Subject: RE: Proposed sound system upgrade

Good morning Meredith,

It was good to see you on Friday and thanks for letting me take some pictures of the shades.

Please find attached the updated proposal for the additional microphone patching at Holley Hall. We have changed the date and need to confirm the billing address as well. Do we send the bill to you?

Please sign and return the proposal and we shall order up the necessary parts and get you on the schedule so that you will be all set for Town Meeting Day 2019. If you have any questions, just drop me a line. Thanks!

Best Regards,

TJ

Hi folks,

With Town Meeting day not far away, I wanted to revisit a proposal I made after running sound at *last year's* meeting.

The ability to run the wireless mics into the mixer if we wish (TJ has said that can be easily setup.)

It was a pain to run back and forth from the board to the rack, and by feeding them into the mixer, we'll have a lot more control. It also allows any recording device to receive the wireless mics feed. Right now,

NEAT's video recording of Town Meeting is missing the audience mics, and they had to get room audio with their own mic on the camera.

Tree Ridge gave us a quote last year to accomplish this, and I wonder if this is something we could have done before this year's meeting? See attached.

It's not something that's used often, but it's VERY helpful at town meeting. The alternative is having multiple staff members that evening to manage levels at the mixer and in the back room at the same time. We would need three people, with the third passing the mic around to the audience. I did this myself last year!

I hope we can find a little money to make this change happen!

Best,
Ian

A proposal for Wireless Microphone Upgrade at Holley Hall

Overview: This proposal is for an upgrade in the installation, wiring and programing of the existing Shure SLX UHF wireless microphone at Holley Hall.

Installation Detail: The existing Shure SLX wireless microphones (2) will have their respective output cables reconfigured and split to allow the signal from each to be accessible when patching into the audio snake through to the Mackie 1604VLZ4 mixing console.

Product List: the below product list describes the items that will be supplied.

Products	Qty
Cables & Rack materials	
BRTB XLR patch cable – 3'	2
Shure XLR microphone cable – 25'	2
Rack tie lacing bar, Velcro, wire ties	1

Pricing: This includes the necessary mic cables, adaptors, rack work, time and materials, including the programming time needed to re-configure the Bose ControlSpace™ ESP processor. Training can be provided at time of installation. The cost for this upgrade project is $321.33.

I accept the above proposal and payment schedule and you are authorized to proceed with the project.
