Legend

- Parcel
- Catch Basins
- Stormwater Pipes
- LiDAR-Based Contours - 2ft
- Streams
- 25-Yr Inundation Extent

25-Yr Flood Depths (in)

- ≤ 3.0
- 3.0 - 6.0
- 6.0 - 12
- 12 - 24
- > 24

Map Notes:

- Horizontal mapping is referenced to NAD83 Vermont State Plane Projection. Elevation data is referenced to NAVD88. All horizontal coordinates and elevations are presented in feet.
- Topographic information developed from preliminary 2023 LiDAR data (0.35m resolution, Quality Level 1) from VCGI.
- Stormwater drainage system layout and elevation based on field data collected by SLR using GPS (Average horizontal/vertical accuracy = 2 inches).
- Aerial imagery provided by VCGI and obtained Spring 2024.
- Approximate tax parcel boundary data obtained from VCGI dataset.
- "No Blockage" designation means that there is no debris blocking the inlet of the Mountain Street stormwater drainage system.
