proposed structures, fill or storage of materials; the location and elevations of streets, water supply, and sanitary facilities; and the relation of the above to the location of the channel, floodway, and base flood elevation.
2. A typical valley cross-section showing the channel of the stream, elevation of land areas adjoining each side of the channel, and cross-sectional areas to be occupied by the proposed development.
3. A profile showing the slope of the bottom of the channel or flow line of the stream.
4. Specifications for building construction and materials, flood proofing, mining, dredging, filling, grading, paving, excavating, or drilling, channel improvement, storage of materials, water supply, and sanitary facilities.

In unnumbered A zones, the Development Review Board shall obtain, review, and reasonably utilize any base flood elevation and floodway data available from a federal, state, or other source as criteria for approval of all land development under SECTION 812.

The Development Review Board shall notify adjacent communities and the Vermont Department of Environmental Conservation River Management Program (DEC/RMP) prior to approval of an alteration or relocation of a watercourse and shall submit copies of such notifications to the FEMA Administrator.

The Development Review Board shall transmit one copy of the information required by subsections 810(1) and 810(2) to the Vermont DEC.RMP in accordance with 24 V.S.A., SECTION §4424).

In reviewing each application, the Development Review Board shall consider the evaluation of the Vermont Department of Water Resources and shall determine the proposed use will conform to the development standards of SECTION 812 of these Regulations.

In accordance with 24 V.S.A., SECTION §4424 no permit may be granted for new construction or the development of land in any area designated as a flood plain by the Vermont DEC/RMP prior to the expiration of a period of 30 days following the submission of a report to the Vermont DEC/RMP under SECTION 810(5) above.

SECTION 811: CONSIDERATIONS BY THE DEVELOPMENT REVIEW BOARD

In reviewing each application, the Development Review Board shall consider:

1. the danger to life and property due to increased flood heights or velocities caused by

- encroachments.
- 2. the danger that materials may be swept onto other lands or downstream to the injury of others.
- 3. the proposed water supply and sanitation systems and the ability of these systems to prevent disease, contamination, and unsanitary conditions under conditions of flooding.
- 4. the susceptibility of the proposed facility and its contents to flood damage and the effect of such damage on the individual owners.
- 5. the importance of the services provided by the proposed facility to the community.
- 6. the necessity to the facility of a waterfront location.
- 7. the availability of alternative locations not subject to flooding for the proposed use.
- 8. the compatibility of the proposed use with existing development and development anticipated in the foreseeable future.
- 9. the relationship of the proposed use to the proposed comprehensive plan, insofar as it has been developed.
- 10. the safety of access to the property in times of flood for ordinary and emergency vehicles.
- 11. the expected heights, velocity, duration, rate of rise, and sediment transport of the flood waters expected at the site.
- 12. the costs of providing governmental and public facilities and services during and after flooding.
- 13. such other factors as are relevant to the purposes of this ordinance.

SECTION 812: CONDITIONS ATTACHED TO CONDITIONAL USE APPROVAL

As a condition of approval, the Development Review Board shall specifically require that:

- 1. All new construction or substantial improvement of any residential structure have the first floor and basement floor elevated to or above the base flood elevation, unless the Town of Bristol has been granted an exception by the Administrator for the allowance of basements flood proofed below the base flood level;
- 2. All new construction or substantial improvement of nonresidential structures have the lowest floor, including basement, elevated to or above the base flood elevation, or be flood proofed below the base flood level in accordance with subsection (3) of this section.
- 3. The lowest floor, including basement, and attendant utility and sanitary facilities of all new construction or substantial improvement below the base floor elevation be flood proofed so that the structure is watertight with walls substantially impermeable to the passage of water and with structural components having the capability of resisting hydrostatic and hydrodynamic loads and the effects of buoyancy;
- 4. Structures shall be:
 - a. designed (or modified) and adequately anchored to prevent flotation, collapse, or lateral movement of the structure during the occurrence of the base flood,
 - b. be constructed with materials resistant to flood damage,
 - c. be constructed by methods and practices that minimize flood damage, and
 - d. be constructed with electrical, heating, ventilation, plumbing, and air conditioning equipment and other service facilities that are designed and/or located to prevent water from entering or accumulating within the components during conditions of flooding.
- 5. Development within the floodway is prohibited unless a registered professional engineer certifies that the proposed development will not result in any increase in flood levels during the occurrence of the base flood.
- 6. On-site waste disposal systems be located to avoid impairment to them or contamination from them during flooding.
- 7. New and replacement manufactured homes shall be elevated on properly compacted fill

such that the top of the fill (the pad) under the entire manufactured home is above the base flood elevation.

8. All necessary permits be obtained from those governmental agencies from which approval is required by federal or state law.
9. All land development be reasonably safe from flooding and that:
 - a. all public utilities and facilities serving subdivisions, such as sewer, gas, electrical, and water systems, be located and constructed to minimize or eliminate flood damage, and
 - b. adequate drainage be provided within subdivisions to reduce exposure to flood hazards.
 - c. Upon consideration of those factors in SECTION 911, and the purposes of these Regulations, the Development Review Board shall attach such additional conditions to the granting of a permit as are necessary to meet the purposes and flood hazard area management requirements of these zoning Regulations.

SECTION 813: TIME FOR ACTING ON APPLICATION

The Development Review Board shall hold a properly warned hearing within 30 days of receiving an application, and shall act on such application in a manner described in SECTIONS 811 and 812 of these Regulations within (30) days of the final hearing, subject to the limitation of SECTION 810 (6) of these Regulations. A copy of the public notice shall be mailed to the applicant at least 15 days prior to the hearing date.

SECTION 814: ISSUANCE AND TRANSMISSION OF PERMITS

Upon granting a permit, the Development Review Board shall send to the applicant, by certified mail, a copy of the decision. Copies of the decision shall also be mailed to every person appearing and having been heard at the hearing, to the Zoning Administrator, who shall forthwith issue a permit, and to the Town Clerk as a part of the public records.

SECTION 815: EFFECTIVE DATE

A permitted use permit shall take effect 15 days from the date of issuance.
Conditional use permits shall take effect upon adjudication by the Development Review Board.

SECTION 816: APPEALS

An interested person, as defined in 24 V.S.A., SECTION 4464(b), may appeal a decision of the Development Review Board to the Environmental Court in accordance with the provisions of 24 V.S.A., SECTION 4471.

SECTION 817: VARIANCES

Variations shall be granted by the Development Review Board only:

1. in accordance with the provisions of 24 V.S.A., SECTION §4469, 4424(E) and 44CFR SECTION 606.
2. upon a determination that during the base flood discharge the variance will not result in increased flood levels in the designated regulatory floodway, threats to public safety, extraordinary public expense, or create nuisances, cause fraud nor victimization of the public, or conflict with existing local laws or ordinances.
3. The Development Review Board shall notify the applicant that the issuance of a variance to construct a structure below the base flood level:
 - a. will result in increased premium rates for flood insurance commensurate with the resulting increase in risk up to amounts as high as \$25 for \$100 of insurance coverage.

- b. increase risks to life and property.
- 4. The Development Review Board shall:
 - a. maintain a record of all variance actions, including justification for their issuance, and
 - b. report such variances issued to the Administrator upon request.

SECTION 818: FEES

The Selectboard shall establish such fees as may be necessary for the filing of notices and the processing of hearings and action thereon. All such fees shall be paid to the Town of Bristol upon application for a conditional use permit under these regulations.

SECTION 819: WARNING OF DISCLAIMER OF LIABILITY

These regulations do not imply that land outside the areas of special flood hazard or land uses permitted within such districts will be free from flooding or flood damages. These regulations shall not create liability on the part of the Town of Bristol or any town official or employee thereof for any flood damages that result from reliance on this ordinance or any administrative decision lawfully made there under.

SECTION 820: PRECEDENCE OF REGULATIONS

The provisions of these Regulations shall take precedence over any conflicting and less restrictive local laws.

SECTION 821: ANNUAL REPORT TO FEDERAL EMERGENCY MANAGEMENT AGENCY

- 1. The Zoning Administrator shall, to the extent possible, submit to the Administrator the information required by the FEMA annual report form with respect to the administration and enforcement of these flood hazards area bylaws.
- 2. A copy of the annual report shall be submitted to the state coordinating agency.

SECTION 822: DEFINITIONS

Definitions related to Article 8 concerning the Flood Hazard Area are included in Article X, Definitions and are highlighted with the symbol “FH” to identify their relevance to the portion of these regulations regulating Flood Hazards.

ARTICLE IX: SUBDIVISION REGULATIONS

Section 901: PURPOSE

This Article of these Unified Regulations of the Town of Bristol supplement the other Articles governing Zoning (Articles I – VII) and Flood Hazard Management (Article VIII), are designed to work in conjunction and support those articles and provide a unified process for implementing the Town Plan (“the Plan”). The fundamental principles of the Plan, to protect and enhance the Town’s most important community assets (natural, environmental, social, aesthetic and economic) and to assure the individual’s freedom to use and enjoy his or her own property, but still respect the rights and interests of the community, are reflected in these regulations.

These regulations provide a process for evaluating proposed subdivisions in the context of the Town Plan’s expressed long-term goals regarding providing social and economic opportunity, jobs and housing in its village area and maintaining its natural resources, working landscape and rural character outside of the village area.

Section 902: JURISDICTION OF REGULATIONS

Whenever any subdivision of land is proposed to be made, before any contract for the sale of such a subdivision or any part thereof is made, before any permit for the erection of a structure in such a proposed subdivision is granted, and before any plat or subdivision deed may be filed with the Town Clerk, the Applicant, or his/her authorized agent, shall apply in writing to the Town Zoning Administrator. The Zoning Administrator may handle simple boundary line adjustments where both lots comply with all zoning dimensional standards for the district in which the property is located administratively. The Zoning Administrator shall forward all other subdivision applications to the Development Review Board for review of the proposed subdivision in accordance with the provisions of these regulations.

Section 903: GENERAL OVERVIEW

This Section explains the process applicants desiring to subdivide land will need to go through to secure a subdivision permit. Simple boundary line adjustments may be handled administratively by the Zoning Administrator. All other applications to subdivide land begin with the application for Sketch Plan Review. Sketch Plan Review is an informal meeting between the applicant and the Development Review Board that provides the opportunity for informal conversation about the applicant’s goals and the Boards application of the rules. Minor Subdivisions will proceed to a final hearing because they involve less complicated issues and can generally be closed in one hearing. Major subdivisions will move to a hearing on preliminary plat. Both hearings constitute a more formal hearing process offering the opportunity for all parties with an interest in the project to participate before the DRB. For Major subdivisions, if an applicant’s proposed subdivision is approved at the preliminary plat phase, the process moves to the hearings on the final plat. For both major and minor subdivisions, after the hearing on the final plat closes, the Development Review Board will issue a written decision on the proposed project. The project will be approved or denied for cause. If approved, the local process ends with the filing of the Final Plat in the town land records and fulfillment of conditions, if any, on the approved application. Parties to the decision may appeal it.

