

Bristol Hub Teen Center January – October 2019 Summary

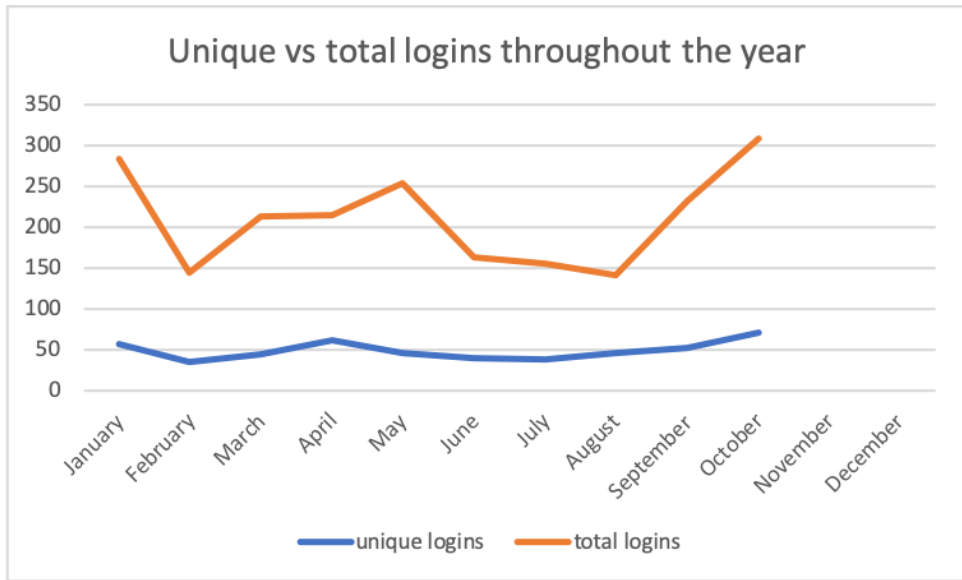

You will find the summarized data from the past 10 months below. The week to week info is on our website bristol skate park.com/category/weekly-updates/. It is updates at the end of every month with the past month's info.

In the past 10 months, January 2019 – October 2019, we have had 2,114 total logins, 158 unique logins for the overall year.

These are the attendance numbers broken down, the numbers for logins by town and by gender are based on the unique logins, so it is how many per month logged in rather than how many times the same person logged in.

	January	February	March	April	May	June	July	August	September	October	Total
Non-Binary	14	7	8	11	8	10	10	10	9	24	111
Male	35	28	32	37	34	27	25	31	39	39	327
Female	8	1	5	3	5	3	3	6	4	7	45
Monkton	7	4	7	6	9	3	3	5	6	8	58
Bristol	28	15	20	23	20	26	26	26	26	40	250
New Haven	3	3	3	4	3	1	1	3	3	5	29
Starksboro	6	6	4	6	7	2	2	5	8	8	54
Lincoln	12	8	8	22	8	4	4	6	7	10	89
Other	1	0	3	1	0	4	2	2	2	0	15
unique logins	57	36	45	62	47	40	38	47	52	71	495
total logins	284	145	213	216	254	163	156	142	232	309	2,114

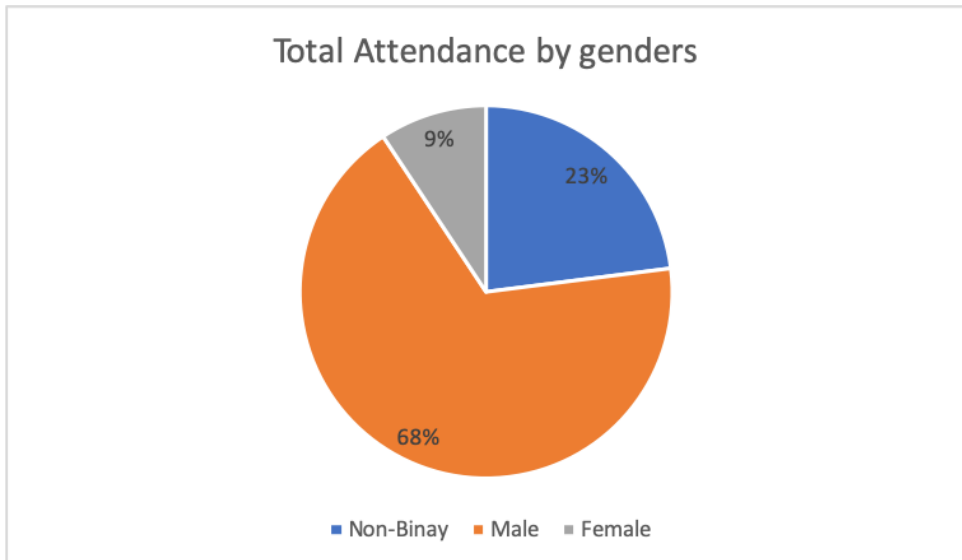

The average number of unique logins is 50 youth per month. The sum of each month's total unique logins is 495 youth.

