**Subject:** Re: Public Hearing: Ordinance Re: Bristol Traffic & Speeds

As a renter of property on Rockydale road it is quite obvious that the 40mph limit along this corridor is becoming an increasing issue as most drivers exceed this limit and then have little regard for the Bristol proper limit of 30mph. I've witnessed indescribable situations involving pedestrians, cyclists, children, and elderly. I understand that Bristol can't set the limits out side the town proper but these out of date limits on the roads leading into the town are having (predictable, most likely) effects on the general area in terms of near accidents and some excruciating noise levels. Am sure you understand this, Valerie, and hope it might be addressed at the meeting. What can residents of this and other corridors entering the town proper do to help the county/state? understand these effects? You needn't answer here but maybe let folks know if it comes up at the meeting!

Thanks,  
Katherine
