Bristol Munsill Avenue Sidewalk Scoping Study

Local Concerns Meeting May 4, 2022

What IS a Scoping Study?

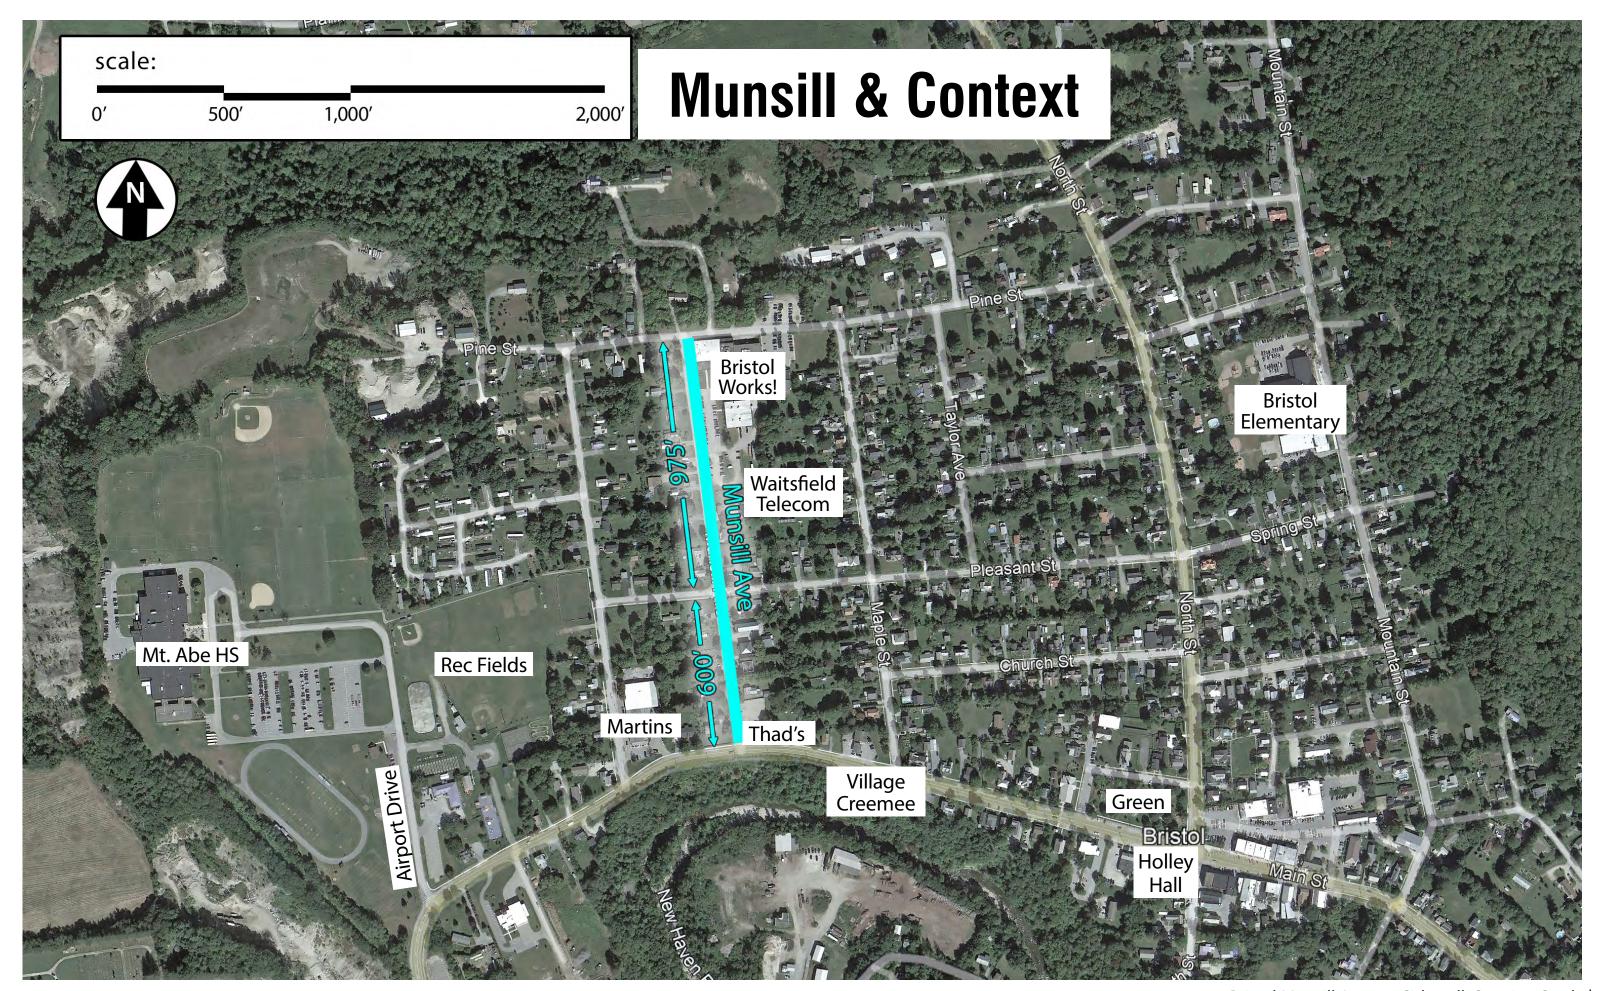

The Goal

Provide the Town of Bristol with a **sidewalk prioritization study** that illustrates likely sidewalk alignments along Munsill Avenue, anticipated conflicts and permitting requirements, as well as cost estimates.

