BEC April 27, 2015
Approved March minutes – Wendy moved, Sue second
Alden Harwood – AneSU facilities director

Mt Abe – trying to take pieces from renovation plan (voted down) to implement a little bit each year
Connections with Environmental Action club
Individualized learning program

Lights out front & path along Rec fields – solar? Alden getting quotes; hadn't thought about solar. @Middlebury college, solar lights didn't last all night, but MAUHS might be on motion sensor. So good candidate -
Security systems –
Solar at Lincoln school (low sun = disappointing) and Starksboro (working, but not perfect)
Need ~6-8 acres per meg solar installation
Mt Abe - ~200 watts usage -
RAAB wallpack lights on exterior (all but 2 sodium vapor lights on West classroom buildings) –
Peak is big issue 10A-2P. Things looking at: dishwashers, ventilation in gym and auditorium, hood in kitchen, digital control system
Heat – 43 unit ventilators, when it calls for heat, it also brings in fresh cold air. Wants to replace them, and put on CO2 and heat base; digital control. 6.5 yr payback.
VEEP –
Pool – cover is low hanging fruit
Laptop monitors – will program to shut off
How can we help? Work with Caroline & Env group
