Valerie, Sharon, and Ian,

Please let me know when you'd like to include this on a future board meeting. This is to rebuild the custom high lift pump 2 motor that was grounded in the recent power upgrade and pumped over 40,000 hours prior to its replacement with the other rebuild this fall.

Hi Jill,

Here is a quote for the repair of the motor that was dropped off.

We are awaiting the line reactor for the 2nd VFD. Looks like the first week of January.

Let me know if you have any questions!

Brian
