

DSR Number: 5038-016 (25-31 West Street)

AUTHORIZATION FOR EMERGENCY WATERSHED PROTECTION (EWP)

Landowner 5038-016

The undersigned landowner hereby grants permission to enter upon our land for the purposes of repairing flood damaged stream banks as a result of the Halloween storm on October 31 and November 1, 2019.

This authorization includes the right to spread soil, remove and dispose of debris, install needed measures, seed and mulch, and perform similar emergency watershed protection work necessitated by the flood disaster.

The authorization also includes our agreement to maintain the emergency works for the period of 20 years from the date of completion according to the Maintenance Plan below.

Work areas covered by this authorization are shown on the engineering design.

Signature(s)	Date

Maintenance Plan

This plan covers the sites that were repaired as a result of the emergency watershed protection project activities resulting from the Halloween storm on October 31 and November 1, 2019.

The stream bank protection includes rock riprap and other structural measures of the eroded sites. Maintenance of the installed riprap will include replacement of any loss of rock, which threatens to destabilize the site due to high water events or other causes. Maintenance of all sites includes removal of brush, debris jams and trees which threaten the site.

The responsible party will visit the site at least once annually for three years following installation, with a local representative to determine the need for maintenance. After the three-year period, site evaluations are required for only for flowing 'out-of-bank' runoff events.
