TO: Select Board Chairs and Town Managers/Administrators  
CC: Road Foreman, Public Works Directors, ACPC TAC Members  
FROM: Mike Winslow, Transportation Planner  
DATE: March 25, 2022  
SUBJECT: 2022 Potential Bridge Project Selection and Prioritization- *Nominations Due*  
4/20/2022

The Transportation Advisory Committee (TAC) is working through its annual project selection and prioritization process for the Vermont Agency of Transportation (VTrans). Last year the TAC focused on Traffic & Safety, Roadway and Paving projects. This year the focus is potential bridge projects for the State Highway and the Town Highway bridge programs.

Attached is a list of potential bridge projects that TAC has started to evaluate. "Asset Driven" potential projects have been identified by VTrans. A hyperlink to current inspection reports is included in the attachment. This information can also be accessed for all bridges here: [Bridges | VTransparency Agency of Transportation \(vermont.gov\)](https://bridges.vermont.gov).

The region also has the opportunity to identify "Regionally Driven" potential projects. If your municipality has a bridge project TAC should consider, please contact me either through email or phone by **April 11th** — [mwinslow@acrpc.org](mailto:mwinslow@acrpc.org) or 802-578-9999. The TAC will finalize its potential bridge project list at its April 20<sup>th</sup> meeting. Town bridges must have spans of 20ft or greater to be considered.

The following information is needed for each potential bridge project:

- Bridge number (I can help you find this if you do not know) and road name;
- Brief description of why the bridge **needs a major rehabilitation or replacement**.  
*This process is not appropriate for bridges in need of routine maintenance or small repairs;* and
- The importance of the bridge for economic, social or public safety/emergency response factors.

--
