Hi folks,

Apologies for the long delay on this project. Here's where we're at.

- The design has been approved at the SB level
- I've designed a bracket to hold the sign in place on the wooden posts (see image example)
- This bracket will be 3D printed by myself in ASA (similar to ABS) for exterior use
- I'd like to request a change from the very dark green color to black, so that the bracket and sign edge will match (see image example)
- I'd like approval to send the final file to 802 Print to have the sign manufactured
- I'd like approval to reach out to Greg Cromis to have the posts and tops refurbished in prep for the new sign.

Looking forward to your feedback.

– Ian