SUBDIVISION APPLICATION AND REVIEW PROCEDURE

Section 910: APPLICATION PROCESS

All applicants are encouraged to communicate with the Zoning Administrator prior to filing an application to help them understand the process that the subdivision they propose will likely need to follow. The Zoning Administrator will provide guidance and application forms to the applicant. Applicants may choose to proceed with a subdivision application prior to seeking zoning permits for the buildings and uses proposed, may proceed through the zoning and subdivision process concurrently, or may proceed through both processes requesting that the Development Review Board review their application as a Planned Unit Development under Section 609 of these regulations. The scope of review the applicant chooses to seek shall determine the extent of the review.

Section 911: SIMPLE BOUNDARYLINE ADJUSTMENT

These regulations provide the Zoning Administrator with the authority to conduct an administrative review and approval on simple boundary line adjustments.

Simple boundary line adjustments involve moving boundary lines between two validly created, previously existing lots. The pre-existing lots may be non-conforming, provided they were legally created or are deemed to currently exist legally. For two previously conforming lots, the boundary line adjustment shall create two new lots that meet all dimensional standards. For boundary line adjustments between lots where one of the validly created, previously existing lots did not meet the dimensional standards, the proposed boundary line adjustment shall not increase the non-conformity of the lot with all dimensional standards.

If the Zoning Administrator finds that an application for a boundary line adjustment meets the criteria for a Simple Boundary Line Adjustment noted immediately above, the Zoning Administrator may process the application by conducting an administrative review. If the Zoning Administrator does not believe the proposed boundary line adjustment meets the tests above, the Zoning Administrator shall notify the applicant and pass the application on to the Development Review Board for subdivision review.

Section 912: ADMINISTRATIVE REVIEW OF SIMPLE BOUNDARYLINE ADJUSTMENTS

The administrative review process for a boundary line adjustment shall be the same for a boundary line adjustment as it is for a Zoning Permit for an allowed use. **Please See Sections 310-325** of these regulations for the application and notice requirements for issue of a zoning permit.

Upon completion of the administrative review process the Zoning Administrator shall issue a decision. Assuming the decision is favorable, the Zoning Administrator shall create a Zoning Permit outlining the conditions of the boundary line adjustment. Upon the expiration of the appeal period, the decision shall become final. However, the zoning permit shall expire after 180 days unless the applicant records a final plat plan.

Section 913: RECORDING A PLAT DEPICTING A BOUNDARYLINE ADJUSTMENT

Within 180 days of the issuance of a zoning permit approving a boundary line adjustment, the applicant shall file a final plat plan depicting the boundary line adjustment as permitted. The Plat shall be accompanied by the appropriate recording fee and contain all information required for final plats as outlined in Section 941 of these regulations and required by State law (See 27 V.S.A. § 1401 – Filing of land plats; 27 V.S.A. § 1403 – Composition of survey plats). The Zoning Administrator shall review the Plat Plan to ensure it complies with the conditions of the permit and the requirements for recording. Upon finding that the Plat Plan meets all conditions and requirements, the Zoning Administrator shall present the Plat Plan to the Development Review Board at its next meeting with a memorandum noting it has been administratively approved and requesting that the Development Review Board have its authorized representatives sign the Plat and offer it for recording. The Development Review Board shall execute the Plat as required by statute and file it for recording.

Section 920: SKETCH PLAN REVIEW

All applications that do not qualify as simple boundary line adjustments shall start with a sketch plan review. The Sketch Plan phase of an application is the most informal phase of the process. It constitutes a chance for the applicant to make a proposal and receive informal feedback and guidance from the Development Review Board regarding the proposal's general compliance with the goals of the Town Plan and these regulations. The DRB will not make any substantive decisions at sketch plan. It may make suggestions to the applicant regarding issues of concern. The DRB will make procedural decisions at sketch plan. It will determine whether an application constitutes a major or minor subdivision. It will also determine the information it will require from the applicant in the formal application process.

Section 921: SKETCH PLAN APPLICATION

The applicant shall submit one original digital (PDF) file and one paper copy of a Sketch Plan of the proposed subdivision to the Zoning Administrator at least fifteen days prior to the regular meeting of the Development Review Board. The following information shall be submitted for consideration with a sketch plan application for a subdivision:

1. Subdivision name or title and address at which it is located.
2. Names and addresses of the applicant, the landowner, if different from the applicant and professional advisers working on the project; If the applicant is different from the landowner, the application shall include the landowner's signature authorizing the applicant to propose the project.
3. A map drawn at a scale sufficient to depict the entire parcel subject to the subdivision application and to allow the Development Review Board to locate the parcel within the municipality and to view it in the context of the land surrounding the parcel. The map shall depict the subdivision and important features, including proposed lots, existing development or roads, planned infrastructure and roads, significant natural areas or other areas of interest or concern.
4. A written description of the proposed subdivision and its significant features.
5. A description of proposed easements and/or covenants encumbering the property.
6. A statement by the applicant concerning the use of any adjoining property owned or controlled by the landowner or applicant, if different.
7. Whether the Applicant seeks to subdivide the land, seeks to subdivide the land and has specific uses proposed for that land requiring a separate zoning permit(s) and whether the applicant intends to use the PUD provisions of the Zoning Regulations to request waivers of certain

regulatory provisions (Largely setbacks) and if so, how the proposed subdivision layout implements the PUD objectives for the area in which it is located.

Section 922: SKETCH PLAN MEETING

1. The Zoning Administrator shall notify the Development Review Board of the application, set the meeting and contact the applicant with the date, time and schedule of the meeting.
2. The applicant, or its duly authorized representative, shall attend the meeting.
3. The Development Review Board shall study the Sketch Plan to determine whether or not it generally conforms to, or would be in conflict with these Unified Regulations, the Town Plan, developments proposed by any public agency, existing private and public development, facilities and services, and for any special problems. The Development Review Board will not make any formal findings on the substance of the application but may offer suggestions or highlight issues that it believes it will investigate further in the formal hearing process.
4. The Development Review Board may adjourn and reconvene the meeting to a future date if further discussion and/or the presentation of additional information on the sketch plan are deemed necessary.
5. Where the Applicant notifies the Development Review Board of its intent to seek a zoning permit or permits concurrent with the subdivision process or proposes a Planned Unit Development (PUD) pursuant to Section 609 of these regulations, the Development Review Board should simultaneously review the project under the criteria established in both these Subdivision Regulations and the pertinent requirements of Articles 4-8 of these unified regulations and/ or Section 609 of these unified regulations governing PUDs.
6. The principle purposes of the sketch plan meeting shall be to:
 - a. Provide an informal discussion of whether the project, as described in the applicant's sketch plan, generally meets the requirements of these Regulations.
 - b. Classify the applicant's project as either a major or a minor subdivision. The definitions of both Major and Minor Subdivisions are contained in Section 1000 of these Regulations. (*see Definitions*); and
 - c. Determine whether the Applicant intends to submit the project concurrently for both subdivision and zoning review and/or review as a PUD and to seek waivers of any zoning provisions pursuant to Section 609 of these regulations governing PUDs.
 - d. Specify the detailed information that the Development Review Board will require the applicant to submit for its review of the application at the public hearing, or hearings, on the project.

Section 923: FINDINGS AND DECISION, SKETCH PLAN

Within forty-five (45) days of the completion of the sketch plan meeting, the Development Review Board shall inform the applicant in writing of its classification of his/her project, and what application information it will require the Applicant to submit or waive prior to the hearing (Final Plat, Minor), or hearings (Preliminary and Final Plat, Major), on the application.

PRELIMINARY PLAT (MAJOR) AND FINAL PLAT (MINOR) APPLICATION AND REVIEW PROCEDURE

Section 930: MINOR AND MAJOR SUBDIVISION PROCEDURE

Within six months after classification of the Sketch Plan as a Major or Minor Subdivision by the Development Review Board, the Applicant shall apply for approval of a Final Plat (for a minor) or a Preliminary Plat (for a major) according to the procedures and requirements below. If the Applicant fails to submit the plat application within 6 months, the Development Review Board may require resubmission of the Sketch Plan for reclassification. The plat the applicant submits should substantially conform to the layout shown on the Sketch Plan plus any recommendations made by the Development Review Board in its findings from the Sketch Plan Hearing.

Section 931: PLAT APPLICATION AND REVIEW PROCESS

The plat application and review process shall be the same for major and minor subdivisions, except that:

1. Minor subdivisions may require only one hearing.
2. Because minor subdivisions are presumed to be smaller in size and impact, the review criteria for minor subdivisions may be more limited and the Development Review Board may waive some of the application criteria for minor subdivisions. The Development Review Board will specify the information it is willing to waive in its Sketch Plan Decision. The Development Review Board reserves the right to request information it originally waives if testimony at the hearing demonstrates the material is necessary for the Board to make a final determination of compliance on any criteria.

Section 932: APPLICATION

The Applicant shall file an original digital (PDF) and one paper copy of the application, plat drawings and supporting plans and other materials necessary for the Development Review Board to conduct its review. The Application and plat drawings shall contain information and references necessary for the Development Review Board to put the application into the context of its location within the town and on the parcel it occupies and to determine whether the applicant has provided the information necessary to allow the Board to make affirmative findings under all review criteria contained in Section 937 of these regulations. As such, they shall include all information included on the sketch plan, plus any additional information requested by the Development Review Board in its decision regarding the Sketch Plan and the following:

A. Written Application Material

1. Ownership and Administration. Administrative and contact information for the landowner, applicant, if different from the landowner, and all of their agents, executed by the Applicant and landowner certifying that the information presented is complete and accurate and requesting the Town to proceed with the application.
2. Zoning Districts, Subdivided Lots and Existing Conditions. A general physical description of the property to be subdivided, a description of the project proposed and a statement noting the Zone(s) in which the proposed subdivision is located and describing how the subdivision complies with the A. Objectives and Guidelines, B. Allowed Uses

and C. Dimensional Standards of the Town's Zoning Regulations for the Zone in which it is located. The description shall include the locations of temporary markers, to allow the Development Review Board to appraise the basic layout of the proposed subdivision in the field.

