Subject: Bristol Community Solar Commissioning celebration

Good morning Valerie, this morning Acorn members and I met to discuss how we will celebrate the commissioning of the Bristol project. I represent the Bristol Energy Committee in these meetings along with Sally Burrell who couldn't attend today. This is our tentative plan for your information:

- On January 8, with an inclement weather date of the 15th, we plan to gather at the high school if that can be scheduled, or Holley Hall, again if it is available.
- Dignitaries will be invited as well as investors in the project and we would like to invite you and the select board to attend and say a few words of greeting. The town has a lot to celebrate with this project and you and the select board have been key to our success.
- We plan to screen drone video of the project, talk about how it all happened and ask our legislators to say a few words as well.
- If we can meet at the high school we will unveil the monitor that will allow students and staff to see, in real time, what the array is producing. If meeting in Holley Hall we'll try to stream it live.
- We plan to ask Neat T-V to record and plan to zoom or youtube the event as well.
- At this point refreshments are planned.
- After the event, if the weather cooperates we will invite attendees to visit the site either from the overlook on the high school field or via the drive down to the site. We'll need to coordinate with Eric Coda if that latter is considered.

Please let me know if you have any concerns or if you would like us to brief you and the select board in person at some point.