As you can see by the graph the numbers varied over the year. Brian’s last day was January 26th. We see a steep decline in numbers in February, with the numbers increasing each month until summertime. This past July was the busiest in our

immediate records with 156 logins, a 20.9% increase from the year prior. Since the summer we have seen a steady increase in our numbers each month. Overall the number of logins this year is 18.18% lower than last year.

Primarily male identifying individuals are utilizing the Hub. The pie chart shows the total

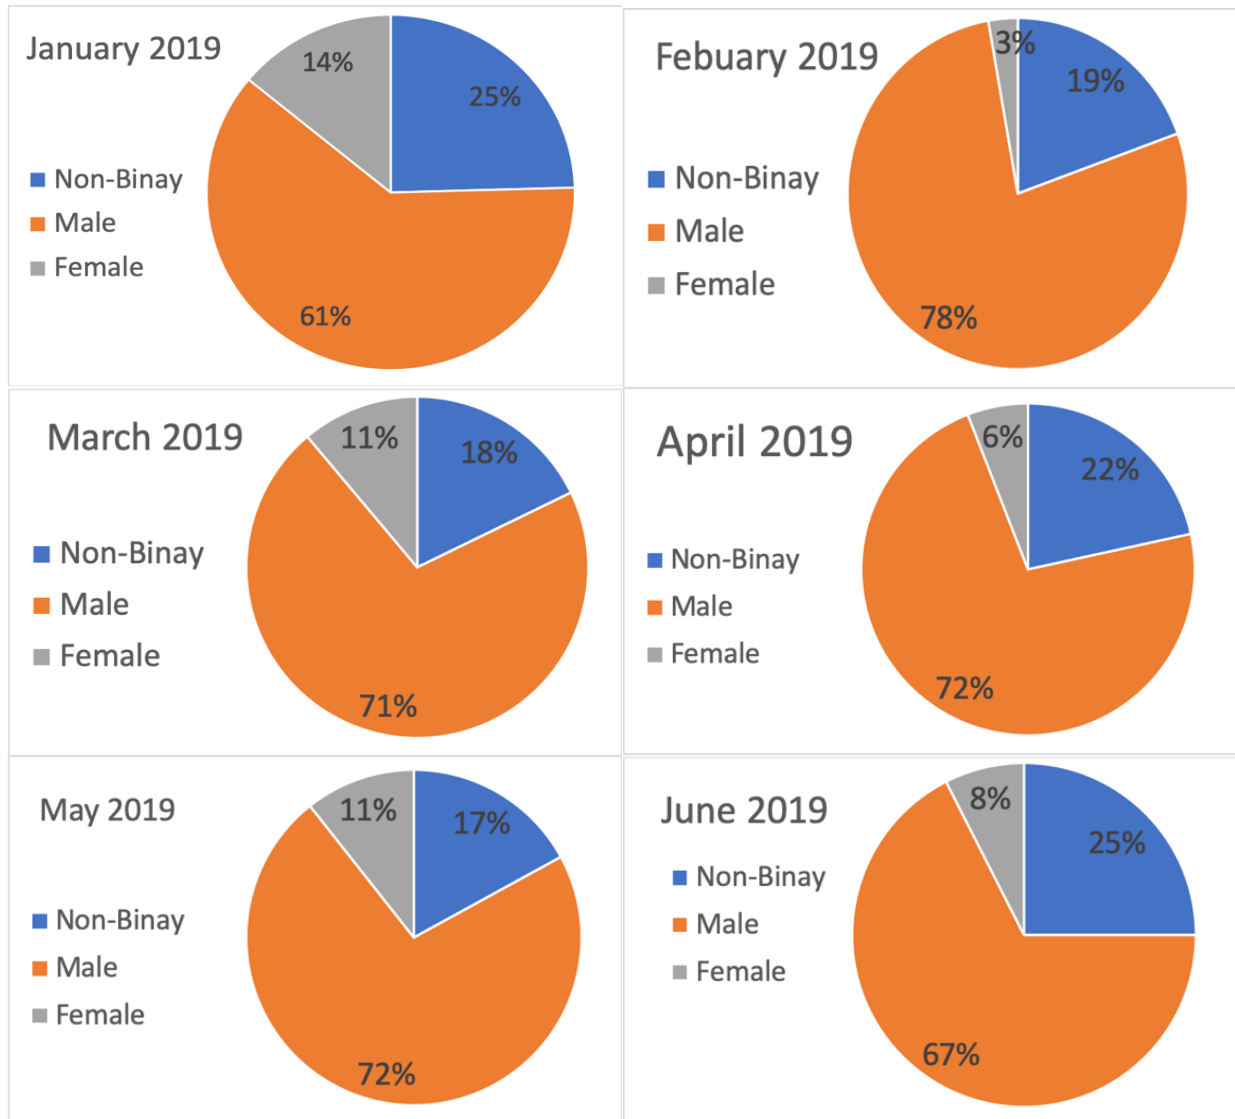

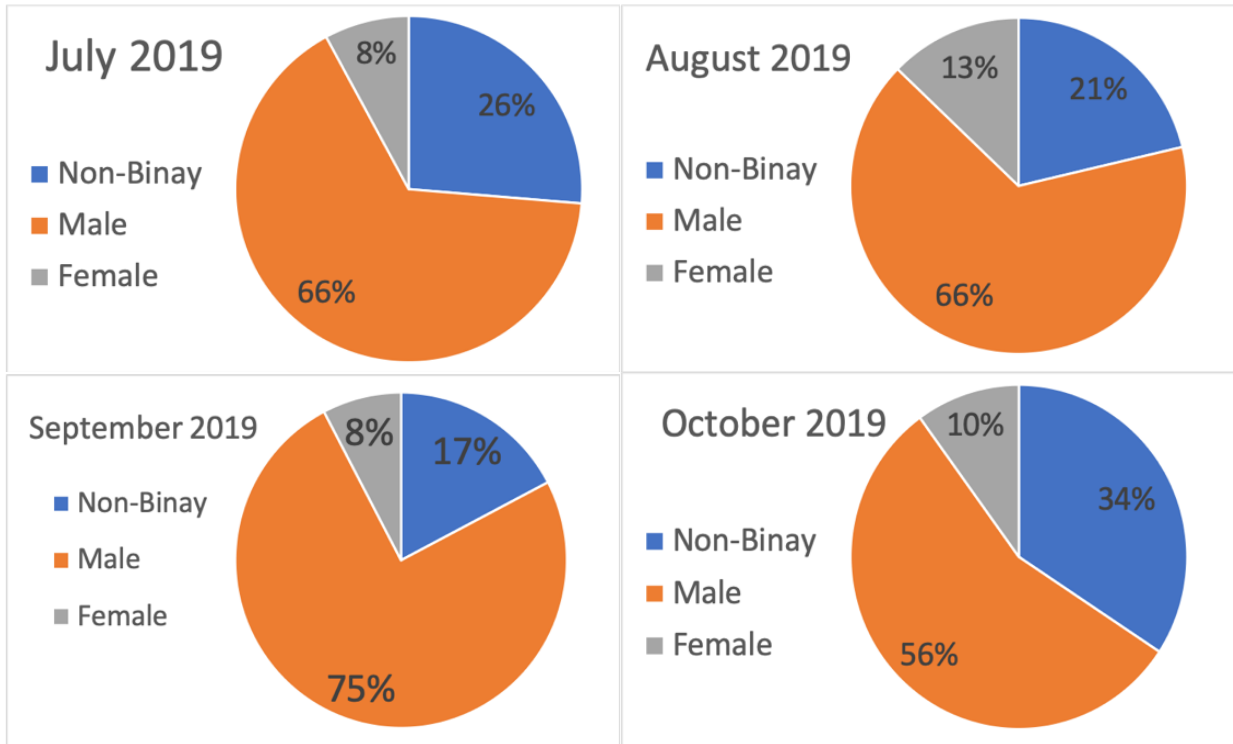

breakdown of individuals utilizing the Hub. It does not take into consideration how many times each person logged in per month. Just the total number of logins each month and the self described gender of those individuals. The data is flawed, due to the layout of