3. PUDs. Applicants desiring to use the provisions allowing Planned Unit Developments (PUDs), as set forth in Section 609 of these regulations, shall identify each PUD modification they are requesting, and explain how the modification requested implements the goals of the Planned Unit Development Regulations as may be necessary for the Development Review Board to reach a decision regarding such modification.
4. Water Supply and Wastewater Disposal. A description of the proposed wastewater system and potable water supply system for the project. If the source is a community water supply system or final disposal destination is a community wastewater system, the applicant shall provide evidence of the right to use the system and the adequacy of the system to meet the project's water supply and /or wastewater disposal requirements. All design criteria shall conform to the requirements of the applicable State Wastewater System and Potable Water Supply Rules. If an on-site water supply or sewage disposal system is proposed, a soils test report and system design data prepared by a registered professional engineer or a certified site technician in accordance with the provisions of the State's Wastewater System and Potable Water Supply Rules shall be provided.
5. Stormwater. A description of the proposed stormwater system demonstrating compliance with all applicable State of Vermont Stormwater Permitting requirements for both construction and development, as such may be amended from time to time. For projects with disturbance or impervious limits below those required for State permits, the applicant shall present testimony for the project engineer noting that no State permits are required for either construction or management and also noting the other low impact development techniques the applicant has incorporated into its design to reduce stormwater discharges from the site both during construction and after construction is completed.
6. Transportation Infrastructure. A description of all existing and proposed street right-of-way boundaries, street widths, typical roads and walkways. Evidence that any proposed drive, private drive or private roadway can meet the Town of Bristol Selectboard Policy Regarding driveway Accesses to Town Highways.
7. Utilities Infrastructure. A description of all utilities, dimensions and sizes of all lots, locations of all existing and proposed amenities, utilities and other man-made improvements on the site.
8. Common land and Governance. A description of any open space, proposed covenants and/or deed restrictions which are intended to govern all or part of the subdivision, and a description of the homeowners' association or any other form of management organization for the subdivision, if such is proposed.
9. Natural Resources. A description of the following natural resources on the site, if applicable:
 - a. Streams: a description of how the subdivision meets the setback requirements of Section 513 of these regulations.
 - b. Shoreline: a description of how the applicant shall meet the State Shoreline Protection act (This provision applies only to properties located on Bristol Pond).
 - c. Floodplains: a description of how the applicant meets the Flood Hazard Regulations in Article VIII.
 - d. Wetlands: a description of how the applicant shall meet the State wetland regulations.

- e. Natural Communities, including deer yards and other rare or endangered species and a description regarding how the applicant shall comply with State regulations protecting those communities.

B. Plat Plan and Site Plan Maps

In addition to the information above, the Applicant shall provide a plat and, as necessary, backup site plans and detail drawings. All drawing sheets shall be clearly marked with a Subdivision name or title, the address at which it is located, a scale, north point, date and key of other information. The plat and other drawings shall not be more than 36" long nor more than 24" wide and shall be drawn to a scale large enough to show the details clearly but shall not be less than 1" x 100'. A one and one-half inch (1½") marginal borderline shall be drawn around the outer edge of each plan and all data to appear thereon shall be within said marginal lines. The plat plan (which includes and depicts legal information like lot lines, lot acreage and easements) and backup site plan drawings, as necessary (which include and depict other important features like landscaping, elevations, grading and infrastructure) shall include and depict the following, except where a waiver is authorized by the Development Review Board pursuant to its authority under Sections 923 and 931 of these regulations.

1. Ownership and Administration. A survey of the property to be subdivided depicting Subdivision boundaries and boundaries of contiguous properties and names of owners of all parcels of land directly abutting or directly across any street abutting the proposed subdivision or an abutting parcel owned or controlled by the applicant. Depending upon the proposed use and the size of the parcel involved, the Development Review Board may require a survey of only the relevant portion of the parcel being subdivided but shall still require all abutting parcels to be depicted.
2. Zoning Districts, Subdivided Lots and Existing Conditions. A Base Plat Plan depicting zoning or other existing districts or boundaries, if any (County, Townline, Historic, Downtown, Water/Wastewater/Fire, etc.); plus, the total acreage of the subdivision and the boundaries, number and acreage of lots proposed. A base map for the Site Plan(s) depicting important existing features, including topographic contours drafted at an interval of not more than 2 feet in areas to be developed and 10 feet in areas not proposed for development; Commercial buildings shall be depicted on the lots;
3. PUDs. Notes identifying each modification to zoning requested under the PUD provisions of these regulations.
4. Water Supply and Wastewater Disposal. Plans identifying and depicting the location of all water supply and wastewater disposal easements, infrastructure and setbacks, including pipe sizes and directional flows, as applicable.
5. Stormwater and Grading. Plans identifying and depicting grading to take place on the site and the location of all stormwater easements, infrastructure and setbacks, including pipe sizes and directional flows, as applicable and Low impact development techniques incorporated into the design to reduce stormwater.
6. Transportation Infrastructure. Plans identifying and depicting the location of all roads, sidewalks and trail easements, infrastructure and related fixtures (signs), as applicable.
7. Utilities Infrastructure. Plans identifying and depicting the location of all utility easements, infrastructure and related fixtures (signs), as applicable.
8. Common land and Governance. The Site Plan map or a separate map shall depict an open space plan and landscaping plan for the subdivision, showing any conserved land and the

proposed landscaping, including existing features and trees to be retained on the site, lighting and signage for the site;

9. Natural Resources. The Site Plan map or a separate map shall depict the following data layers from the ANR Natural Resources Atlas as they exist on the site:
 - a. The base Orthophoto.
 - b. The data layer depicting streams.
 - c. The data layer depicting shoreland buffer areas.
 - d. The data layer depicting floodplains.
 - e. The data layer depicting the Vermont Significant Wetlands Inventory (VSWI) wetlands map.
 - f. The data layer depicting deeryards.
 - g. The data layer depicting rare or endangered species.

Natural Resources data layers as depicted within the Agency of Natural Resources Atlas for the resources listed shall be considered as presumptive evidence of the location and existence of the resources on the property, or not, for the purpose of Town of Bristol subdivision permitting, except for floodplains, which must be shown on the official floodplain maps of the Town of Bristol, available at the Bristol Town offices. **Other State or federal permits may require more or additional site-specific natural resources mapping.** Applicants may perform and present additional site-specific analysis to demonstrate the actual location of the resource layers noted above.

C. Concurrent Application Material

Applicants also seeking a concurrent zoning permit for a use(s) or building(s) proposed in conjunction with the subdivision shall submit a statement indicating the other zoning provisions of these regulations that the subdivision shall need to comply with that may pertain to the proposed development;

Section 933: TIME

The application for approval of the plat, complete with all other requirements, shall be submitted to the Zoning Administrator on behalf of the Development Review Board at least twenty-five days prior to the date of the regular monthly meeting of the Development Review Board, Assuming the application is complete, the official submission date shall then be the date of the first review of the Development Review Board. The Development Review Board will set a date and place for a public hearing within 60 days of the filing of the application.

Section 934: NOTICE

Public Notice of hearing shall be given as required by the Act and shall be the same as that required in **Section 340(1)** of these Regulations.

Section 935: REVIEW PROCEDURES

The Review Procedures shall be the same as those laid out in **Section 340(2)** of these regulations. Within the procedural framework laid out in Section 340(2), the Development Review Board shall conduct its hearing to determine whether the applicant's proposed subdivision (and PUD or Zoning application if applying concurrently) complies with the review criteria listed below.

Section 936: REQUIREMENTS FOR APPROVAL OF MAJOR AND MINOR SUBDIVISIONS

Applications for both major and minor subdivisions shall be approved by the Development Review Board if the proposed subdivision complies with the standards set forth in this section (Or incorporated by reference) and required (not waived) by the Development Review Board. As noted in Section 931 the Development Review Board may waive criteria it finds inapplicable to the applicant's proposal. For example, the Development Review Board may waive review of Roads, water or wastewater where the applicant is not proposing to build any roads or structures.

Section 937: REVIEW CRITERIA

The applicant shall show that the proposed subdivision complies with the following standards:

1. Ownership and Administration. The applicant shall demonstrate that they own the property or otherwise have the legal authority to subdivide the property as proposed in the application.¹²
2. Zoning Districts, Subdivided Lots and Existing Conditions. The applicant shall demonstrate the proposed development is compatible with the A. Objectives and Guidelines, B. Allowed Uses and C. Dimensional Standards of the Town's Zoning Regulations for the Zone in which it is located.
3. PUDs. Applicants proposing their development as a PUD shall demonstrate that the waivers of lot sizes or dimensional standards promote the clustering of development in a manner that minimizes the impact on existing features, including but not limited to trees, scenic areas, brooks, streams, rock outcroppings, hilltops and ridges, water bodies, wetlands, open land, and other natural and historic features as outlined in Section 609 of these regulations governing PUDs. The Development Review Board may restrict or prohibit irregular or elongated lots and may dictate the location of structures or infrastructure to preserve existing features.
4. Water Supply and Wastewater Disposal. Applicants shall demonstrate compliance with the Wastewater System and Potable Water Supply Rules of the State of Vermont as such may be amended from time to time.
 - a. For Preliminary Plat, the Applicant shall demonstrate that the proposed subdivision plat has been designed with the input of a licensed professional engineer or site technician capable of securing a Wastewater System and Potable Water Supply permit from the State of Vermont.
 - b. For Final Plat, the Applicant shall demonstrate that the proposed subdivision has either received its final Wastewater System and Potable Water Supply Permit (State Subdivision Permit) from the State of Vermont, or where the applicant has demonstrated a State Permit application has been filed, the Development Review Board may issue a final decision conditioned upon the applicant securing a State Permit before recording the final plat.
5. Stormwater and Grading. The subdivision proposals shall include adequate provisions for the control of runoff and erosion, before, during and after construction, in accordance with the Environmental Protection Rules, Chapter 22 governing Stormwater permitting effective March 15, 2019 as it may be amended. Applicants shall demonstrate compliance with all applicable State

¹² The applicant shall prove authority by referencing the documents in the land records of the Town of Bristol evidencing ownership of the property or providing an instrument signed by the owner of the property authorizing the applicant to proceed with the subdivision application. Civil courts have jurisdiction over property disputes between landowners and the DRB will not hear evidence regarding such disputes.

of Vermont Stormwater permitting requirements for both construction and development and Section 514 of these regulations.

- a. For Preliminary Plat, the Applicant shall demonstrate that the proposed subdivision plat has been designed with the input of a licensed professional engineer or site technician capable of securing a Stormwater permit(s) from the State of Vermont.
 - b. For Final Plat, the Applicant shall demonstrate that the proposed subdivision has either received its final Stormwater Permit(s) (for either or both construction and general operation) from the State of Vermont, or where the applicant has demonstrated applicable State Permit applications have been filed, the Development Review Board may issue a final decision conditioned upon the applicant securing an appropriate State Stormwater Permit(s) before recording the final plat.
 - c. If no State permits are required, the applicant shall submit testimony from its engineer or site tech to that effect and shall submit additional evidence of the low impact development designs and infrastructure it has used to reasonably mitigate stormwater from the property both during and after construction.
6. **Transportation Infrastructure.** The applicant shall demonstrate that the proposed subdivisions shall not cause unreasonable highway congestion or unsafe conditions with respect to the current or projected use of highways, streets and roads in the Town.
- a. Roads and driveways associated with a proposed subdivision shall comply with the requirements of Town of Bristol Road Ordinance, as amended.
 - b. All roads shall have rights-of-way of at least 50 feet in width.
 - c. All new roads, whether public or private, shall comply with Vermont Agency of Transportation Vermont State Standards for the Design of Transportation Construction, Reconstruction and Rehabilitation on Freeways, Roads and Streets dated October 22, 1997, as amended, for the type of road and volume of traffic anticipated. A link to the standards is:
<https://vtrans.vermont.gov/sites/aot/files/highway/documents/publications/VermontStateDesignStandards.pdf>
 - d. All new roads must meet the approval of the Select Board. The arrangement, width and grade of all streets shall conform as closely as possible to original topography, be considered in relation to existing and planned streets, topographic conditions (Steep grades and sharp curves shall be avoided.), public convenience and safety, and be in their appropriate relation to proposed land uses.
 - e. Unless roads proposed by an Applicant are dedicated to and accepted by the Select Board, the Applicant shall plan for the maintenance of all such roads to the satisfaction of the Development Review Board.
 - f. Subdivision projects judged by the Development Review Board to generate traffic that exceeds the existing capacity of adjacent public roads or intersections may be denied, or phased in a manner allowing the improvement of said capacity to better accommodate the project or an Applicant may be required to provide for any or all of the expenses of road or intersection improvements necessitated by his or her project. If the proposed access road or driveway intersects a Class 4 Town Highway, the Development Review Board may deny the application. Alternatively, and contingent upon the approval of the Select Board, the

Commented [KCH1]: Should this be "from"

Commented [K2R1]:

Development Review Board may require the Applicant to improve the intersected road to Class 3 Town Highway construction standards.