This study will prepare the town for the **next step of applying for construction funding**.

Why Munsill Avenue?

- 1. **No** sidewalk currently
- 2. Connector to **Employment Center** at Bristol Works!
 - Includes Police Station and Medical Office
 - This means more truck traffic on Munsill Avenue
 - On the shuttle route for Tri-Valley Transit
- 3. **Residential** single/multifamily properties
- 4. Part of a broad initiative to have a completely walkable Bristol, including at Airport Drive

Sidewalk Construction Options

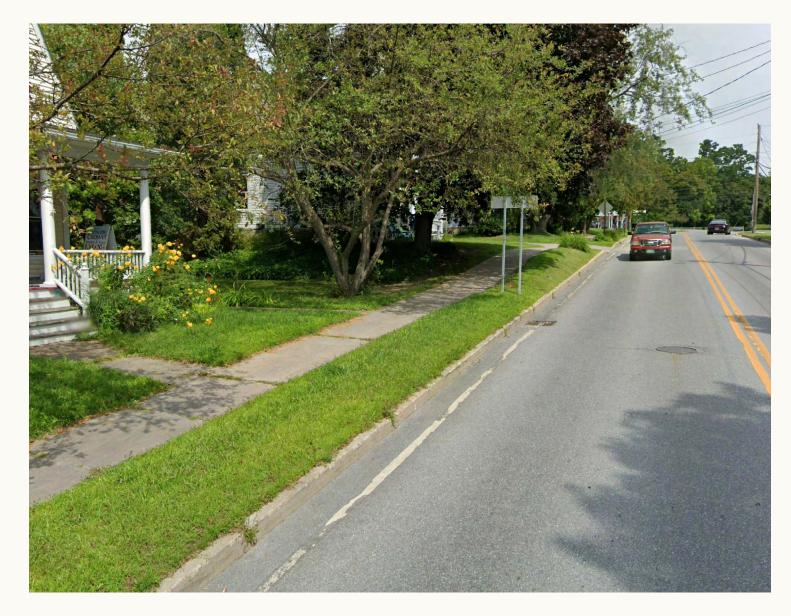

Sidewalk With a Grass Strip Buffer

Curbed Sidewalk - When Along Roadway

Sidewalk Construction Options

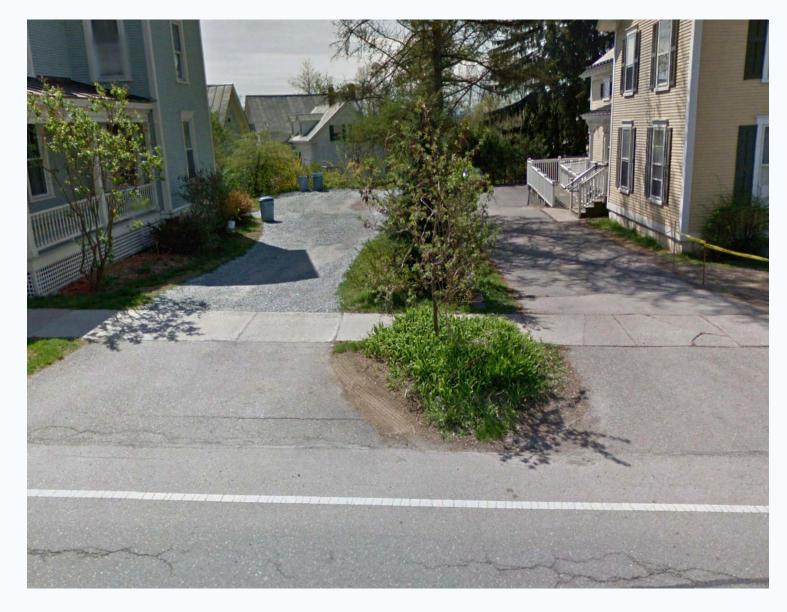

Narrow Grass Strip Buffer (3 feet)

Wider Grass Strip Buffer (5+ feet) - Fits (Some)Trees

Sidewalk-Driveway Interface Options

Sidewalk Continues Across Driveway

Sidewalk Stops at Driveway

Sidewalk-Driveway Interface Options

Continuous Flat Across Driveway

Continuous Dipped At Driveway - Curbed Condition Only

Next Steps

- Public Survey Open: 5/4 through 5/31
- Survey Results on Project Website Page: 6/15
- Alternatives Development: July August
- · Alternatives Meeting: September
- Public Alternatives Survey: September October
- Final Report: Later in 2022