the registration system the default that youth end up selecting for gender is “non-binary” therefore giving us a false inflation of number of attendees who identify as such. We are working to correct it. We have been working to make the Hub more accessible and welcoming

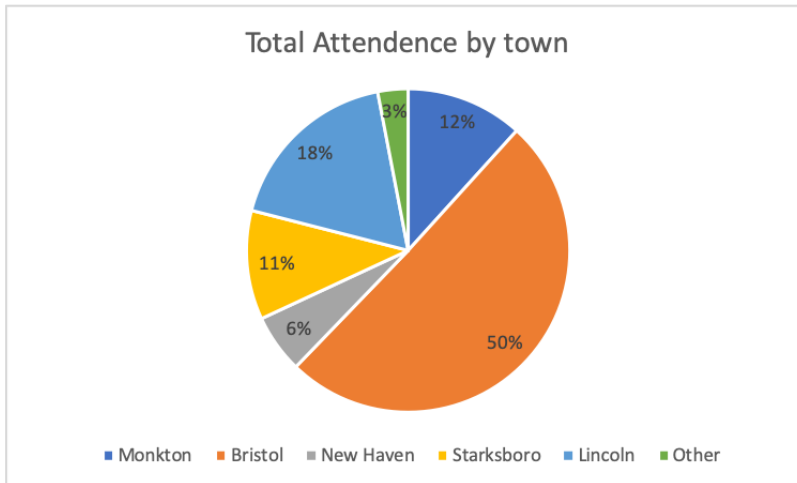

feeling to all and have had some success. In October we saw more feminine presenting folks than we have in the past months.

Here are the attendance percentages broken down by month and gender.

The teen center is used by Bristol residents the most, however like the software issue around youth registering as a different gender that they do not identify with Bristol is the default registration option and therefore do falsely register as being from Bristol, increasing those numbers.

Here are the attendance percentages broken down by month and town.