- g. Proposed subdivisions within the Village Business (VB), Residential Office Commercial (ROC), Village Mixed (VM) and High Density Residential (HDR) zoning Districts shall contain sidewalks. Subdivisions outside the zoning districts noted above area will contain adequate provisions for pedestrian traffic in terms of safety, convenience, and access to points of destination as determined appropriate by the Development Review Board.
 - h. Streets shall be arranged as to cause no undue hardship to adjoining properties and shall be coordinated to provide for continuation of existing streets to compose an integrated system.
 - i. However, streets within a subdivision shall be planned so their use by arterial through traffic will be discouraged. If adjacent property is undeveloped, and the DRB determines that an extension on to that property will benefit the community the street must be a dead-end temporary right of way and improvements shall be extended to the property line. A temporary circular turnaround shall be provided on all temporary dead-end streets, with the notation on the plat that land outside the street right-of-way shall revert to abutting lots whenever the street is continued.
 - j. Roads shall be identified by name on the Preliminary Plat. Proposed streets that are obviously in alignment with others, already existing and named, shall bear the names of existing streets. In no case shall the names for proposed streets duplicate or be so similar to existing names as to cause confusion, irrespective of the suffix (street, avenue, boulevard, driveway, place or court). Prior to the issuance of a final plat, the Applicant shall secure approval of the name of any new street from the Emergency 911 Commission.
7. Utilities Infrastructure. Applicant shall demonstrate that Public utilities shall generally be placed according to the following specifications:
- a. Easements shall be at least twenty feet in width and indicated on the Preliminary and Final Plat and preferably located within a right of way for streets or driveways.
 - b. Where conditions are such as to make impractical the inclusion of utilities or drainage facilities within street rights of way, easements shall be provided centered on rear or side lot lines with access to the street.
 - c. The Development Review Board may require, as it deems appropriate, that easements for pedestrian access to schools, public open space or streets.
 - d. The Applicant shall coordinate the subdivision's design with the utility companies and submit a plan prepared with their cooperation showing all line extensions necessary to serve the subdivision. Such plan shall be integrated within the schematic program for distribution of service to the entire area around the subdivision now or in the future. Common rights-of-way shall be utilized whenever possible. Distribution systems should be built underground, except when affordability, technology and/or distance or terrain makes it economically unreasonable. The Applicant shall bear the responsibility of demonstrating an undue economic burden.

8. Common land and Governance.

- a. The applicant shall demonstrate that the proposed land shall be subdivided and improved in reasonable conformity to existing topography in order to minimize grading, cut and fill, and to retain, insofar as possible, the natural contours, limit storm water runoff and conserve the natural cover, screening and soil. The Development Review Board may require building envelopes surrounding the disturbed area of construction and limit cutting of trees or grading outside of such envelope. After application for approval has been made to the Development Review Board, no topsoil, sand or gravel shall be removed from the subdivision for any other purpose than to meet construction needs for that particular subdivision or to meet any requirements of these regulations.
- b. The Development Review Board may require landscaping and/or berms, as appropriate, to preserve viewsheds from roads or other sensitive areas. In the Village Planning Area, the Development Review Board may require that suitable hardwood shade trees (such as Sugar Maple, Ash or Oak) be planted along streets (generally within the road right of way) where trees do not exist. All trees shall measure at least 10 feet in height and at least two inches in diameter at breast height.
- c. The applicant has created the governance structure necessary to maintain common amenities and land, if any are associated with the subdivision.

9. Natural Resources. The applicant shall demonstrate that they have preserved or mitigated impacts on the following natural resources found to be located on or near the subdivision as follows:

- a. Streams: Demonstrate that the infrastructure and buildings proposed for the subdivision meet the setback requirements of Section 513 of these regulations.
- b. Shoreline: Demonstrate that the infrastructure and buildings proposed for the subdivision meet the State Shoreline Protection Act (This provision applies only to properties located on Bristol Pond).
- c. Floodplains: Demonstrate that the infrastructure and buildings proposed for the subdivision meet the Flood Hazard Regulations in Article VIII of these regulations.
- d. Wetlands: Demonstrate that the infrastructure and buildings proposed for the subdivision meet the State wetland regulations.
- e. Natural Communities, including deer yards and rare or endangered species: Demonstrate that the infrastructure and buildings proposed for the subdivision meet the State regulations protecting those communities.

Section 938: CONCURRENT REVIEW OF OTHER ZONING CRITERIA

Where the applicant has requested that the Development Review Board conduct a zoning review of specific uses or building planned for within the proposed subdivision, the Development Review Board shall conduct that review concurrently with, but separate from, its review of the subdivision, subject to the zoning criteria necessary to review the proposed use or structure. Concurrent review may take place either at the hearing for Preliminary or Final Plat at the request of the applicant after consultation with the Zoning Administrator.

Section 939: DECISIONS

The Development Review Board shall issue a written decision, pursuant to the requirements of Section 340(3) of these Regulations.

The decisions shall include findings of fact and conclusions as to whether the applicant satisfied all requirements of the conditions contain in Section 1037 the Review Criteria for these regulations.

Additionally, when granting Final approval to a minor subdivision plat, the Development Review Board will specifically state required conditions with respect to:

1. The changes that it will require, if any, on the Plat Plan to be recorded.
2. The character and extent of any improvements it will require.
3. Other special conditions that it may require to ensure compliance with the Review Criteria.

For major subdivisions, approval of a Preliminary Plat shall not constitute approval of the Subdivision. Prior to the approval of the Final Plat, the Development Review Board may require additional changes or additional evidence.

Decisions may also address concurrent zoning reviews but should do so in a sperate section of the decision, supported by its own findings and conditions.

FINAL PLAT REVIEW PROCESS FOR MAJOR SUBDIVISIONS

Section 941: APPLICATION

Within one year of approval of the preliminary plat, unless waived for cause by the DRB, the Applicant shall file an original digital (PDF) and one copy of the application, Final Plat Plan, any supporting Site plan Maps and all other material necessary for submittal of a complete application for approval of the Final Plat. The Final Plat shall:

1. Conform to the approved Preliminary Plat, plus any recommendations or additional information required by the Development Review Board.
2. Include a deed description and a map of survey of tract boundary made and certified by a licensed land surveyor, tied into established boundary monuments.
3. Include sufficient data to determine readily the location, bearing and length of all street, lot and boundary lines, referenced to established monuments.
4. Identify and include the location, dimensions and names of all sites for residential, commercial, industrial, public, non-public, dedicated and reserved uses.
5. Include the location, material and size of monuments.
6. Carry the following endorsements: APPROVED BY RESOLUTION OF THE TOWN OF BRISTOL DEVELOPMENT REVIEW BOARD, VERMONT, ON THE _____ DAY OF _____ 20__, SUBJECT TO ALL REQUIREMENTS AND CONDITIONS ____ OF ____ SAID RESOLUTION.
 - a. SIGNED THIS _____ DAY OF _____ 20__.
 - b. BY
 - c. CHAIRMAN _____

d. SECRETARY_____.

7. The application shall be accompanied by:

- a. Construction Details for proposed roads and driveways. Proposed roads shall be named in accordance with the guidelines in Section 1034(14) of these regulations.
- b. Construction Details of existing and proposed sanitary sewers, storm water drains, and fire hydrants, and location and size of water, gas, electricity and any other utilities or structures.
- c. A State of Vermont Water Supply and Wastewater Permit Application or permit and the supporting designs and plans. If no water or wastewater facilities are proposed as part of the subdivision, the applicant shall present the appropriate State form noting that no facilities have been approved and waiving the need for a State Subdivision Permit.
- d. Applicable State of Vermont Stormwater Permit Applications, if applicable, and the supporting designs and plans for the proposed stormwater system for the subdivision.
- e. Other applicable State of Federal Permit Applications.
- f. Offers of cession to streets and public areas and any agreements with the Selectboard pertaining to the Town of Bristol taking streets or permits issued by the Selectboard authorizing the applicant to access or work within existing Town Streets. Offers of cession must be in a form certified as satisfactory by the Town Attorney prior to their acceptance by the Selectboard. The DRB and Selectboard have the option to reject any offer of land, streets, easements or other improvements.
- g. Copies of agreements showing the way areas reserved by the Applicant are to be maintained.
- h. Draft protective covenants whereby the applicant proposes to regulate land use in the subdivision and otherwise protect the proposed development.
- i. Other information required by the Development Review Board to demonstrate the applicant complies with the review criteria contained in Section 1037 of these regulations.
- j. Applicants applying concurrently for a subdivision permit and a zoning permit(s) for uses on the property will need to provide additional information pertaining to the zoning permit review.

Section 942: HEARING NOTICE

The Development Review Board shall hold a public hearing within sixty days after it has accepted the official submission of the final application and plat for approval. The notice shall be issued pursuant to **Section 340(1)(a), subsections 1 and 2. Additionally, applicant shall be required to provide written notice of the final plat hearing to all parties that participated in the preliminary plat hearings.**

Section 943: HEARING REVIEW PROCEDURES

The Hearing shall be conducted in the same manner as the preliminary plat, pursuant to **Section 340(2)** of these Regulations.

Section 944: REVIEW CRITERIA

The applicant shall show that the proposed subdivision complies with the standards outlined in Section 1037 of these regulations, including the review criteria specifically noted for final applications, plus the additional technical recording requirements for the final plat plan.

Section 945: DECISION

The Development Review Board shall, within 45 days after completing and closing the hearing, issue a written decision, which shall include findings of fact, any conditions, and provisions for appeal. It shall within that period send the applicant, by certified mail, a copy of the decision. Copies of the decision shall also be mailed to every interested person who appeared and was heard at the hearing. A copy of the decision shall be filed with the zoning administrator and the town clerk who shall record the decision as a public record. When granting approval to a Final Plat, the Development Review Board will state the conditions with respect to:

1. The character and extent of all required improvements and conditions related to the town's acceptance of those improvements, if any.
2. The amount, conditions and timing of any bonds that the town will require, if any.
3. The issuance of the state or other permits noted above and compliance with them.
4. The phasing of the development, as it deems necessary from the testimony presented to assure orderly development.
5. The terms of offer and acceptance for any property to be transferred to the town.
6. Other special conditions that it may require to ensure compliance with the Review Criteria; and
7. If the Development Review Board conducts a concurrent hearing on other zoning criteria for proposed uses or structures within the subdivision, the development Review Board will state separate findings and conditions with respect to that review.

