Hi Valerie and Jill,

Attached is the quote from Pioneer. We would need to install the F510 and the line reactor. They would be available in 5 business days.

Disregard the A510, that is for a larger motor in case you wanted them both done at once. They have one of those in stock. The second F510 would have a lead time of 6 months.

Their labor rates are at the bottom for start-up. They say it typically takes 4 – 6 hours to program and start-up.

Stay Healthy & Best regards,

Jim Brochhausen

Hi Josh,

Here is the quote for this.

Let me know if there are any questions!

Brian

>> Was looking to see if you could provide us the following info for these folks. I spoke with Brian Friday afternoon and am aware its about a 6month lead time for an additional VFD. He mentioned a heavier duty one in stock and said it was more money. If you could include a quote of that? They have to go in front of select board tonight to approve any additional funds. Thanks for all the help so far and answering all our questions.