If the Development Review Board fails to decide within 45 days, on the 46th day the Development Review Board shall be deemed to have rendered a decision in favor of the applicant.

Section 950: REQUIRED IMPROVEMENTS

Required improvements shall be installed to the satisfaction of the Zoning Administrator or town engineer prior to approval of Final Plat, or alternatively, the Applicant may post a performance bond.

Section 951: BONDING REQUIREMENTS

Where a performance bond is required by the Development Review Board, the Applicant shall file with the Town a bond in an amount sufficient to provide for, and secure to the public the full cost of completion of all streets, other required improvements, and their maintenance for a period of two years. The bond must be submitted and approved by the Development Review Board and Town Attorney as to form, sufficiency, manner of execution and surety, for completion of required improvements. The Development Review Board shall specify the time period within which the required improvements must be completed, but in no case for a longer term than three years, unless agreed to by the Applicant. The time period shall be expressed in the bond. Upon completion of the work secured by the bond, prior to the bonds release, the Zoning Administrator or Town Engineer must file a certificate stating that all required improvements constructed by

the Applicant have been designed and inspected and meet standards in these Regulations, and are as required by law. If any required improvements have not been installed or maintained as provided within the term of such bond, the Town may deem the bond forfeited and use the proceeds to install or maintain such improvements.

Section 952: PUBLIC ACCEPTANCE OF STREETS AND IMPROVEMENTS

1. Every street shown on a plat filed or recorded as provided in these Regulations shall be deemed to be a private street until such time as the Town has formally accepted it.
2. No public street, utility or improvement may be constructed by the Town until it has been accepted and become a public street.
3. Approval of the Final Plat shall not be deemed to constitute or imply acceptance of any street or park shown on the Plat.
4. Upon completion of the construction and installation of required improvements in accordance with the approved plans, the Applicant shall deliver to the Town deeds, abstracts and easements for streets, parks, water lines, storm sewers, sanitary sewers and other required improvements.
5. Prior to public acceptance of any required improvements, the Applicant shall submit an affidavit stating that all bills and accounts for material and labor used in the construction of improvements have been paid in full.

Section 960: FILING OF APPROVED FINAL PLAT

When the Final Plat is approved, the Applicant shall:

1. Deliver a Mylar of the plat for execution by the DRB and filing to the Town Clerk within 180 days from the date of approval, plus three copies of the final plat, and, when available, a pdf of the plan emailed to the DRB. Delivery of the Mylar to the clerk does not relieve the Applicant of the duty to ensure that the Mylar is executed and filed in the land records within 180 days from the date of approval. The Final Plat shall be endorsed with the necessary agreements in connection with required easements or releases after the Development Review Board has had the opportunity to coordinate with the Selectboard.
2. The Plat is void if changes are made to it after the Development Review Board has endorsed it in writing.
3. After recording with the Town Clerk, the Plat shall become part of the Official town records.

Section 970: APPEALS

Interested parties who participated in the proceeding before the Development Review Board may appeal the Development Review Board's decision and should file their appeal as outlined in Section 399 of these regulations and 24 V.S.A. §4471.

ARTICLE X: DEFINITIONS

SECTION 1000: DEFINITIONS

Except where specifically defined herein, all words used in these Regulations shall carry their customary meanings. Words used in the present tense include the future, and the singular includes the plural; the word "lot" includes "plot"; the word "shall" is mandatory; "occupied" or "used" shall be considered as though followed by "or intended, arranged, or designed to be used or occupied"; "person" includes individual, partnership, association, corporation, company, or organization; and the word "street" is synonymous with "road." The definitions addressing issues in Article VIII of these regulations addressing Flood Hazard Areas are contained in this section and denoted by the symbol "FH" prior to the definition. Similarly, definitions associated with Article IX of these regulations, addressing Subdivisions, are contained in this section and denoted by the symbol "S" prior to the definition. Doubt as to the precise meaning of any word used in these Regulations shall be clarified by the Planning Commission. Within this document the terms "bylaws" and "Regulations" are used interchangeably.

ACCESSORY DWELLING UNIT: See SECTION 404 herein.

ACCESSORY BUILDING OR USE: A building or use incidental, subordinate and reasonably necessary to the conduct of the principal structure or use. Accessory building or use does not include any building or portion thereof used for living purposes.

ACCESSORY ON FARM BUSINESS: See Farm, Accessory on Farm Business.

FH- ADMINSTRATOR: The Federal Emergency Management Administration

AGRICULTURE: The cultivation, clearing or other use of land for growing food, fiber other than wood, Christmas trees, maple sap, or horticultural and orchard crops; the raising, feeding, or management of livestock, poultry, fish, or bees; the operation of greenhouses; the production of maple syrup; the on-site storage, preparation and sale of agricultural products principally produced on the farm; the on-site production of fuel or power from agricultural products or wastes produced on the farm; the raising, feeding, or management of four or more equines owned or boarded by the farmer, including training, showing, and providing instruction and lessons in riding, training, and the management of equines.

AGRICULTURAL USE: Land or structure used for raising livestock, growing agricultural or forest products, storing agricultural equipment, or, as an accessory use, selling agricultural products raised on the property. See also Silvicultural use, which covers forestry operations. The Town of Bristol desires to protect the rights of owners to use working lands, whether they are used for agriculture, forestry or both. Therefore, these two working land uses should be read to be complimentary and work in conjunction with one another.

ALTERATION: Structural changes, rearrangement, change of location or addition to a building.

FH- AREA OF SPECIAL FLOOD HAZARD: The land in the flood plain within a community subject to one percent or greater chance of flooding each year. The area includes all A zone designations on the FIRM, or, in the absence of the FIRM, on the FHBM. It does not include Zones Band C.

ARTIST/CRAFTSPERSON STUDIO: An establishment occupying less than 10,000 sq. ft. for the creation, preparation, assembly, display and/or sale of individually crafted artwork, jewelry, furniture, sculpture, pottery, cabinetry, leather craft, hand-woven articles, woodcrafts and other related items. Studios larger than 10,000 square feet shall be treated as Class 2 or Class 3 light industrial manufacturing facilities depending upon the facility's size.

AUTO REPAIR SHOP: See " Vehicle Service Station" or "Repair Shop".

BAR: An establishment whose principal business is the serving of alcoholic beverages at retail for consumption on the premises, which may also offer patrons food for consumption on the premises.

FH- BASEFLOOD: The flood having a one percent chance of being equaled or exceeded in any given year.

BASEMENT: Story partly underground. A basement shall be counted as an above ground story if the vertical distance between the basement ceiling and the average grade level of the adjoining ground is more than six feet.

BED AND BREAKFAST (B&B): A place of lodging located on owner-occupied single-family residential property, which provides not more than 6 rooms for occupancy by transient guests for compensation and which serves meals only to overnight guests and not to the general public.

BOARDING HOUSE: An owner-occupied, single-family dwelling with one common kitchen facility that provides lodging for not more than 6 people on a long-term non-transient basis for compensation and where meals may be provided to boarders, but not other guests.

S: BOUNDARY ADJUSTMENT: Any revision to a plat record or deed legally filed in the Town's land records which creates no new building lot(s) and which has no impact on roads, rights-of-way or other public facilities; i.e., a case in which the owners of two abutting properties wish to move a common boundary, without the intent to create an additional lot. A boundary adjustment shall not be considered a subdivision under the terms of these Regulations.

BUILDING: Structure having a roof supported by columns or walls and intended for the shelter or enclosure of persons, animals, or personal property. Includes any carport, porch, terrace and deck, but excludes steps.

BUILDING AREA: Total of areas taken on a horizontal plane at the main finished grade level of the principal building and all accessory buildings, including carports, porches, terraces, and decks. Any solar collection device or related apparatus not included on floor area of a building not included. All dimensions shall be measured between exterior faces of walls.

BUILDING FRONT LINE: Line parallel to the road line transecting that point in the building face, which is closest to the road line.

BUILDING HEIGHT: Vertical distance measured from the highest elevation of a principal side of the proposed or actual finished grade of the building to the highest point of the roof.

BUILDING REAR LINE: Line parallel to the road line transecting that point in the building face, which is farthest from the road line.

BUILDING SIDELINE: Line parallel to the nearest side lot line transecting that point of the building face, which is nearest the side lot line.

BUSINESS SERVICES: Establishments primarily engaged in providing services to other businesses on a fee or contract basis (e.g., advertising, mailing, building maintenance, consulting services, equipment leasing, copying and printing, etc.) and which does not include the on-site retail sale of goods except as incidental to principal activity occurring on the premises.

BUSINESS YARD: A site used primarily to store and maintain construction, landscaping or similar heavy equipment and other materials and facilities customarily required by a contractor in the building, landscaping, or construction-related trades or similar businesses, and where the majority of business activity takes place off-site. May include associated office space and/or enclosed areas for vehicle or equipment repair or maintenance. Does not include regular or ongoing sale of equipment.

CAMP, PRIMITIVE: Primitive camps, with no interior plumbing consisting of more than a sink with water, will be allowed provided they are used for no more than 3 consecutive weeks per year, and no more than a total of 60 days per year. However, owners that can demonstrate that they use the camp more than the timeframe above and that the current level of use existed before January 1, 2007, will be allowed to continue using the camp at the level of use established prior to January 1, 2007. This date is significant as that use means that the camp is exempt from the permit requirements of the State Wastewater System and Potable Water Supply Rules under the "Clean State" exemption. The purpose of this guideline is to create a local permitting regime consistent with the state wastewater and potable water supply requirements and exemptions.

CAMP, SEASONAL: Seasonal camps, whether or not they have internal plumbing, that are used for 180 days per year or less will be allowed. Existing seasonal camps will be allowed to continue at the current level of use if the owner can demonstrate that the current level of use existed before January 1, 2007. This date is significant as that use means that the camp is exempt from the permit requirements of the State Wastewater System and Potable Water Supply Rules under the "Clean State" exemption. The purpose of this guideline is to create a local permitting regime consistent with the state wastewater and potable water supply requirements and exemptions.

CAMPER: Any vehicle mounted on wheels and used as sleeping, camping, or living quarters. This includes a camper body mounted on a truck and excludes mobile homes.

CAMPGROUND: A site in common ownership offering short-term or seasonal lodging to the general public or members in tents, recreational vehicles, camps or cottages, whether these exist on the site and are rented out to lodgers, or are brought onto the site by the lodgers. May include personal service, recreational, and food preparation and dining facilities available for use by lodgers as accessory uses.

CAR WASH: A facility designed for the washing and cleaning of vehicles, which offers automatic and/or manual washing bays that contain or recycle the washing liquid according to accepted industry standards.

CATERING SERVICE: An establishment where food and drink are prepared before being transported and served at a remote location.

CEMETERY: A place used for interment of human or animal remains or cremated remains, including a burial park for earth interments a mausoleum for vault or crypt interments and/or a columbarium for cinerary interments.

CERTIFICATE OF COMPLIANCE: It shall be unlawful to use or occupy or permit the use or occupancy of any land or structure, or part thereof, created, erected, changed, converted, or wholly or partly altered or enlarged in its use or structure, unless a Certificate of Compliance has been issued therefore by the Zoning Administrator stating that the proposed use of the land or structure conforms to the provisions of these Regulations. In the case of a structure, the Zoning Administrator shall inspect the site prior to pouring the footings and again when the structure is completed and deemed by the owner to be ready for occupancy before issuing a Certificate of Compliance.

CHILD CARE CENTER OR HOME: See "Daycare Facility" or "Family Childcare Home".

CLINIC: See Healthcare Clinic.

CLUB: A building, site or complex operated for a social, educational or recreational purpose to which membership or invitation is required for participation or use of the premises.

S: CLUSTER DEVELOPMENT: A development in which building lots may be reduced in size and buildings may be sited closer together, usually in groups or clusters, provided that the total development density does not exceed that which could be constructed on the site under conventional zoning and subdivision regulations. The additional land that remains undeveloped is preserved as open space and recreational-use land. See Planned Unit Development.

COMMERCIAL USE: The business of providing goods, services or facilities for sale or distribution, on a profit or nonprofit basis, except for light or heavy industry, home occupations, forestry or agricultural uses, public utility facilities and lines, roads and outdoor recreation.

COMMUNICATIONS ANTENNA: An exterior apparatus designed for telephonic, radio, data, internet, television or other communications through the sending or receiving of electromagnetic waves, including equipment used to provide personal wireless services. This definition specifically excludes towers or other structures upon which antennas may be mounted.

COMMUNICATIONS FACILITY: A place hosting communications equipment including both towers and antenna.

COMMUNICATIONS TOWER: Any ground-mounted pole, spire, structure, or combination thereof, including supporting lines, cables, wires, braces, masts, intended primarily for mounting a communications antenna above ground.

COMMUNITY FACILITY: Any meeting hall, place of assembly, museum, art gallery, library,

school, church, or other similar type of establishment that is not operated primarily for profit, excluding government facility. Also, includes non-profit daycare facility, rescue squad building or fire department building.

COMMUNITY CENTER: A building, site or complex used as a place of meeting, recreation or social activity, which is generally open to the public and not operated for profit.

COMMENCEMENT OF CONSTRUCTION: Construction on a project shall be deemed to have started when the permit holder breaks ground on the project. This may include clearing, installing infrastructure or beginning construction on a building.

CONDITIONAL USE: Use which may be permitted only by approval of the Development Review Board after public notice and public hearing to determine whether the proposed use will conform to general and specific standards as set forth or referred to in these Regulations and pursuant to SECTION 4414(3) of the Act. Or other uses (e.g. light commercial, retail, etc.) upon the finding by the Development Review Board that such uses are of the same general character as those permitted in the district and which will not adversely impact other uses in the district or adjoining districts.

CONDOMINIUM: See "Dwelling - Multiple Family".

CONFORMITY: A lot, parcel, structure (or part of a structure), or use of land, that conforms to these Regulations.

CREMATORIUM: A building built solely for the purpose of cremation and complying with State licensing requirements.

CULTURAL FACILITY: An institution providing for the documentation, display, performance or enjoyment of heritage, culture, history, science or the arts such as a library, museum, interpretative site or performance venue, which is owned or operated by a public or non-profit entity.

DAYCARE FACILITY: A facility providing care for eleven or more children, the elderly, or individuals with disabilities in a protective setting for a portion of a 24-hour day.

S: DEFERRAL OF PERMIT: An arrangement in which the subdivider agrees, by means of the inclusion of a restrictive covenant in the deed for the subdivided lot, that no development requiring the installation of a wastewater disposal system will be undertaken on the lot unless the appropriate permits have been applied for and granted.

DEVELOPMENT: The division of a parcel into two or more parcels, the construction, reconstruction, conversion, structural alteration, relocations, or enlargement of any building or other structure, or of any mining, excavation, filling, paving, drilling, driving of piles, dredging land clearing, grading or permanent storage of materials and/or equipment, and any change in the use of any building or other structure, on land, or extension of use of land. Development includes any man-made change to improved or unimproved real estate including activities conducted by government agencies including roads and bridges.

DRIVEWAY: A roadway or passageway intended for vehicular use, which provides access to and from a public highway. Said use affects the rights of way of public highways as the affect pertains to Title 19 VSA Paragraph 1111. This definition includes the term "curb cut".

DWELLING, ACCESSORY: A secondary dwelling established in conjunction with and clearly subordinate to a primary dwelling, whether a part of the same structure as the primary dwelling or within an accessory structure on the same lot. (See SECTION 404 of these Regulations.)

DWELLING, MULTI-FAMILY. A building, or portion thereof, designed exclusively for occupancy by three or more families or households living independently of each other in individual dwelling units; or a portion of a mixed-use building designed for use as one or more rental dwellings.

DWELLING, SINGLE-FAMILY: A building or portion thereof, designed exclusively for occupancy by one family or household living independently in an individual dwelling unit.

DWELLING, TWO-FAMILY: A building or portion thereof, designed exclusively for occupancy by two families or households living independently of each other in individual dwelling units. Also, known as a duplex.

DWELLING UNIT: Building or part thereof used as living quarters for one family. The terms "dwelling," "single-family dwelling," "two-family dwelling," or " multiple-family dwelling" shall not include a boarding house or motor lodge. Dwellings include primitive or seasonal camps.

EDUCATION FACILITY: An institution providing instruction to students that is operated under state licensing and/or professional accreditation and including accessory structures and uses traditionally associated with a program of study.

EMERGENCY SERVICES FACILITY: A building, or part thereof, that is operated by a governmental or non-profit agency to provide emergency response services, which may include administrative offices, meeting and training facilities, emergency shelter, equipment and vehicle storage, and/or associated accessory uses and facilities.

EXTRACTION: The commercial taking, by digging, of sand, gravel, soil or other loose material from an embankment or pit, usually open to the sky.

FAMILY: One or more persons living, sleeping, cooking, & eating on the same premises as a single housekeeping unit.

FAMILY CHILDCARE HOME: Provision of-childcare services for children within a dwelling in accordance with SECTION 409 of these Regulations and all applicable state laws.

FARM: Means a parcel or parcels owned, leased, or managed by a person, devoted primarily to farming, and subject to the **RAP rules**. For leased lands to be part of a farm, the lessee must exercise control over the lands to the extent they would be considered as part of the lessee's own farm. Indicators of such control include whether the lessee makes day-to-day decisions concerning the cultivation or other farming-related use of the leased lands and whether the lessee

manages the land for farming during the lease period. **"RAP rules"** means the rules on required agricultural practices adopted pursuant to 6 V.S.A. chapter 215, subchapter 2.

FARM, ACCESSORY ON FARM BUSINESS: "Accessory on-farm business" means activity that is accessory to a farm and comprises one or both of the following:

1. The storage, preparation, processing, and sale of qualifying products, provided that more than 50 percent of the total annual sales are from qualifying products that are principally produced on the farm at which the business is located.
2. (II) Educational, recreational, or social events that feature agricultural practices or qualifying products, or both. Such events may include tours of the farm, farm stays, tastings and meals featuring qualifying products, and classes or exhibits in the preparation, processing, or harvesting of qualifying products. As used in this subdivision (2), "farm stay" means a paid, overnight guest accommodation on a farm for the purpose of participating in educational, recreational, or social activities on the farm that feature agricultural practices or qualifying products, or both. A farm stay includes the option for guests to participate in such activities.

FARMING: Shall have the same meaning as in 10 V.S.A. § 6001. and shall include the following qualifying products. **"Qualifying product"** means a product that is wholly:

1. an agricultural, horticultural, viticultural, or dairy commodity, or maple syrup;
2. livestock or cultured fish or a product thereof;
3. a product of poultry, bees, an orchard, or fiber crops;
4. a commodity otherwise grown or raised on a farm; or
5. a product manufactured on one or more farms from commodities wholly grown or raised on one or more farms.

FARM PRODUCT SALES: A structure or site for the seasonal or periodic sales of locally produced farm products, including value-added products.

CLASS 1. A farm product sales use that is operated not more than 270 days in any calendar year, and which sells only farm products grown or produced by the operator or property owner.

CLASS 2. All other farm product sales.

FARM-WORKER HOUSING: Any living quarters, dwelling, boarding house, bunkhouse, or other housing accommodations, maintained exclusively for the occupancy of farm employees and their families in connection with a farm or place where farming is undertaken.

FH- FEMA: Federal Emergency Management Agency

FENCE: Structure or vegetation used primarily for enclosing or screening.

FH- FHBM: Flood Hazard Boundary Map; An official map of a community, on which the administrator has delineated both the areas of special flood hazard and the risk premium zones

applicable to the community. A FHBM is issued before the FEMA has conducted a flood study of the community.

FINANCIAL SERVICES: A use that provides financial and banking services to consumers or clients such as banks, savings and loans associations, credit unions, lending establishments and automatic teller machines.

FINISHED GRADE: Completed surfaces of ground, lawn, walks, paved areas and roads brought to grade as shown on plans relating thereto.

FH- FIRM: Flood Insurance Rate Map; An official map of a community, on which the Administrator had delineated both the areas of special flood hazard and the risk premium zones applicable to the community. A FIRM is issued after FEMA has completed a flood study of the community.

FH- FLOODPROOFED OR FLOOD PROOFING: Any combination of structural and nonstructural additions, changes, or adjustments to structures that reduce or eliminate flood damage to real estate or improved real property, water and sanitary facilities, structures and their contents.

FH- FLOODWAY: The channel of a river or other water course and the adjacent land areas that must be reserved in order to discharge the base flood without cumulatively increasing the water surface elevation more than one foot.

FLOOR AREA: Sum of the gross horizontal area of the floors of a building, excluding basement floor areas. All dimensions shall be measured between interior faces of walls.

FORESTRY/FORESTRY USES: See Silviculture.

FRONT YARD SETBACK: Is the distance from the building front line to the center of the roadway.

GOVERNMENT OFFICE: A building, complex or site publicly owned, operated and/or occupied that is used for administering and conducting the affairs of government. This definition specifically excludes emergency services facilities.

GROCERY STORE: A retail store primarily selling prepackaged and perishable food, but which may also stock other convenience, personal care and household goods.

GROUP HOME: A single-family dwelling operated under state licensing or registration, serving as a residence for not more than 8 individuals who have a handicap or disability in accordance with SECTION 406 of these Regulations.

HEALTHCARE CLINIC: A Non-residential office building used by members of the medical professions for the diagnosis and out-patient treatment of human ailments.

HEALTHCARE FACILITY: See Residential Healthcare Facility.

HOME BUSINESS: The accessory use of residential property for an occupation, profession, business or industry carried on for gain by at least one resident of the property that complies with the requirements of SECTION 606 of these Regulations.

HOME OCCUPATION: The accessory use of a minor portion of a dwelling for an occupation, profession, business or industry carried on for gain by one or more residents of the dwelling that complies with the requirements of SECTION 408 of these Regulations.

HORTICULTURE: The science and art of growing fruits, vegetables, flowers, or ornamental plants.

HOSPICE: A residential facility where help is available for those who can no longer benefit from treatment to die as comfortably as possible, sharing among neighbors and friends, and where there is help to support and prepare their families for the period of bereavement.

HOTEL: A building or complex of greater than 12 lodging rooms in which lodging is provided and offered to transient guests for compensation, and which also may provide incidental services including meals and recreation to paying guests. A hotel shall not include a restaurant open to the public unless approved as a mixed use.

IMPERVIOUS SURFACE COVERAGE: That percentage of the lot area covered by building area and asphalt or concrete paving or compacted gravel surfaces.

INDUSTRY, HEAVY: Heavy industrial uses engage in the large-scale (>25,000 sq. ft.) storage or manufacturing of products or processes that are harmful to the environment or pose significant risks to our residents. No heavy industrial uses shall be permitted in Bristol, including but not limited to heavy industrial uses whose processes rely on or produce: explosives, radioactive materials, petroleum refining, steel and iron manufacturing (Does not include the fabrication or welding of pre-existing metals), cement production, or paper, pulp or pulp/mash/slurry manufacturing.

INDUSTRY, LIGHT: The processing, assembly, distribution or packaging, of natural or man-made products where such activity results in no substantial off-site impacts and all such activity and storage of raw or finished products is enclosed in a building or is screened from abutting properties and public right-of-way. Such uses include but are not limited to the following: cabinet or furniture manufacturing; food processing; electronics manufacturing or assembly; machine shop; monument or stone works; sewing; printing; warehousing; wholesale trade; (or) research and testing laboratory; and other similar uses not of a commercial or retail nature with minimal need of customer traffic to facility. All light industrial uses may use up to 20% of their total structural space for retail sales of the products produced in that facility. Light industrial uses shall be classified as follows:

CLASS 1: A light industrial use that occurs entirely within an enclosed structure, occupies less than 10,000 square feet and does not process or produce flammable, explosive or hazardous materials.

CLASS 2: A light industrial use that either occurs entirely within an enclosed structure and/or has outdoor material storage that is fully screened year-round from adjoining properties and public rights-of-way, occupies less than 25,000 square feet and does not process or produce flammable, explosive or hazardous materials.

CLASS 3; Class III light industrial uses include industrial uses with a greater potential impact on either the community or neighboring properties because they include uses with a total square footage of more than 25,000 sq. ft. of storage (whether indoor or outdoor) or production area,

INN/GUEST FACILITY: A building or site that contains a dwelling unit occupied by an owner or resident manager from which not more than 12 lodging rooms are offered to transient guests for compensation, and from which meals may be served to guests and the general public.

KENNEL: An establishment, in which 3 or more mature domesticated animals are housed, boarded, cared for, groomed, bred, trained or sold for fee or compensation.

LAND DEVELOPMENT: See “Development”

LANDFILL: A site operated under state permits for disposal of waste in an engineered land burial facility.

LOADING SPACE: Off-street space, which is at least twelve feet wide, forty feet long, and fourteen feet high, not including access driveway, and having direct access to a road used for the temporary location of one licensed motor vehicle.

LOT: Land and premises, with or without buildings, having not less than the minimum area, width, and depth required for a lot in the district in which such land is situated and having frontage on a road or other means of access as may be required elsewhere in these Regulations. See SECTIONs 405 and 407.

LOT AREA: Total area within the property lines excluding any part thereof lying within the boundaries of a public road or proposed public road.

LOT, CORNER: Lot which has an interior angle of less than 135 degrees at the intersection of two roads.

LOT COVERAGE: That percentage of the lot area covered by the building area.

LOT DEPTH: Mean horizontal distance from the road line of the lot to its opposite rear line measured at right angles to the road line.

LOT FRONTAGE: Distance measured across the width of the lot at the road.

LOT LINE: Property lines bounding a lot.

LOT LINE, REAR: The lot line opposite and most distant from the street line.

LOT WIDTH: Width measured at right angles to its lot depth, at the proposed or existing building front line.

LUMBER YARD: An establishment where lumber, other building materials and incidental building supplies, tools, equipment and wood products are sold at retail and wholesale.

MANUFACTURED HOME: A structure, transportable in one or more SECTIONS, which is built on a permanent chassis and designed to be used with or without a permanent foundation when connected to the required utilities. It does not include recreation vehicles or travel trailers.
Manufactured Home Park or Manufactured Home Subdivision: A parcel of land divided into two or more manufactured home lots for rent or sale.
MANUFACTURING. See INDUSTRY, "HEAVY" or "LIGHT"

MEDIA STUDIO; An establishment containing one or more broadcasting studios for over-the-air, cable, satellite or internet delivery of performances or programs; or studios for the recording or filming of audio and/or visual performances or programs. This definition specifically excludes communication antennas and towers.

MOBILE HOME: A prefabricated dwelling unit which is designed for long-term and continuous residential occupancy is designed to be moved on wheels and is ready for occupancy upon arrival at the site except for incidental unpacking, connections with utilities, and placement upon supports or foundations.

MOBILE HOME PARK: Any parcel of land under single or common ownership or control which contains, or is designed, laid out, or adapted to accommodate, two or more mobile homes.

MOTOR VEHICLE SERVICE FACILITY: See Vehicle Service Station.

NATURE PRESERVE: Areas intended to remain in a predominately natural or undeveloped state to provide resource protection, which may include limited facilities for passive recreation and environmental education.

FH- NEW CONSTRUCTION: Structures commenced on or after the effective date of this ordinance.

NONCONFORMING LOTS OR PARCELS: Lots or parcels that do not conform to the present bylaws covering dimensional requirements but were in conformance with all applicable laws, ordinances and Regulations prior to the enactment of the present bylaws, including a lot or parcel improperly authorized as a result of error by the administrative officer.

NONCONFORMING STRUCTURE: a structure or part of a structure that does not conform to the present bylaws but was in conformance with all applicable laws, ordinances, and Regulations prior to the enactment of the present bylaws, including a structure improperly authorized as a result of error by the administrative officer.

NONCONFORMING USE: use of land that does not conform to the present bylaws but did conform to all applicable laws, ordinances, and Regulations prior to the enactment of the present bylaws, including a use improperly authorized as a result of error by the administrative officer.

NONCONFORMITY: a nonconforming use, structure, lot or parcel.

NURSERY: The direct-to-customer or mail-order retail or wholesale sales of any article, substance or commodity related to the planting, maintenance or harvesting of garden plants, shrubs, trees, packaged fertilizers, soils, chemicals, or other nursery goods and related products.

NURSING HOME: A building for the care of convalescent or aged people.

OFFICE: A room, group of rooms or building used for conducting the affairs of a business, profession, organization or service industry, and which does not include the on-site retail sale of goods except as incidental to principal activity occurring on the premises

OPEN AIR MARKET: A retail establishment operated primarily outside an enclosed building, which may be open on a seasonal or periodic basis. This definition specifically excludes motor vehicle, RV or modular home sales, lumberyards, and farm equipment sales.

PARKING SPACE: Off-road space used for the temporary location of one licensed motor vehicle, such space being at least nine feet wide and twenty-two feet long not including access driveway and having direct access to a road.

PERMITTED USE: Use specifically allowed in the district, excluding illegal uses and non-conforming uses. Permitted uses may or may not be subject to Site Plan Review. See Site Plan Review.

PERSON; As used herein, the word "person" includes individual, group of individuals, partnership, association, corporation, company or organization.

PERSONAL SERVICE: An establishment engaged primarily in providing services direct to consumers involving the care of a person or of personal goods (e.g., laundry, dry cleaning, beauty and barber shops, shoe repair and tailoring, funeral services, photographic studios, domestic services, etc.) other than healthcare or daycare uses, and which does not include the on-site retail sale of goods except as incidental to principal activity occurring on the premises. These are businesses which are limited in nature and do not greatly impact community facilities such as streets, water and sewage capacities.

PLACE OF WORSHIP: A site, building or complex used for regular organized religious assembly, ceremonies or purposes. May include associated facilities such as a rectory, convent, daycare, school, meeting hall, administrative offices or cemetery.

PLANNED UNIT DEVELOPMENT (PUD): Means one or more lots, tracts, or parcels of land to be developed as a single entity, the plan for which may propose any authorized combination of density or intensity transfers or increases, as well as the mixing of land uses. This plan, as authorized, may deviate from regulation requirements that are otherwise applicable to the area in which it is located with respect to lot size, bulk, or type of dwelling or building, use, density, intensity, lot coverage, parking, required common open space, or other standards.

PLAT: A plan, map or chart record describing a plot of land.

POLICE STATION; A building, or part thereof, that is operated by a governmental or non-profit agency to provide law enforcement services, which may include administrative offices, meeting and training facilities, equipment and vehicle storage, temporary detention facilities, and/or associated accessory uses and facilities.

POST OFFICE: A building or part thereof, that operates primarily to provide U.S. Postal mail service to the general public including facilities for sending and receiving packages and letters.

PROFESSIONAL OFFICE: Professional office including architect, accountant, dentist, doctor, lawyer, engineer, psychologist, or other similar occupation and constitutes a subset of “Office”. See Office.

PUBLIC WORKS FACILITY: A publicly operated facility for the storage and maintenance of vehicles, equipment and materials used for highway and similar infrastructure maintenance and construction; the collection, distribution, treatment and/or storage of potable water, wastewater or stormwater; or for the collection, processing and short-term storage of solid waste, recyclables and similar refuse.

QUARRYING: The commercial taking, by cutting or blasting, of rock, building stone, slate, marble or the like, from an embankment or pit, usually open to the sky.

RECREATION, INDOOR: A recreational use operated entirely within an enclosed building (e.g., arcade, arena, bowling alley, pool hall, health club, etc.).

RECREATION, OUTDOOR: A recreational use conducted primarily in the open or in partially enclosed or screened facilities (e.g., athletic fields, sports courts, tracks, trails, etc., excludes shooting and motorized sports).

RECREATIONAL VEHICLE: See Camper. Also, includes all-terrain vehicles, snowmobile, etc.

REPAIR SHOP: An enclosed facility for the service or repair of household appliances, small engines, recreational vehicles and similar types of equipment. Does not include repair or service of any vehicle that can legally be driven on a public road.

RESERVOIR: A pond, lake, tank or basin, whether natural or built, used for the storage, regulation and control of water for recreation, power generation, flood control, drinking or similar use.

RESIDENTIAL HEALTHCARE FACILITY: An institution operated under state licensing that provides primary health services, medical, surgical, nursing or hospice care, primarily on an in-patient basis. This definition specifically excludes hospitals.

RESORT: An establishment or development that provides accommodations and related services transient guests, seasonal renters and/or dwelling unit owners for compensation, and where the primary attraction is recreational facilities or activities. May include facilities and services that are open to the public.

RESIDENTIAL USE: Single family dwelling, two-family dwelling, or multiple-family dwelling.

RESTAURANT: An establishment where food and drink are prepared, served and consumed, which offers indoor seating for patrons. A minimum of 60% of gross sales must be generated by the sale of food.

S: RESUBDIVISION: A change of a recorded subdivision plat record or deed if such change affects any road layout on such plat record, or area reserved thereon for public use, or any change of a lot line (other than a boundary adjustment (*q.v.*)), or any such change that affects any map or plan which has been legally recorded.

RETAIL STORE: An enclosed building housing an establishment offering a specified line of goods or services for retail sale direct to walk-in customers. Retail uses shall be classified as follows:

RETAIL STORE, CLASS 1: A retail, without drive-through service, which occupies less than 5,000 square feet.

RETAIL STORE, CLASS 2: A store, other than Class 1 Retail, which occupies less than 10,000 square feet.

RETAIL STORE, CLASS 3: A store that occupies 10,000 square feet or more.

RETIREMENT COMMUNITY: Residences for senior citizens or people with disabilities that provide rooms, meals, personal care and/or supervision of self-administered medication. Other services such as recreation, financial services and transportation may also be provided. May include private dwelling units, apartments and/or congregate housing.

RETREAT CENTER: A facility used for professional, educational, health, spiritual or religious conclaves, meetings, conferences, seminars, training or care that may provide meals, housing and recreation for participants during the period of the retreat or program. This definition specifically excludes offering meals or overnight accommodations to the general public.

RIGHT -OF- WAY (ROW): Boundary line of a road as described by deed or proper instrument of record. The Right-of-Way boundary line of a road as described by a deed or other proper instrument of record, where the width of the road is not established, the road side line shall be considered to be twenty-five feet from the center line of the road.

ROAD: Public way for vehicular traffic which affords the principal means of access to abutting properties.

ROADLINE: The centerline of the existing roadway.

ROOMING HOUSE: See "Boarding House".

RURAL/AGRICULTURAL PLANNING AREA: One of three planning areas defined in the Bristol Town Plan. These zoning regulations implement the vision for each of these planning areas as defined by the town plan. The Rural/Agricultural Planning Area in Bristol generally includes lower elevation land in Bristol outside the Village that is either used for agriculture or low density rural residential development. The Rural/Agricultural Planning Area is depicted on the Zoning Map contained herein. Zones within the Rural/Agricultural Planning Area include: Rural/Agricultural Zones (RA-1, RA-2, RA-5) and the Commercial Zone adjacent to the Village Planning Area (C-1).

RURAL/CONSERVATION PLANNING AREA: One of three planning areas defined in the Bristol Town Plan. These zoning regulations implement the vision for each of these planning areas as defined by the town plan. The Rural/Conservation Planning Area in Bristol generally includes mountainous areas, steep slopes and some environmentally sensitive areas. The Rural/Conservation Planning Area is depicted on the Zoning Map contained herein. The Conservation Zone (CON-25) and Bristol Pond Camp Zone (BPC) lie in the Rural/Conservation Planning Area.

SALVAGE YARD: A site used for storing, selling, dismantling, shredding, compressing or salvaging scrap or discarded materials, vehicles or equipment, including a junkyard as defined in state law.

SANITARY LANDFILL: Land used for the disposal by abandonment, dumping, burial, burning, or any other means and for whatever purpose, of garbage, sewage, trash, refuse, junk, discarded machinery or vehicles or parts thereof.

SAWMILL: An operation, facility, equipment or machine that has as its primary purpose, the sawing, planing refining or processing of logs, trees or rough timber into rough slabs, firewood, lumber, wood chips, wood pellets, flooring, paneling or similar value-added wood product manufacturing. Sawmills include storage of raw materials and finished products.

SELF-STORAGE: A building, part of a building, or complex of buildings containing separate, individual and self-contained storage compartments available for lease or rent for the storage of personal property.

SETBACK: Distance between buildings and property lines or road centerline or, in the case of public waters, the distance from the normal high-water mark.

SERVICE AREA: A designated space used for waste storage or pickup, utility areas, or for the delivery of goods and services to any building or land use.

SERVICE STATION/CONVENIENCE STORE: Any structure or area of land used for the retail sale of automobile fuels, along with oils and/or accessories. May include accessory uses such as: retail sales of convenience items; deli or take-out food; retail sales of propane, kerosene or similar fuels; automotive repair or service; and/or carwash.

SIGN: Any lettering, graphics, or device, including flags, affixed or applied to any structure, building, or land for visual communication that is used for the purpose of bringing the subject thereof to the attention of the public. Governmental flags in all districts or decorative flags on residential units are not included in this definition.

SILVICULTURE: The growing and harvesting of trees or timber under forest management for purposes other than their fruit. For the purposes of these Regulations, the term “forestry” shall also include the use of temporary processing equipment such as chippers and portable sawmills, which are used in association with harvesting operations, not exceeding a maximum of one year, and are removed from the site once harvesting operations are complete. This definition specifically excludes permanent sawmills, lumberyards and other similar facilities used for the processing, manufacturing and/or storage of wood and wood products. Temporary on-site portable sawmills are part of harvesting. See also Agricultural use, which covers agricultural operations. The Town of Bristol desires to protect the rights of owners to use working lands, whether they are used for agriculture, forestry or both. Therefore, these two working land uses should be read to be complimentary and work in conjunction with one another.

SITE PLAN: A plan of a project created by an applicant showing the relevant features of a project necessary to satisfy the review criteria imposed by these Regulations and reviewed by the Development Review Board.

SITE PLAN REVIEW: Site Plan Review constitutes a review by the Development Review Board of a specific proposal that constitutes a permitted use within the district in which it is proposed. Site Plan review is limited in scope to focus solely on proposed development characteristics within the site. The Development Review Board may impose conditions on how the site is developed pursuant to the criteria contained in Section 356. The Development Review Board shall conduct the Site Plan review pursuant to the procedure outlined in Section 390-396.

S: SKETCH PLAN: a sketch of the proposed subdivision, in a form approved by the Development Review Board, showing the location of the subdivision and a description of the proposed development.

SLAUGHTERHOUSE: A building or site for the slaughtering and processing of livestock and the refining of their byproducts, which may include packing, treating, smoking, curing, storage or sale of meat or other animal-derived products on the premises.

SNACK BAR: An establishment where food and drink are prepared, served and consumed, which does not offer indoor seating for patrons and does not serve alcoholic beverages.

SOLAR COLLECTOR: A device or combination of devices, structure, or part of a device or structure that transforms direct solar energy into thermal, chemical, or electrical energy and that contributes to a structure's energy supply.

SOLAR ENERGY SYSTEM: A complete design or assembly consisting of a solar energy collector, an energy storage facility, where used, and components for the distribution of transformed energy, to the extent they are not required to be used jointly with a conventional energy system. Passive solar energy systems, those which use natural or architectural components to collect and store solar energy without using external mechanical power, are included in this definition.

STABLE, PRIVATE: A facility where horses are kept for private use, not for remuneration, hire or sale.

STABLE, PUBLIC: A facility where horses are kept for public hire or the sale of horses is a principal activity of the facility.

STORY: That portion of a building included between a floor and the floor or roof next above it.

STREET: See "ROAD"

STREET LINE. See "ROAD LINE"

STRUCTURE: An assembly of materials for occupancy or use, including but not limited to, a building, mobile home or trailer, billboard, sign, wall or fence, except a wall or fence on an operating farm.

FH- START OF CONSTRUCTION: See FEMA definition in SECTION 1909.1 of the current National Flood Insurance program rules and Regulations.

S: SUBDIVISION, MAJOR: Any residential subdivision containing four or more lots (3 new lots), or requiring any new road, or extension of municipal services; or any **commercial or industrial** project; or multi-family housing project that meets the definition of a subdivision; or parcels subdivided within the previous five years or after six years, any re-subdivision that would cause any driveway to be shared by 4 or more lots and to be upgraded to the road standards; or any subdivision containing issues which the Development Review Board considers too critical to be a minor subdivision.

S: SUBDIVISION, MINOR: Any residential subdivision containing Three (3) or less lots (two new lots), and otherwise not qualifying as a major subdivision.

FH- SUBSTANTIAL IMPROVEMENTS: Any repair, reconstruction, or improvement of a structure, the cost of which equals or exceed 50 percent of the market value of the structure either, (a) before the improvement or repair is started, or (b) if the structure has been damaged, and is being restored, before damage has occurred. The term does not, however, include either (1) any project for improvement of a structure to comply with existing state or local health, sanitary, or safety code specifications which are solely necessary to assure safe living conditions, or (2) any alteration of a structure listed on the National Register of Historic Places or a State Inventory of Historic Places.

THEATER: A site, building or complex used for the development, rehearsal, production and presentation of theatrical, dance, musical, comedy or other live performances, or showing of motion pictures.

TOWNHOUSE: See "Dwelling - Multi-Family".

TRAILER: Any vehicle which is customarily towed by a motor vehicle and not used as a living quarters.

VARIANCE: A departure from the zoning bylaws which is granted or denied by the Board of Adjustment. The conditions specified in SECTION 4469 of the Act must exist for a variance to be granted.

VEHICLE SALES OR RENTAL: A facility for the sales or rental of motor vehicles or recreational vehicles.

VEHICLE SERVICE STATION: A facility for the service or repair of motor vehicles or recreational vehicles that can legally be driven on a public road.

VETERINARY CLINIC: A facility maintained by or for the use of a licensed veterinarian in the diagnosis, treatment or prevention of animal diseases and injuries, which may include boarding of patients and other non-patient domesticated animals.

VILLAGE/VILLAGE PLANNING AREA: One of three planning areas defined in the Bristol Town Plan. These zoning regulations implement the vision for each of these planning areas as defined by the Town Plan. In these Regulations "Village" refers generally to the area of Bristol encompassed by the Village Planning Area as defined in the Town Plan and includes the area surrounding the former Village of Bristol. The Village Planning Area is depicted on the Zoning

Map contained herein. Under these Regulations the Village Planning Area includes some or all of the following zoning districts: VB, ROC, HDR, VR, VM, REC, C-1, CON, RA-2 and RA-5.

WAREHOUSING AND DISTRIBUTION: A facility for the regular and on-going enclosed storage, transport, shipping and/or distribution of goods, materials, products, parts, supplies, vehicles or equipment. Does not include repair of vehicles or equipment on site.

WIND ENERGY CONVERSION SYSTEM: A device that converts wind energy to other forms of energy.

WHOLESALE FACILITY: An establishment primarily engaged in selling or distributing merchandise to retailer, industrial, commercial, institutional, professional or other wholesale customers rather than directly to the public or end consumer.

YARD: Space on a lot not occupied with a building or structure.

YARD, FRONT: Yard between the road line and the building front line.

YARD, REAR: Yard between the rear lot line and the building rear line.

YARD, SIDE: Yard between a side lot line and a building sideline.
